STEP 9 – Attach Lanyard

- A. The purpose of the lanyard is to provide the installer a means to support the fixture from the junction box while connecting the electrical wires. This enables the fixture to hang from the junction box and your hands are free to make the wire connections.
- B. Turn the Button Stop so it may be inserted into the crossbar slot. Make sure the Button Stop is completely inside the crossbar. Slowly release the fixture to make sure it is supported by the Button Stop. Proceed to the wiring steps. Once you are complete with the wiring there is nothing to do with Lanyard. The Lanyard will push into the junction box when the fixture is placed for final mounting.

Figure 9

STEP 10 – Make Wire Connections

- A. Use standard wire connectors to make all wire connections. (Connectors are not included with fixture.) Strip and prepare wire ends according to instructions supplied with connectors.
- B. Connect White Supply Wire from the Outlet Box to White Wire from fixture.
- C. Connect Black (or Red) Supply Wire from the Outlet Box to Black Wire from fixture.
- D. Connect Ground Wire from the Outlet Box to Ground Wire from fixture.
- E. Twist connectors until wires are tightly joined together.
- F. Wrap each connection with approved electrical tape and carefully stuff all the connected wires into the Outlet Box.
