LEGEND/SYMBOL GUIDE

- All bulbs are Medium Based Bulbs (E-26) unless otherwise noted.
- Bulbs are not included unless otherwise noted.
- Wattages stated are the maximum recommended; however, you may use lower wattage bulbs to suit your lighting needs. Some recommended bulbs are not available in the maximum allowable wattage.
- All electrical products are rated as 120-Volt, AC unless otherwise noted.
- All electrical products are certified and listed to UL/CSA/ETL Standards for use in U.S.A. and Canada except where noted.
- All chain drop products are equipped with at least 72" of chain, except where noted.
- On some products, in order to accommodate higher than normal ceiling heights, extra lead wire is supplied and specified. With additional sections of chain or stems (not included), this allows an added measure of design flexibility.
- Additional chain and stem for ceiling fixtures can be ordered through Kichler customer service.
- Floor lamps require some assembly.
- Halogen capsule lamps may be used to replace any lamp of a HIGHER wattage, but not to exceed the existing specified maximum wattage, i.e., 72-W. may replace a 75-W.
- Finishes on outdoor portables are subject to change due to prolonged exposure to sunlight, airborne pollutants and other forms of weathering.
- To serve you better, Kichler Lighting reserves the right to make improvements to the product in this catalog. Therefore, some products may change during the life of the catalog and the product information contained in this catalog may also have changed.

 - This symbol indicates the product best suited for indoor use with self-ballasted, compact fluorescent lamps sold through electrical distributors and lighting showrooms across the U.S.

California Title 20

To comply with the California Title 20 regulations, all portable lamps shipped into California are assessed a charge per lamp, dependant upon the quantity and types of CFL bulbs required for the lamp. To learn more about California Title 20 regulations visit www.energy.ca.gov/appliances/2008rulemaking/2008-AAER-1A/2008-08-29 Initial Statement of Reasons Part-A.pdf. For specific prices on portable lamps shipped into California please consult the latest version of a Kichler price sheet.

California Title 24

Title 24 is a document that contains the building codes for the state of California. All lighting fixtures in this catalog that comply with the October 1, 2005 revision of the California Title 24 standards are marked with the T24 logo. For more information, visit www.energy.ca.gov/title24.

Power Limiting Device

To comply with the 2005 Federal Energy Policy Act, and maintain safety, Kichler Lamps and Accessories torchieres are supplied with a Power Limiting Device. The Power Limiting Device maintains the energy consumption to be "not more than 190 watts of power and shall not be capable of operating with bulbs that total more than 190 watts". The Power Limiting Device shuts off the torchiere when more than the maximum 190W (wattage) is used.

Consumer Notice

Federal Legislation to phase out 100 watt Incandescent Bulbs starting January 2012

The federal government enacted the Energy Independence and Security Act of 2007 in December 2007, requiring all general-purpose light bulbs that produce 310–2600 lumens of light be 30% more energy efficient (similar to current halogen lamps) than current incandescent bulbs by 2014. The efficiency standards will start with 100 watt bulbs in January 2012 and end with 40 watt bulbs in January 2014.

Light bulbs outside of this range are exempt from the restrictions (historically, less than 40 watts or more than 150 watts). Also exempt are several classes of specialty lights, including appliance lamps, rough service bulbs, 3-way, colored lamps, and plant lights.

By 2020, a second tier of restrictions would become effective; which requires all general-purpose bulbs to produce at least 45 lumens per watt (similar to current CFLs). Exempt from the Act are reflector flood, 3-way, candelabra, colored, and other specialty bulbs.

Many Governments worldwide have passed measures to prohibit the sale of incandescent light bulbs for general lighting. The aim is to encourage use of more energy efficient lighting alternatives, such as compact fluorescent lamps (CFLs) and LED lamps.

New Labels for Light Bulb Packaging

How can consumers and professionals shop for light bulbs based on lumens? New light bulb package labeling will help. The Federal Trade Commission (FTC) is already working with light bulb manufacturers to help change the consumer mindset from wattage to lumens. In 2012 manufacturers will begin using new Lighting Facts® labels that list a light bulb's lumens prominently on a package with wattage listed as "energy used." The labels will also list helpful information such as estimated annual energy cost and bulb life expectancy.

Lighting Facts Per Bulb	
Brightness	870 lumens
Estimated Yearly Energy Cost	\$1.57
Based on 3 hrs/day, 11¢/kWh Cost depends on rates and use	
Life	5.5 years
Based on 3 hrs/day	
Light Appearance	
	
Energy Used	13 watts
Contains Mercury	
For more on clean up and safe disposal, visit epa.gov/cfl .	

Source: epa.gov/cfl

CFL Alternates for Incandescent Light Bulbs	
Incandescent	CFL Approximate Watt
40W	9-13W
60W	13-15W
75W	18-25W
100W	23-30W
150W 3-way	30-52W
