### STEP 5 – Attach Lanyard

- A. The purpose of the lanyard is to provide the installer a means to support the fixture from the junction box while connecting the electrical wires. This enables the fixture to hang from the junction box and your hands are free to make the wire connections.  
B. Turn the Button Stop so it may be inserted into the crossbar slot. Make sure the Button Stop is completely inside the crossbar. Slowly release the fixture to make sure it is supported by the Button Stop. Proceed to the wiring steps. Once you are complete with the wiring there is nothing to do with Lanyard. The Lanyard will push into the junction box when the fixture is placed for final mounting.
