ADDRESS LIGHTS

ADDRESS LIGHTS INCLUDE

- Custom applied numbers
- Low-Voltage plug-in transformer (where indicated)
- Simple to follow instructions
- Light bulbs and sockets
- 25' of Low-voltage wire
- Mounting hardware

ADDRESS LIGHTS ARE

- Easy to see, day or night
- Readable from over 100 feet
- Energy Efficient - powered for under \$10/year
- Easy to install - with common household tools
- Low maintenance - install it and forget about it

CONCORD FAN FEATURES

CONCORD MOTOR

The key to the life expectancy of a fan lies in its motor. Concord has spent years redesigning and refining our motors to produce the quietest, coolest running motors in the industry. Heat is the biggest enemy of a ceiling fan motor. Our motors are specially designed and sized to match the sweep and pitch of each fan, insuring a low heat operating environment within the unit. Highest quality components namely, H-60 grade silicon steel, heavy gauge copper wire and finest fiberglass insulation are a few of the other reasons a Concord motor is a "cool" motor. Pure aluminum die cast rotors are machined to tolerances thinner than a human hair. Two piece motor and rotor housings insure true Micro-Balanced operation. Constant magnetic flow is insured with vacuum dipped, lacquered stators. Factory lubricated and permanently sealed precision NTN ball bearings installed with bearing retainers provide years of silent, maintenance free use. Finally, our motor housings are stamped, lathed and instrument matched to insure a perfect fit between the various pieces and triple plated and double lacquered to provide for lasting beauty. And, Concord motors receive a 100% Quality Control inspection twice during production plus several more post-production Q.C. inspections.

MOTOR COUPLER

This unique design not only adds decorative qualities to our fans, but this standard feature insures safety and stability to the fan with double threads, double safety pin and set screws. Color is always matched to the fan finish.

MOTOR SHIPPING BLOCK

Factory installed motor shipping blocks protect motors during transit.

TURBO 212 MOTOR

The Turbo 212 is our largest motor with a 212 mm overall diameter. Powerful, yet energy efficient. Huge, double sealed bearings provide stability and balance. 50CS1300 grade of silicon steel on the motor stator insures the highest performance.

QUADRUPLE LOCKING SYSTEM

Double threaded downrod, safety cross screw, set screw, safety cotter pin.

80" LEAD WIRES

Our 80" lead wire is designed with a special outer insulation to withstand cuts and nicks plus temperatures up to 105° Celsius. The extra length allows for installation of ceiling fans on support rods of up to 72" in length without wire splicing.

LIGHT FIXTURE GLASS HOLDERS

Threaded grommets in each light fixture glass holder guarantees a secure grip on the glass globe. These grommets will not strip out like the type normally found in the industry.

LIGHT KIT ADAPTABLE

All fans, with exception of the Nautika, are fully light kit adaptable. The detachable switch housing unit makes adding a light kit a quick and easy installation.

NOISE FREE SPEED CONTROL METHOD

Concord uses precisely manufactured triple capacitors with Underwriter's Laboratory (U.L.) tested and approved quality to insure and guarantee all fans not to hum or buzz.

4 WAY UPLIGHT SWITCH

Provides: HI - MED - LOW - OFF operation.

DETACHABLE SWITCH HOUSING

Our switch housings are pre-wired with Molex plug-in connectors, providing ease of installation and swift handling of potential problem areas. It also allows for quick and easy addition of remote and/or wall control operation system.

3 SPEED & REVERSIBLE

All Concord fans come equipped with three speeds - high, medium, low. And all of our fans are reversible to provide re-circulation of warm air trapped at the ceiling level during the winter season.

SPEED SWITCH

Concord Speed Switches come standard with a dual brass coupling to eliminate breakage of switch due to repeated use.

REMOTE CONTROL COMPATIBLE

All Concord fans are remote control compatible. Some models come with remote controls included.

BLDC - BRUSHLESS MOTOR

Our DC motor uses computer technology to create multiple speeds, cooler operating temperatures, noise reduction, and 65% energy savings over traditional fan motors.

WARRANTY

All Concord motors are covered by a limited LIFETIME warranty. All other components of our fans, plus light kits and electronics are covered by a 1 year warranty.

UL APPROVED

All fans and light kits meet approval standards to be Underwriter's Laboratory (UL) listed

THE RIGHT CONCORD FAN FOR THE RIGHT ROOM

All Concord ceiling fans will perform quietly and efficiently in any room size. However, we recommend the following maximum room size. Ceiling fans should be mounted in the center of a room or as close to the center as possible unless using multiple fans in same room.

Optional: Room with multiple fan settings

BASIC MEASUREMENTS FOR CONCORD CEILING FAN

The following guide will help in choosing the correct type of ceiling fan or the possible addition of an adapter kit for the installation location you have in mind. These measurements are from the ceiling to the lowest part of the fan (without light fixture).

SUPPORT ROD LENGTHS GUIDE

The following chart will help in choosing the correct support rod length when installing a ceiling fan in rooms with different ceiling heights. Couplers are also available to create lengths different from the standard lengths stocked.

SUPPORT ROD LENGTH	STD	12"	18"	24"	36"	48"	60"	72"
CEILING HEIGHT	8'	9'	10'	11'	12'	13'	14'	15'
