

AC1127

(4 clusters)

INSTALLATION INSTRUCTION

1. Electrical appliances must only be connected by competent persons.
2. Before commencing installation work disconnect the mains cable from the power supply-removing the fuse or turning switch to "OFF"!
3. Do not attach lamps to surface which are damp, freshly painted, otherwise electrically conductive.
4. Use the subsection system according to the weight of the lamp.
5. Be sure to always use the correct type of bulb. (See information on the label)
6. Cleaning is limited to the outer surfaces, shades or protective glass, reflectors and covers.
7. Do not touch the bulb with bare hands. Always switch off the electricity supply and allow to cool for 10 minutes before changing the light bulbs.
8. If the light is with crystal or glass, please follow below steps.
 - a. Check the packed bags with numbers then open them.
 - b. Hang the crystals to the right places according to the illustration.

NOTES:

1. The symbol "⊕" indicates that the lamp has an earth terminal. (The earth wire yellow and green) must be connected to the terminal indicated by the symbol.
2. "□" Protection class II=This lamp is doubly insulated and must not be connected to and earth wire.
3. The symbol "⌋---0.5M ⌋" indicates that the lamp head must be at least '0.5m' from the lighted surface.
4. The symbol "⌋F" indicates that luminaire is suitable for use on normally flammable surface.
5. The symbol "⌋I" indicates that luminaire is only suitable for use indoors.
6. The below is how fitting wire connect to household circuit.

⊕=Earth	Green/Yellow	connect to	Household circuit
N=Neutral	Blue or white	connect to	Yellow/Green
L=Live	Brown or black	connect to	Blue or White
		connect to	Brown or Red
