SHAPING THE FUTURE OF HOME DESIGN

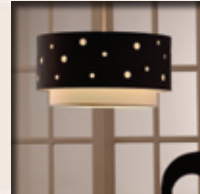

SHAPING THE FUTURE OF HOME DESIGN

2012

Each year at Adesso our goal is to provide quality lighting and furniture with a new edge. From K/D pendants to clever storage solutions, to mid-century inspired designs. We're excited to introduce more than sixty new products in 2012!

Adesso continues to be the leader in LED technology, raising the bar this year by adding our first-ever collection of Full-Spectrum LED task lamps. These light sources provide crisper, brighter and cleaner light that simulates natural daylight, improving color rendering. This results in glare-free light that reduces eye strain by offering sharper and clearer images.

We know you'll be thrilled by our vast array of other new LED lamps, including the Sonar, a 7 Watt LED sculptural tower task lamp which is turned on by rotating the tower, and then the light is adjusted by a full-range dimmer switch. And, if that's not enough, we are introducing our first collection of LED torchieres. The Aurora LED Torchiere has a 10 Watt LED down-light as well as a 36 Watt LED up-light.

In furniture, and back by popular demand, is the updated Milano Combo, upholstered with rich espresso faux leather and dark walnut legs.

We've been busy creating more of the best products for you at the most reasonable price points we can offer. We appreciate your continued support, and we remain committed to supporting the success and prosperity of your business.

ENERGY
EFFICIENCY

Adesso has been the leader in LED (Light Emitting Diode) task lighting since 2003. This advanced technology combines cool-burning light with energy efficiency. Each bulb lasts up to 50,000 hours. (Please visit our website, www.adessohome.com, for detailed light output information.)

Creating the latest technology in LED lighting, Adesso introduces its first collection of Full-Spectrum LED task lighting. In addition to the already established benefits of LED lighting, the benefits of Full-Spectrum LED include:

- Crisp light that simulates natural daylight, improving true color rendering with a minimum CRI of 90, and color temperature of 4000K
- Brighter, cleaner, glare-free light, resulting in less eye strain
- Uses 8-10 Watt LED chips for much brighter lumen outputs
- An excellent light source to enhance clarity and contrast to improve sharpness while reading, crafting, working on computers
- No hazardous material (no mercury)
- No bulb breakage, as LEDs are shatterproof

Inner shade: 10.75" Height, 17" Diameter.

CEILING MOUNT

All of the poly/cotton fabric pendants shown on this page have an ingenious patented K/D design. Construction consists of one single metal ring frame and one metal uno frame ring. Each has a Velcro strip on its outer edge. Simply line up the Velcro strips on the fabric with those on the shade frames, and roll the fabric to complete shade assembly. These pendants are intended for hard-wire installation; each includes a 15' white cordset with socket, and a metal ceiling mount canopy for hard-wiring. (Please note that all black pendants include a satin steel canopy rather than the white shown in inset). Each takes one 100 Watt incandescent or equivalent CFL bulb.

The uno ring has an extra hole in the center that holds the socket; for hanging pendants, the uno is used as the top ring. These shades can also be used on a lamp base by reversing the uno to the bottom.

K/D construction allows for a small cube carton, reduce shipping cost.
