## 3314 INSTALLATION INSTRUCTIONS

## **GENERAL**

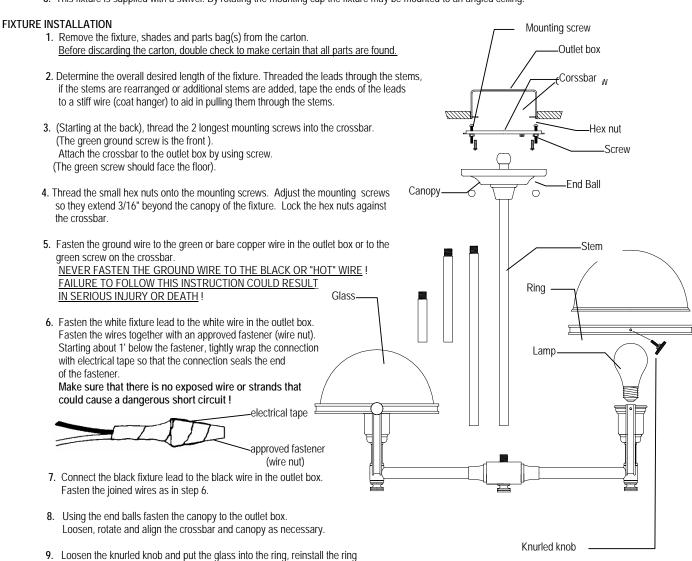

- 1. To insure the success of this fixture installation, the following instructions and diagram(s) should be read and understood.

  All electrical connections must be made in accordance with the National Electric Code and local codes and ordinances.

  If you are uncertain of the methods of installing electrical wiring and lighting fixtures, secure the services of a qualified licensed electrican.
- 2. TOOLS NEEDED: Blade screwdriver, small adjustable wrench or slip-joint pliers, electrical current tester, stepladder and electrical tape. NOTE: The important safeguards and instructions outlined on this sheet cannot cover all possible conditions and situations that may occur. It must be understood that common sense, caution and care are factors that cannot be built into any product. Caution and care must be supplied by the person(s) installing, operating and caring for this lighting fixture.

## INSTALLATION PREPARATION

- 1. TURN OFF THE ENTIRE ELECTRICAL CIRCUIT TO WHICH THE LIGHTING FIXTURE IS TO BE ATTACHED. Move the appropriate circuit breaker to the "off" position or completely remove the fuse controlling the circuit.
- 2. If an existing fixture is being replaced, remove it and note to which of the wires in the outlet box the fixture was attached. DO NOT SEPARATE ANY OTHER WIRES THAT MAY BE IN THE BOX. DO NOT DAMAGE THE INSULATION OF OLDER WIRING. In regular circumstances the BLACK wire will be the "Hot" lead and the WHITE wire will be the "Neutral" or "Common" lead. A GREEN or BARE COPPER wire is the "Ground". In older buildings it is always good practice to reconfirm the polarity of the wiring.
- 3. This fixture is designed to be mounted on a correctly installed standard round or octagon box or a through wiring box with a plaster frame. The box must be securely mounted to the structure of the building.
- 4. This fixture is supplied with a 5-piece stem. There is one 3" section, one 6" section, one 12" section and two 18" sections. This feature allows the fixture to be mounted with a stem up to 57" in length in 3" increments.
- 5. install the stem onto fixture.
- 6. This fixture is supplied with a swivel. By rotating the mounting cup the fixture may be mounted to an angled ceiling.

11. Restore power to circuit at breaker or fuse box.

DO NOT EXCEED RECOMMENDED WATTAGE!

10. Install the lamps (light bulbs). NOTE: This fixture is rated for 100 watt type A lamp(s).
