

FRAMBURG

inspired lighting since 1905

2015 marks our 110th anniversary. This is a milestone that few organizations attain and causes all of us at Framburg to reflect on, and express our gratitude to those who have supported us over the years. This support has allowed us to manufacture in the United States for over a century, provide support for thousands of families, and give the gift of light to millions of homes. Thank you for all you have done for us.

This catalog is a manifestation of our continuing evolution and the ongoing conversation we are having with our customers and the design community. An example of this evolution is the aggregation of family styles that, though perhaps different aesthetically, share similar fundamental design inspirations.

American Interpretations is an eclectic au courant collection that emerges from the fusion of craft and contemporary influences. Our dedication to this genre is testimony to the growing world-wide demand for American style and design sensibilities.

Fascinating diffusions of light emanate from the **Artisan Glass Creations**. Each of these pieces utilizes unique hand-made techniques and is an individual work of art.

Crystal Compositions are tributes to the universal appeal of this material. Both traditional and non-traditional uses are employed to create a diverse array of designs that range from old-world to contemporary.

The **Traditions** collection offers both archetypal and interpretational styles that are inspired by timeless American and European influences.

Organic forms and uncluttered construction are the foundations of the **Transitions** portfolio and allow these designs to easily migrate from traditional to contemporary settings.

Regardless of stylistic genre, each Framburg product is the beneficiary of over a century of designing and crafting products that boast superior workmanship and structural integrity.

We hope you enjoy perusing our designs and we thank all those who have supported us.

CUSTOM CAPABILITIES

Framburg is one of the most integrated lighting manufacturers in the world. The capabilities that we have refined for over a century in design, metalworking, and finishing allow us to offer modifications to many of the products you see in this catalog. These modifications may include different sizes, finishes, frame configurations and lamping options.

These capabilities also enable us to create completely unique products that are specifically tailored to the customers' distinct aesthetic, scaling, and engineering needs.

Framburg products can be found in some of the finest institutions and residences because of our uncommon engineering and crafting abilities.
