EGLO ILLUMINATES GLOBALLY

The start of our large success story was in 1969, when Ludwig Obwieser created the enterprise "EGLO Leuchten". An important milestone followed in 1976 with the building of the first business premises in Pill, Tyrol (Austria). In the mid 1980's EGLO was firmly established as one of the leading lighting manufacturers in Europe. Expansion into new markets became a priority and the opening of the first sales division in Germany laid a solid foundation for international business dealings. Consistent development of new markets opened the opportunity to establish further business premises all over the world. All 54 of them look after their own marketplace. EGLO is globally classed as one of the most successful suppliers of decorative lighting. Our success story is testimony to our customers' satisfaction, which makes us very proud.

OUR PROMISES

Company organization and an international corporate structure is EGLO's key for the production and distribution of lights. Innovative market research, detailed orientation and a flexible approach lead the way to long-lasting business partnerships with an independent family business.

We are global. EGLO is international: Business premises on five continents and distributors in over 50 countries allow us to handle local and international requirements.

Specialists for Living Spaces. At EGLO we focus on decorative lighting for living spaces. That's what we think about and do. Starting with the living room, bathroom and kitchen right into the outdoor areas of your design. Everything we do, we do properly with superior customer service.

Quality is key. Just standard or pure design – our lights are in touch with what you want. Including your budget. Whatever you get will be of the highest quality.

Always professional. In all areas of our company, we ensure that the uppermost level of quality and service is met. Staff competency is key to continued success. Hence, we support this through further education, constant staff development and training from start to finish. Detailed decisions are based on our optimized work flow and the aim to increase customer satisfaction at every level.

We think ahead, Green means Go! We pride ourselves on long-lasting business relationships with customers, staff and the partners we work with. As a global organization we take our green credentials very seriously and environmentally friendly, natural resources are used and implemented in the best possible way. Not only short-lived success, but long-lasting cooperation with customers and partners, as well as reliable quality of communication and production are pivotal in our company's philosophy.

**Our products comply with C-ETL-US standards.
Nuestros productos obedecen los estandares de C-ETL-US.**

Errors, misprints, model and price changes are without reservation. Photos and drawings may not always represent the product accurately.
Errores y cambios de modelos y precios son sin reservacion. Fotos y dibujos no siempre representan los productos exactamente.
