

Family: Parkside | Item No. 2002

Drawing 1 - Fixture Assembly

▼ start here

1

1. Find a clear area in which you can work.
2. Unpack fixture and glass from carton.
3. Carefully review instructions prior to assembly.

***** The construction of this fixture will be accomplished by first assembling the fixture, installing the glass, installing the mounting strap, making all necessary wiring connections, and then hanging the fixture.**

SAFETY WARNING: READ WIRING AND GROUNDING INSTRUCTIONS (I.S. 18) AND ANY ADDITIONAL DIRECTIONS. TURN POWER SUPPLY OFF DURING INSTALLATION. IF NEW WIRING IS REQUIRED, CONSULT A QUALIFIED ELECTRICIAN OR LOCAL AUTHORITIES FOR CODE REQUIREMENTS.

Drawing 2 - Detail Drawing

2

1. It is recommended that the glass be installed prior to mounting fixture to wall.
2. To install glass, slip glass panel (1) into cage (A) through the bottom of the fixture - see **Drawing 1**.
3. Slip glass into position flat against the inside of the cage.
4. Cut a small piece of sticky gasket material (3) and fix it to the glass above the glass clip (2) - see **Detail Drawing 2**.
5. Bend glass clips (2) so they engage the glass panel and gasket material to hold the glass in place. Repeat for remaining panels. **NOTE:** When bending the glass clips that are located on the sides of the cage bend one clip toward one piece of glass and the other toward the adjacent glass.

Drawing 3 - Detail Drawing

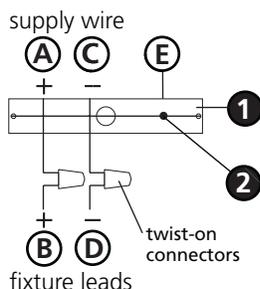

3

1. Fixture can now be lamped accordingly.
2. Please refer to the hanging instruction sheet (**I.S. 19**) provided to hang this fixture.
3. After hanging is complete return to this section to finish fixture assembly.

4

1. To install bottom panel of glass (4), slip glass through bottom opening of cage (A).
2. After panel is completely inside the cage (A), flip panel of glass (4) so it will lay flat in the bottom of the cage.
3. To remove the glass for relamping follow above steps 1-2 in reverse order.

Drawing 1 - Flush Mount

Drawing 2 - Chain Hung

Drawing 3 - Post-Mount

SAFETY WARNING: READ WIRING AND GROUNDING INSTRUCTIONS (I.S. 18) AND ANY ADDITIONAL DIRECTIONS. TURN POWER SUPPLY OFF DURING INSTALLATION. IF NEW WIRING IS REQUIRED, CONSULT A QUALIFIED ELECTRICIAN OR LOCAL AUTHORITIES FOR CODE REQUIREMENTS.

wiring instructions

Indoor Fixtures

1. Connect positive supply wire **(A)** (typically black or the smooth, unmarked side of the two-conductor cord) to positive fixture lead **(B)** with appropriately sized twist on connector - see **Drawings 1 or 2**.
2. Connect negative supply wire **(C)** (typically white or the ribbed, marked side of the two-conductor cord) to negative fixture lead **(D)**.
3. Please refer to the **grounding instructions** below to complete all electrical connections.

Outdoor Fixtures

1. Connect positive supply wire **(A)** (typically black or the smooth unmarked side of the two-conductor cord) to positive fixture lead **(B)** with appropriately sized twist on connector - see **Drawings 2 or 3**.
2. Connect negative supply wire **(C)** (typically white or the ribbed, marked side of the two-conductor cord) to negative fixture lead **(D)**.
3. Cover open end of connectors with silicone sealant to form a watertight seal.
 - If installing a wall mount fixture, use caulk to seal gaps between the fixture mounting plate (backplate) and the wall. This will help prevent water from entering the outlet box. If the wall surface is lap siding, use caulk and a fixture mounting platform specially.
4. Please refer to the **grounding instructions** below to complete all electrical connections.

grounding instructions

Flush Mount Fixtures

For positive grounding in a 3-wire electrical system, fasten the fixture ground wire **(E)** (typically copper or green plastic coated) to the fixture mounting strap **(1)** with the ground screw **(2)** - see **Drawing 1**.

Note: On straps for screw supported fixtures, first install the two mounting screws in strap. Any remaining tapped hole may be used for the ground screw.

Chain Hung Fixtures

Loop fixture ground wire **(E)** (typically copper or green plastic coated) under the head of the ground screw **(2)** on fixture mounting strap **(1)** and connect to the loose end of the fixture ground wire directly to the ground wire of the building system with appropriately sized twist-on connectors - see **Drawing 2**.

Post-Mount Fixtures

Connect fixture ground wire **(E)** (typically copper or green plastic coated) to power supply ground with appropriately sized twist-on connector inside post. Cover open end of connector with silicone sealant to form a watertight seal - see **Drawing 3**.
