LIGHTING

At Access Lighting,
we're committed to offering you,
our valued customer, an extensive
inventory
of affordable lighting.
Our comprehensive
selection includes
designs from all over
the world, giving you
Access to the latest
industry trends. At Access, we
strive for excellence!

LIGHTING

Selections in this catalog are listed as Energy Star, we are constantly upgrading our selection and listing new fixtures with Energy Star

Access Lighting reserves the right at any time to make changes in the construction and design of the product including the discontinuances of models in the catalogue without prior notice. Changes may be necessary by law or the availability of supplies. Receipt or possession of this catalogue does not constitute an agreement to sell.

Light Up!

Contemporary lighting that is exclusive and affordable; These are the fundamental concepts that define Access Lighting. Combine these ingredients with a desire to provide phenomenal service and timely shipping, and you have a clear understanding for the drive behind Access Lighting and the reason that we have blossomed into your source for contemporary lighting.

Access Lighting is family owned and operated by individuals who have a genuine desire to provide "good old-fashioned" customer service fueled by honesty and integrity. This approach to business can be found in each and every associate, all of whom work tirelessly to make every interaction with Access Lighting a pleasurable experience.

Access Lighting is focused on catering to you, our valued customer, to whom we are grateful for our continued success. It is with you, the customer, in mind that we make our product choices, traveling far and wide across the globe to source state of the art, contemporary lighting. We make every attempt to obtain product that offers great options for a variety of applications, and we are often inspired by the requests and ideas of our customers. We choose lighting that is extraordinary, affordable and cutting edge. Our energy efficient program includes a comprehensive collection of fluorescent fixtures, custom built to meet your needs. In addition, we have always felt that it is vital, as a company, to stay abreast of the latest technology and this is evident in our ever growing collection of contemporary LED fixtures.

It is with great pleasure that we present to you, our latest Energy Efficient catalog, "# 23". We are truly proud of this catalog. We see it as representation of the phenomenal growth that our company has experienced in terms of our understanding and appreciation for contemporary lighting, and the current trends. We hope that you will find this catalog a useful tool, and that it will assist you in making your job even more pleasurable.

Sincerely,

A handwritten signature in dark ink, reading "H. Rosenblatt". The signature is written in a cursive, flowing style. The background of the signature area is a light blue gradient.

H. Rosenblatt
President | Access Lighting

Lighting Information

Compact Fluorescent Lighting

Compact Fluorescent Lamps (CFL's) represent a giant leap forward in lighting technology. Gone are the bluish colors, slow starts and long lengths of earlier generations of fluorescent lights. (CFL's) are four to five times more efficient than incandescent lamps and last ten times longer.

CCT (Correlated Color Temperature):

One evaluative measure of color is the Correlated Color Temperature (CCT) and is expressed in Kelvins (degrees on the Kelvin scale). A typical incandescent lamp is rated at 2700K while sunlight in the early afternoon may be as high as 7000K. The higher the color temperature the bluer or colder the light. Such light would enhance contrast but would do a poor job of rendering reds and yellows. Incandescent lamps at the lower color temperatures have a difficult time portraying blues and greens. Access Lighting provides lamps in several CCT's.

CRI (Color Rendering Index):

Attempts to rate how well a source accurately renders colors of the objects it illuminates. It rates a source from 1 to 99 on the accuracy of color rendition. Unfortunately it is adjusted by color temperature. An ordinary incandescent light bulb may be rated with a 95 CRI but do a poor job of rendering blues and greens. A compact lamp with a CCT of 3500K and a CRI of 82 will do a much better job through the range of the visual spectrum. All lamps supplied by Access Lighting have a CRI of 82 or better.

Ballasts:

The arc that creates the light in a fluorescent lamp is basically a long spark created by a short circuit between the electrodes. If the power to the lamp were unregulated the arc would absorb all the power it could, until the lamp or the supply wires fail. The ballast initiates a high voltage pulse to start the lamp and then regulates the amount of current fed into it.

Magnetic Ballasts:

Have a perceptible delay before the lamps are ignited. Magnetic ballasts usually have little low temperature capability and should not be used in temperatures below 32°F.. Magnetic ballasts are best used in areas that require constant light or are infrequently switched on/off. They have low initial cost and long life expectancy.

Electronic Ballasts:

Electronic ballasts are flicker free and are able to ignite lamps at extremely low temperatures. Electronic ballasts are most suitable for areas where instant operation is required. When coupled with amalgam lamps electronic ballasts can operate in temperatures well below 0_°F.

Power Factor:

Power factor is not an indicator of the overall efficiency of a product. It has no impact on the metered consumption of a system. Some utilities charge a small penalty for systems with low power factors.

Dimming:

There are several methods of dimming electronic ballasts. Digital dimming units operate on a 0-10V signal from a special controller that commands the ballast to different dimming levels. Reverse phase dimming ballasts require a special control but operate using standard wiring. Most electronic dimming ballasts can dim to approximately 10% of maximum levels.

Timers or Photocells:

Some Electronic timers and photocells contain parts that could be incompatible with fluorescent fixtures; using these switches with incompatible products will result in a shorter light bulb life or complete failure of the fixture. To find out if an electronic timer or photocell is compatible with fluorescent fixtures, check with the manufacturer specifications of the timer or photocell..

Access Lighting Corporation has the capability of manufacturing lighting fixtures in many fluorescent alternatives not depicted in this catalog, Back-Up lighting systems, Dimmable Ballasts and other exciting lamping possibilities are available, please contact our customer service department with your requirements.

Ballast Options

Magnetic Normal Power Factor (NPF)

- Least Costly
- Long Start-up
- Not for Outdoor
- Not for use below 32°F

Magnetic High Power Factor (HPF)

- Required by some Utilities for Rebates
- Features same as (NPF)

Electronic Normal Power Factor (NPF)

- Energy Star Title 24 complaint
- Quick Start-up
- Outdoor use
- Reliable down to 0°F

Electronic High Power Factor (HPF)

- Meets most utility rebate requirements
- Multi-Voltage 110v – 277v
- Certain models are Energy Star compliant
- Other features same as (NPF)

CFL's & Other Sources Comparison

Source	Lum/Watt	Life (Hrs)	Color
Incandescent	16	1000	Good
Halogen	20	2000	Excellent
Mercury	40	24000	Poor
Fluorescent	65	10000	Excellent
Metal Halide	65	10000	Good
High P Sodium	95	20000	Fair
Low P Sodium	140	16000	Poor
High Power LED	45-110	35000+	Good

Fluorescent Color Temperature

Temp	Color Rendition	Typical Usage
2700	Orange/Yellow	Residential
3000	Yellow/White	Common Areas
3500	White	Most Applications
4100	Bright White	Bathrooms

Meant to mingle marvelously with any decor,
Cosmopolitan fixtures illuminate a world where
good design is universal. Updated classic
forms and striking silhouettes together create
understated elegance that is easily appreciated
from many angles.

Basic Model Number with the most common Lamping options as reflected in Price List

C Product Number	ES	=	Energy Star
	EN	=	Electronic
	MN	=	Magnetic

Custom model numbers used to create purpose built fixtures using Lamping Matrix reflected on Page's 134 thru 154 and Custom Fixture Chart on Pg 156

Certifications

UL / CUL / CETL

Certified UL, CUL or CETL. All fixtures are certified by these accredited testing laboratories for wet, damp or dry locations as noted.

Energy Star / Title 24

Fixtures in this catalogue conform to Title 24 and Energy Star unless otherwise stated.

ADA Compliant

Fixtures with ADA comply with the Americans with Disabilities Act. (Extends 4" or less.)

GU-24 Removable Ballast System

Simple easy removable, just twist on and off
Title 24 and Energy Star compliant
Available in separate Ballast and Lamp combinations, or
Self Ballasted lamps in a variety of popular wattages
Including T6 and T9 Circlines

Custom Built Fixtures

Quoatable custom finish options are available for most fixtures. Custom Fluorescent fixtures are purpose built and therefore are non - returnable. In order to simplify the ordering process, the following product identification code is utilized.

The fixture that the code below represents will be 20624 in the BS finish with Opal glass and equipped with a Electronic Normal Power Factor Ballast for 120v supply. Supplied with one socket to accept a 13 watt Quad Lamp
