

Kichler Design Pro LED Linear System Convertor Installation Instructions

P/N: 12338BK, 12338WH, 12339BK, 12339WH

Dev. No: CP300309BK and CP300309WH, CP300310BK and CP300310WH

BEFORE INSTALLING:

All installations should comply with national and local electrical codes. If you have any doubts concerning installation contact a qualified licensed electrician.

For use only with listed Kichler LED 24VDC Class 2, 5A MAX power supplies.

Suitable for dry location only.

NOTE: Read all instructions thoroughly before starting installation.

PLEASE SAVE THESE INSTRUCTIONS

1. Turn off power before modifying the system.
2. Insert installed LED Linear Male Connectors into the System Convertor. **NOTE:** These are polarized connections, if the connector does not fit easily, flip it over and try again.
3. Plug the System Converter directly into the power supply, power supply cable, or Design Pro fixture or disc. (each sold separately) **NOTE:** These are polarized connections, if the connector does not fit easily, flip it over and try again.
