draper

Each Draper lamp has vented metal cone shades that adjust vertically and horizontally; rotating 360° horizontally, 90° vertically. The black painted shades drape on the sides to reveal white interior, and have metal accents at the sockets that are finished to appear like wood. Each shade takes one 60 Watt incandescent or 13 Watt CFL bulb. All shades: 10" length, 5.75" Width, 4.75" Depth.

3235 DRAPER DESK LAMP

Two satin steel poles extend in a V-shape from the matte black dome base. The poles, 17" and 19", respectively, each hold a shade. Three-way (left lit, right lit, both lit) rotary switch on base. 22" Height, 21" to 25" Width. Base: 7" Diameter.

3236 DRAPER TREE LAMP

Black matte tree lamp has chrome accents. The three adjustable shades extend from the pole at 51.5", 57" and 63" Heights. On/off rotary switch on pole. 68" Maximum height with upper shade extended (pole height is 65"), 1" Pole diameter. Base: 10" Diameter.

3234 DRAPER GOOSENECK DESK LAMP

This addition to the collection has a satin steel 8.25" gooseneck and a dome base; on/off toggle switch. 18.5" Maximum height, 6.25" Diameter base.

explorer

The Explorer all metal architect lamps are painted a glossy light grey with white shade interiors. The shades adjust 90° left or right and 180° vertically, and each takes one 100 Watt incandescent or 26 Watt CFL bulb. The open shade allows the use of a non-standard bulb, such as a decorative round bulb, vintage antique bulb (inset) or a clear silver bowl bulb. The black cord extends from the shade socket and runs through the lamps' poles. Black 1.25" Plastic wheels lock base and center joints on both lamps. Shades: 2.5" Height, 12.25" Diameter (socket cone: 4.5" Length).

full-spectrum LED

Creating the latest technology in LED lighting — Adesso's first collection of Full-Spectrum LED task lighting. In addition to the already established benefits of LED lighting, the benefits of Full-Spectrum LED include:

- Crisp light that simulates natural daylight, improving true color rendering with a minimum CRI of 90, and Color Temperature of 4000K
- Brighter, cleaner, glare-free light, resulting in less eye strain
- Uses 8-10 Watt LED chips for much brighter lumen outputs
- An excellent light source to enhance clarity and contrast to improve sharpness while reading, crafting, working on computers
- No hazardous material (no mercury)
- No bulb breakage, as LEDs are shatterproof

A computer monitor with a silver bezel and stand is positioned on a dark wooden surface. The monitor's screen is black and displays a celebratory message in white, bold, sans-serif capital letters. The text is flanked by stylized fireworks: a large one in the top right, a medium one in the top left, and two smaller ones at the bottom center. The background of the entire image is a light gray wall with a subtle, repeating floral pattern.
