How to Install G9 & GU10 Bulbs and Refrax™ Wall Bracket:

1 Loosen the (4) wall sconce screws and separate the back plate from the wall sconce. Feed stem and ground wires through back plate, then attach to power wires and ground wire in outlet box.

2 Attach back plate to the outlet box with the (2) back plate screws NOT supplied.

3 Attach wall sconce to back plate and tighten the four screws loosened previously.

4 Use G9 JCD bulbs in the small sockets. Plug bulbs carefully but completely into sockets. Use only GU10 base bulb in the larger sockets. Align the legs, insert and turn clockwise carefully but completely. Only use bulbs marked "suitable for open luminaires" OR bearing this symbol:

5 Install bottom crystal grid with two thumb nuts (already screwed onto grid) to bottom of the chandelier.

6 Hang A chains first, following the crystal map. Hook the connectors into the pinholes located towards the outside of the top grid. See illustration to the left.

7 Insert pins into top grid. Hang B chains by sliding the octagon with an open hole onto the pin. Chains B will nest into position between A chains. See illustration to the left.
