## How to Install Mr11 Bulb and Refrax™ Pendant

Pendants may be mounted to monorail systems, monopoints or line voltage track by coupling to the quick connect transformer adapter. Attached to the socket is a cable that may be cut on site during installation to any length (see instructions below).

**1** Position the pendant grid against the socket and secure in place by screwing the metal collar onto the socket.

**2** Plug bulb carefully but completely into socket. Use only an MR11 glass covered lamp bulb.

## How to Shorten the Cable:

**7** Screw quick connect into quick connect adapter until it seats. If you adjust the orientation of the pendant, be careful not to loosen the connection.

**8** Hang A chains first, following the crystal map. Hook the connectors into the pinholes located towards the outside of the grid. See illustration to the left.

**9** Insert pins into grid. Hang B chains by sliding the octagon with an open hole onto the pin. Chains B will nest into position between A chains. See illustration to the left.
