KICHLER® CEILING FANS   S273

CHOOSE THE RIGHT FAN

WHAT SIZE FAN DOES YOUR ROOM REQUIRE?

The best rule of thumb is to go as large as your room can accommodate; for maximum airflow, you want at least 18 inches of clearance between the edge of the blade and your wall or ceiling. Here are a few suggestions to guide you:

Room size	Room type	Blade Sweep
90 square feet or less	• Small bedroom or office • Galley kitchen	42"
90 to 100 square feet	• Over a kitchen table • Breakfast nook • Small screened-in porch • Intimate dining room	44" and 46"
100 to 150 square feet	• Most bedrooms • Most larger kitchens • Formal dining room	52" and 54"
Over 150 square feet	• Great room • Large outdoor patio • Master suite	56" to 70" or multiple fans

A few additional tips:
- Larger rooms can often accommodate more than one ceiling fan. For example, a great room measuring 30' x 15' could easily handle two 52" ceiling fans.
- You'll notice every Kichler® ceiling fan lists its blade sweep and downrod options. Most Kichler ceiling fans are sold with downrods to accommodate 8' ceilings (4" to 6" downrod) or 9' ceilings (12" downrod). If your ceiling is higher, refer to the Main Catalog page 233 for matching downrod options.
- All Kichler stem mounted ceiling fans can be installed on sloped ceilings, no greater than 20º. See the Main Catalog page 230 for additional slope adaptor options up to 60º.

SAVING MONEY & ENERGY

ENJOY THE COMFORT OF YOUR NEW FAN & THE ENERGY SAVINGS!

Saving on energy costs has never been so comfortable. Many Kichler ceiling fans feature DC Motors that operate 70% more efficiently than standard AC motors. Our DC motors also operate at a cooler temperature for a longer overall life. Plus, all Kichler® ceiling fans are designed to cool a room in the summer (counterclockwise rotation) and circulate warmer air in the winter (clockwise rotation), delivering an ambient temperature change of – 4° F in Summer and + 4° F in Winter. Several Kichler ceiling fans are also ENERGY STAR® certified and feature highly efficient fluorescent lighting.

COOL TOUCH CONTROLS

TECHNOLOGY THAT DOES THE THINKING FOR YOU

Our CoolTouch™ Control System is intuitive to use and puts total control in your hands. The compact design is as stylish as the fan it operates. The patent-pending technology controls every feature and delivers a host of benefits you can sit back and enjoy:

• Adjusts all blade speeds, plus forward and reverse (counter-clockwise for summer cooling and clockwise for winter warming).

• Up and down lights easily turn on and off with the added feature of variable dimming. Intelligent return then allows you to return to your favorite preset brightness level.

• Replace a dedicated wall switch with the added convenience of a remote. Or, mount the remote to any flat surface.

• The CoolTouch™ controller runs multiple Kichler® fans – so your "great" room can truly look spectacular.

See pages 224-229 in our Main Catalog K411 for more details and to see all of our CoolTouch™ options.

Note: In wall transmitters 370012 and 370014 must be used in conjunction with complete control systems. These are transmitters only and do not include receivers.

When used in association with damp or wet rated fans, these controls must be installed indoors or a dry location.

The CoolTouch™ conversion system includes all necessary components (transmitter, receiver, wiring harness, wall pocket, mounting hardware and batteries).

Equivalent Light Output

To determine which qualified CFL light bulbs will provide the same amount of light as your current incandescent light bulbs, consult the following chart:

Incandescent Light Bulbs Watts (W)	Incandescent Minimum Light Output Lumens	Common CFL Light Bulbs Watts (W)
40	450	9-13
60	800	13-15
75	1,100	18-25
100	1,600	23-30
150	2,600	30-52

LIGHT BULB REFERENCE

- Lamps are included on all products.

- Wattages stated are the maximum recommended, however, you may use lower wattage lamps to suit your lighting needs.

- Finishes for fixtures installed outdoors are subject to change due to prolonged exposure to sunlight, airborne pollutants and other forms of weathering.

- All electrical products are rated as 120-volt, AC unless otherwise noted.

- All electrical products are certified and listed to UL/CSA/ETL Standards for use in U.S.A. and Canada.

- All products featured in the outdoor section are certified and listed to UL/CSA standards for wet or damp location except where noted.

- To serve you better, Kichler® Lighting reserves the right to make improvements to the products in this catalog. Therefore, some products may change during the life of the catalog and the product information contained in this catalog may also have changed.

We go to great lengths to assure the metal and glass finishes shown in the catalog match the actual products, but printing variations and variations in chemical finishes and the nature of hand applied finishing will cause some differences between the printed images and actual product, and from one product to another.
