2017 CATALOG

# THE DIODE DECADE

In 2017, Elemental LED will enter its **10th year of business**. We mark this special occasion by thanking each of you for being a part of our growth and success.

Our journey began as a small company with just a handful of employees interested in disrupting the market. Since this humble beginning, we've grown to be an **innovative and forward-thinking industry leader** in the ever-changing world of LED lighting. We are proud of our achievements and accomplishments including our status as the **largest provider of linear LED lighting solutions in America**.

The enthusiasm, support and dedication of our excellent team has helped us to achieve this ten-year milestone. We are indebted to the **contributions of our employees**. Their positive impact on our organization is limitless.

We are also **grateful to you, our customers and partners**, who trusted us to provide spectacular lighting solutions throughout the world. You placed your confidence in us and have been **loyal to our product and services**. We recognize that your commitment to Elemental LED and Diode LED has been integral to our success. We will continue to build on this solid foundation in the coming decade by providing you with the **best-in-class service you've come to expect** and the most **technologically advanced LED lighting products** in the market.

To our outstanding team, customers and partners, we extend our deepest appreciation for your loyalty and support.

Here's to another incredibly successful year!

THE DIODE DECADE

# Visit the **DiodeLED.com** for even more great resources

The Diode LED website features an **inspiration gallery** of projects and installations to help you visualize how our products can enhance your projects.

Additionally, the website features the ability to browse and select products based on project needs, along with extensive product content and technical resources including:

- **Product specifications**
- **Accessory compatibility charts**
- **Installation guides**
- **Demonstration videos**

The **shopping list feature** allows you to pick and choose products, while browsing the Diode LED website. Once your shopping list is finalized, a unique shopping list I.D. number will be provided. Present your shopping list I.D. number to one of our many Diode LED dealer partners and they will provide you with pricing and ordering options.

## THE SHOPPING LIST

**1.** Browse the Diode LED website to add products to your shopping list. You will then receive a shopping list I.D. number for future reference.

**2.** Present that I.D. number to your dealer, who will provide pricing and fulfill your order

**3.** Choose to pick up your order from your local dealer or have it delivered directly to you

## THE SHOPPING CART

**1.** Pull up the customer's shopping list using their shopping list I.D. number

**2.** Create and fulfill the purchase order directly from the Diode LED website

**3.** Choose to drop-ship the order directly to the customer or have the products delivered to your location for pick-up

## TO OUR DEDICATED DIODE LED DEALER NETWORK:

The Diode LED website allows our Dealers to:

- **Place purchase orders online**
- **Track order shipments**
- **View special promotions**
- **View product webinars**

When a customer provides their shopping list I.D. number, you have the ability to pull up the shopping list by the I.D. number and purchase directly from the Diode LED website using the shopping cart function. The online purchase order function allows you to ship directly to your store or drop ship to the customer's address.

Access to customer shopping lists and the easy conversion to an online purchase order simplifies the quoting and purchasing process for fast and accurate fulfillment of Diode LED orders.

# The Importance of Product Safety Certifications

As a technology company, Elemental LED understands the importance of designing our products to meet the strict certification standards of Underwriters Laboratories (UL) or Intertek (ETL). The rigorous testing and certification of these NRTLs (Nationally Recognized Testing Laboratories) are accepted by OSHA (Occupational Safety & Health Administration) as accredited testing organizations and the Listed Mark will meet appropriate installation requirements outlined in section 110.3(B) of the NEC (National Electrical Code).

We go beyond these basic certifications and engineer products that are certified for a wide range of applications to assist in passing field inspections. Many of our products meet both UL and Class 2 requirements. See the chart to the right for an overview of product certifications we hold.

Underwriter Laboratories UL Listing Mark for United States and Canada. This is an updated Listing mark that has the same credentials as the standard UL Listed mark below.

Underwriters Laboratories UL Listed Mark for United States and Canada.

Underwriters Laboratories Recognized Component Mark for United States and Canada.

Intertek Laboratories ETL Listed Mark for United States and Canada.

The Conformité Européene CE mark indicates products sold in the European Economic Area (EEA) have been assessed to meet high safety, health and environmental protection requirements.

CASCADE® 2  
SUNRISE® 2

ETL Listed  
Conforms to UL Standard 508 Industrial Control Equipment

REIGN™ Dimmer Switch

UL Standard 1598 IFDR (Low Voltage Power unit)

LO-PRO® Junction Box & Driver Combo

UL Standard 1598 IFFX (Luminaire Fitting)  
UL Standard 508A (Industrial Control Panel)

LO-PRO® Junction Box

UL Listed 1310 Class 2 Power Supply

OMNIDRIVE® (Class 2 specific models)  
Standard Plug-in Adapters  
Commercial Grade Plug-In Adapters

ETL Listed  
Conforms to UL Standard 5085-1, 5085-3, 8750 and 1310 (Class 2 models only)

Magnetic Dimmable Drivers

UL Listed 8750 Drivers for LED Arrays, Modules and Controllers

Lutron® Dimmable Drivers

UL Listed 2108 Low Voltage Lighting Systems, Power Units, Luminaires and Fittings

SWITCHEX®

Find our products in the UL Sign Components Manual (SAM).

All LED Tape Light is still certified under UL 2108 when installed with **CHROMAPATH® Aluminum Channels**.

# QUALITY OF LIGHT

Without light, it would be impossible to view the world around us. Light illuminates objects for us to see and the spectrum emitted by a light source provides the color in these objects. Variants of color offers advantages for different lighting applications. The lighting industry uses several tools - Kelvin, CCT, CRI, R-values and TM-30 - to describe color characteristics and light quality.

## THE CORRELATED COLOR TEMPERATURE SCALE

The Kelvin based CCT (Correlated Color Temperature), is a scale used in lighting to measure the color temperature of a luminaire. It puts specifics to the description of the appearance of white light as “warm”, “neutral” or “cool” (CCT chart, below). The color chosen for an application may vary based on the use of the space and the material being illuminated. For example, “warmer” light is very popular in residential applications where “cool” light is more prevalent in commercial and industrial spaces. We offer a wide variety of options to meet your needs for any lighting application.

## CORRELATED COLOR TEMPERATURE (CCT) LIGHT RANGE COMPARISON CHART (MEASURED IN KELVIN)

OTHER CCT OPTIONS AVAILABLE BY SPECIAL ORDER ONLY.

## THE IMPORTANCE OF QUALITY COLOR RENDERING

Quality color rendering is an important aspect of a light source as the light will reveal colors of objects accurately in comparison with an ideal or natural light source (daylight or incandescent bulb). A source with poor color rendering may cause objects to appear dull and unsaturated (see image below) or overly saturated and unnatural. Many artificial light sources have lower CRIs that will mute colors in food, artwork and skin tones, making them appear less vibrant. We use very high CRIs, typically in the range of 80-98 CRI, to assure that colors are rendered vibrantly and true.

Color rendering properties of a light source can be evaluated with complex calculation engines. These tools compare how a set of color samples are rendered (represented) by a light source in comparison to a reference light source.

## A FAMILIAR COLOR RENDERING TOOL: CRI

The most familiar calculator is CRI (Color Rendering Index), which has been utilized to measure color rendering properties of light sources for over 50 years. CRI has been widely adopted in the lighting industry for its ease of use as it only calculates a single metric—Fidelity (Ra). Sunlight has a CRI of 100, the highest mark on the 0-100 scale. CRI is calculated using an average of 8 specific R-values representing 8 different colors within the light spectrum. The R-values measure the concentrations of 14 colors within a light source’s emitted spectrum and the ability to render individual colors. High R9, R13 and R14 values are particularly important for illuminating skin tones, decorative art and retail merchandise properly. Our products are engineered specifically to deliver high R9, R13 and R14 values to assure your installations deliver superior color rendering.

## A BRIEF LOOK INTO TM-30: THE NEXT GENERATION OF COLOR RENDERING

IES TM-30-15 is a new color rendering system that remedies flaws/limitations of CRI, providing complementary and more detailed information that benefits both specifiers and manufacturers. The much wider range of colors is a more accurate reflection of the real world – allowing you to show detailed colors for skin tones, wood grains, decorative art, furnishings, merchandising and more.

While CRI isn't going anywhere soon, it's important to familiarize yourself with the new TM-30 metrics as they will become more common in years to come.

METRIC	SCALE	DESCRIPTION
<b>Fidelity Index (Rf)</b> <b>NEW</b>	0 - 100	A measurement of fidelity comparable to CIE CRI (Ra) but averages the values of 99 color samples instead of 8. A higher value typically provides a more accurate rendition of color in comparison to a natural light source.
<b>Gamut Index (Rg)</b> <b>NEW</b>	60 - 140	Gamut (Rg) measures the average hue and saturation (chroma) shift of a light source using 99 color samples. A value of 60-99 indicates average desaturation. A value of 101-160 indicates average increased saturation.
<b>Color Vector Graphic</b> <b>NEW</b>	Visual	The Color Vector Graphic shows the relative saturation of multiple hues. It's important as it quickly conveys what types of colors are more or less saturated.
<b>Fidelity Skin (Rf,skin)</b> <b>NEW</b>	0 - 100	Fidelity Skin (Rf,skin) is an average of CES15 and CES18 skin tones. A higher value typically provides natural looking 'skin tones'.
<b>Fidelity Red (R9)</b>	0 - 100	Fidelity Red (R9) derives from a single, saturated, red color sample. A higher value is important for illuminating red surfaces, wood grains and skin tones.
<b>CIE CRI (Ra)</b>	<0 - 100	CRI (Ra) is a legacy measurement of Fidelity using 8 color samples and with an undefined lower scale. A higher value typically provides more accurate average rendition of color. Comparably, TM-30 fidelity (Rf) is a much more improved metric for accurate color rendition than CRI (Ra).

A combination of TM-30's Fidelity (Rf), Gamut (Rg) and Color Vector Graphic will help further clarify beyond the typical CRI metric how a test source compares to a reference source.

## WHERE CAN YOU FIND TM-30 DATA FOR DIODE LED PRODUCTS?

TM-30 data including the metrics above and other useful graphics are available for Diode LED's premier lines of lighting products at **www.DiodeLED.com**. Remember, not all applications require the highest quality lighting i.e. garages, warehouses and some outdoor environments. We can help you find the right light for the right application. Additionally, you can count on Diode LED to be at the forefront of understanding and implementing the latest technology to provide superior and quality products.

## CRI VS TM-30 RENDERING TOOLS

### CIE 13.3-1995 (CRI/Ra)

- Last major update was in 1976
- 8 main color samples (Ra), 6 special samples
- Measures Fidelity (Ra) only

### IES TM-30-15

- Released in 2015
- 99 color samples
- Measures Fidelity (Rf), Gamut (Rg) and includes Color Vector Graphic for detailed hues

## TM-30 COLOR CHART

TM-30 measures against 99 color samples, all used to provide Fidelity (Rf), Gamut (Rg) and Color Vector Graphics.

Visit us at [www.DiodeLED.com](http://www.DiodeLED.com) to find up-to-date technical information about our products, including information about quality of light, compatibility charts, specification sheets, photometric data, wiring diagrams, educational tutorials, videos and more.

# LINEAR LED LIGHTING

Diode LED is the premier manufacturer of tape and strip light, providing the highest-quality and largest selection of linear LED lighting solutions on the market today. Whether your project requires ambient, task or accent lighting, your environment is indoors or out, we have linear LED lighting solutions that deliver the appropriate brightness, color rendering and run length for your application. We have the perfect solution to illuminate your space.

## **A VALENT® X**

Perfectly diffused high output light for high-end commercial applications.  
(Page 25)

## **B HYDROLUME® STRIP LIGHT**

Fully submersible, UV resistant and UL Certified, this unique strip light is perfect for any outdoor and extreme environment applications.  
(Page 32)

## **C FLUID VIEW® TAPE LIGHT**

Create ambient lighting anywhere with industry leading linear runs up to 67 ft.  
(Pages 16-17)

## **D BLAZE™ TAPE LIGHT**

Our most popular tape light delivers high output light in a wide selection of color temperatures.  
(Pages 18-19)

## **E CHROMAPATH® CHANNELS**

Pair our tape light with CHROMAPATH Channels to create tailored fixtures.

## CLICKTIGHT® PRO Connectors

### TAPE LIGHT COMPATIBILITY:

- AVENUE 24™ LED Tape Light
- BLAZE™ LED Tape Light
- FLUID VIEW® LED Tape Light
- ULTRA BLAZE™ LED Tape Light
- VALENT® LED Tape Light

### CLICKTIGHT PRO Tape-to-Tape Connector

Patent pending connectors used to attach identical LED tape light types resulting in a continuous linear run.

- Comes in a pack of 5
- Includes 10 tape light fasteners and 20 screws

### CLICKTIGHT PRO Tape-to-Wire Connector

Connect Diode LED tape light to your custom length of wire via spade connection (24AWG – 18AWG). Ideal for use as a low voltage power feed or as a bending extension to jump corners and obstacles.

- Comes in a pack of 10 with 25 spade connectors
- 10 wire fasteners with 10 nails

## TAPEGUARD® LED Tape Light Cover

### TAPE LIGHT COMPATIBILITY:

AVENUE 24™  
FLUID VIEW®  
BLAZE™  
VALENT®  
DAZZLE 24® RGB  
DAZZLE 24® RGBW

The TAPEGUARD LED Tape Light Cover is the easiest way to provide protection for indoor LED lighting installations. TAPEGUARD covers and protects tape light from dust, grease and dirt and creates a surface that can be easily wiped clean. Choose a clear cover for maximum light output or a frosted cover for subtle light diffusion.

SKU (Single unit)	BUNDLE SKU (Pack of 10)	TYPE
DI-TAPE-GRD-FR	DI-TAPE-GRD-FR-10	Frosted Cover
DI-TAPE-GRD-CL	DI-TAPE-GRD-CL-10	Clear Cover

## Tape Light Fastener

Tape Light Fasteners help keep LED tape light organized and secure while supporting connections. Screws are included.

SKU	BUNDLE OPTIONS
DI-WM-TF	Pack of 10

# CLICKTIGHT® Single Color Tape Light Connectors

CLICKTIGHT Connectors are an easy way to install your standard single color LED tape light out in the field. Enhancements have been made to the 8mm and 10mm CLICKTIGHT connectors to make it even easier and faster to complete your installation.

## New LED window to 8mm CLICKTIGHT Connectors

(Applies to BLAZE™, FLUID VIEW® and AVENUE 24™)

Enhancements include a unique LED window to allow the LED tape light to be applied deeper into the connector, solving cut point limitations found on tighter density tape light such as 12V and 24V BLAZE. No longer will you have to remember special cutting instructions or lose any unused LED tape segments.

New LED chip window for better connections  
BLAZE, FLUID VIEW & AVENUE 24

## New UL Listed 2464 Wire

Enhancements to both 8mm and 10mm CLICKTIGHT Connectors include the UL Listed 2464 lead wire to ensure installations meet UL and NEC code compliance.

For a limited time, the previous version CLICKTIGHT Connectors will be available with limited inventory. Please reference the Diode LED Price Guide and website for details on product SKU and availability.

**Connector Note:** Class 2 maximum load limit on all CLICKTIGHT tape light connectors.

**60W on 12V circuits**

**96W on 24V circuits**

# INFINILINE®

Our INFINILINE 120V LED Strip Light excels at large scale applications with a complete plug-in installation for continuous indoor/outdoor LED lighting. Designed and built to provide high output lighting and long distance linear performance, INFINILINE is a direct-connect to 120V LED light source, simply put - there is no need for a driver. This unique plug-and-go lighting solution works well with any architectural or landscape project as installation is cost-effective and hassle free.

## DIRECT-CONNECT TO FREEDOM

- **NO DRIVER REQUIRED**  
INFINILINE plugs into a standard 120VAC receptacle
- **IP44 RATED**  
Great for indoor and outdoor environments
- **FACTORY FINISHED**  
In-stock, made-to-order and ships in 5-7 business days
- **LONG RUNS**  
Continuous light up to 164 feet

## APPLICATIONS

- Architectural affects
- Landscaping
- Long corridors and coves
- Indoor/outdoor pathways
- Stairways
- Patio and decks

## CONNECTION TYPE

Each factory finished order of INFINILINE features a standard 120VAC electrical connection.

UP TO 164 FT  
OF LIGHTING

## QUICK SPECS

Voltage	120VAC
Max. Run	164 ft.
Environment	Indoor / outdoor

# HYDROLUME®

## LED Lighting for All Environments

### POPULAR APPLICATIONS

- Indoor/outdoor accent lighting
- Steps, paths and driveways
- Decks, gardens and trellises
- Coastlines, marine areas and docks
- Pools, fountains and water features
- Garages and woodworking workshops

The patent pending HYDROLUME is the only flexible submersible strip light that is UL Listed to Standards UL 676 and UL 2108 in accordance with the following Articles of the National Electrical Code® (NEC):

**Article 680** Swimming Pools, Fountains and Similar Installations

**Article 682** Natural and Artificially Made Bodies of Water

**Article 411** Lighting Systems Operating at 30 Volts or Less and Lighting Equipment Connected to Class-2 Power Sources

HYDROLUME is certified under UL 676 - Underwater Luminaires. This certification conforms to Article 680 of the National Electrical Code for installation in Swimming Pools and Spas when installed with the Mounting Channel (DI-HL-MTCH) on the next page. It also conforms to Article 682 of the NEC for installation in Fountains.

### HYDROLUME 24V LED Strip Light

Dimmable	Yes
Max. Run	(H) 81.5 ft.   (HP) 32.6 ft.
Field Cuttable	Non-Cuttable
Environment	IP68
Certification	UL Listed 676 & 2108

Visit the product page on the website for specification sheets, install guides, IES files and photometric reports.

Contact Diode LED Customer Service for buying options or speak to your dealer.

Fully submersible in pools and fountains.

Resistant to high heat and extreme sun exposure.

#### UV-RESISTANT

No degradation or discoloration in direct sunlight

#### SALTWATER-RESISTANT

Increased longevity in coastal and marine environments

#### CHLORINE & POOL SAFE

Enhanced performance in treated water

#### SUBMERSIBLE

Waterproof, fully submersible and weather resistant

#### LOW VOLTAGE

Minimal heat and greater safety

#### CUSTOMIZABLE

On-demand lengths are manufactured in-house

## HYDROLUME Accessories

### HYDROLUME Mounting Bracket

**SKU: DI-HL-MTBR**

This bracket mounts to surfaces with a single screw. HYDROLUME is then snapped into place. Packs of ten.

### HYDROLUME Stake Bracket

**SKU: DI-HL-STBR**

This bracket raises the strip light so that it's clear of low foliage, dirt and surface obstructions. Packs of four.

### HYDROLUME Mounting Channel\*

**SKU: DI-HL-MTCH**

These 39.4 in. (1 meter) mounting channels are easily trimmed to custom lengths. Packs of two.

\*HYDROLUME Mounting Channel Brackets DI-HL-MTCH are required for use in Pools, Spas, and Fountain applications.

**MANUFACTURED AND SHIPPED  
IN 5-7 BUSINESS DAYS.**

We factory-finish HYDROLUME in our California based Operations Center.

# TAILORED FIXTURES

## HOW IT WORKS

- 1 Specify your lighting requirements for brightness, color and dimensions.
- 2 Choose the linear LED tape light that is best for your application.
- 3 Select the CHROMAPATH channel form factor that is optimal for your project.
- 4 Talk to a representative about connections and installation.

You now have a custom lighting solution that is made to your specifications and ready to install.

## CHROMAPATH<sup>®</sup> ALUMINUM CHANNELS

---

Our patented CHROMAPATH Channels are a must have accessory for your stylish, efficient and high-impact linear lighting design. These channels not only provide light diffusion to enhance any space, but also protect indoor LED tape light from dust and other elements.

### **A** NEW COLOR OPTIONS

Introducing new satin black and glossy white options along side the familiar brushed aluminum finish. (Pages 40-43)

### **B** STYLE YOUR WAY

Take advantage of Diode LED's vast tape light portfolio to create your own fixture with amazing impact. (Pages 45-49)

### **C** PREMIUM DIFFUSION

High quality lighting without the hot spots or dots thanks to our Premium Diffusion Channel Covers. (Pages 40-42)

### **D** HANGING FIXTURES

Design hanging fixtures in ways never seen before. (Page 43 & 46)

# CHROMAPATH® BUILDER CHANNELS

ASSEMBLE YOUR FIXTURE THE WAY YOU WANT

- FEATURES & BENEFITS**
- Industrial extrusions for custom lighting
  - In-house and field cuttable channels to work with individual specifications
  - Channels act as a heat sink, cooling and prolonging the LED tape light lifespan
  - Provides additional defense from dust and debris, protecting your LED investment

## ABOUT RGBW LIGHTING

The alternating white light and color-changing chips work together to broaden the spectrum of light. While red, green and blue light mix your standard colors, white light maximizes general brightness and adds the ability to generate pastels. Expand your color range with RGBW.

CONTROL RECEIVER

## FEATURES & BENEFITS

- Compact and easy to use
- Includes one receiver and one (RF) remote
- Ideal for small scale applications
- Single zone function
- Works with RGB & RGBW LED lighting
- 10 pre-loaded dynamic control settings

SKU	TYPE
DI-ATT-RGBW-REM	ATTRIBUTE RGB(W) Receiver and Remote Controller

# WHY USE DMX?

- Diode LED custom offerings
- UL recognized technology
- Fully customized lighting
- Commercial-scale applications
- Control multiple zones or rooms
- Digital control system
- Infinitely expandable
- Long distance runs

## CONTROL

Our DMX controllers offer a wide range of options from pre-programmed control to fully customized scenes and functions. Control lighting from a wall-mount or surface mount touch-pad, WiFi control from a mobile device or a free-standing DMX controller. Control a single zone or up to 10 zones independently from a single controller to create lighting effects in separate rooms, spaces within a room or multiple fixtures producing independent lighting effects.

## CONNECT

Directly connect DMX Controllers to any of our LED tape light via a DMX decoder supporting DMX512 for master control of simple lighting changes across all lighting with fully customized scenes.

## EXPAND

Our selection of DMX accessories expand the number of luminaires or zones on a single controller. Span distances of up to 1,000 feet wirelessly between DMX devices using our Wireless DMX Transmitter/Receivers or DMX Extension Cables for direct connectivity.

## DMX LED Controller Models

DMX accessories can be found online at [www.DiodeLED.com](http://www.DiodeLED.com)

### DMX Wall Mount Controller

DMX wall mount color control systems provide professional-level control of color-changing RGB and RGBW LED lighting in one or multiple independent areas.

SKU	WIFI	DIMENSIONS
DI-DMX-WIFI-WMUS-3Z-WH	Built-in	4.72 x 2.95 x 1.15 in.

### FEATURES & BENEFITS

- iOS & Android compatible
- Up to 3 zones
- Fits in a single gang box

### Nicolaudio® STICK-KE1 DMX LED Controller

The sleek, touch-sensitive keypad lets you select color-changing mode, speed and dimming and can store up to 200 custom lighting scenes across 5 separate zones.

SKU	WIFI	DIMENSIONS
DI-DMX-ST1	Router required	6.61 x 5.03 x 0.50 in.

### FEATURES & BENEFITS

- Software programmable
- Fits in a single gang box
- iOS and Android compatible

### Nicolaudio® STICK-GA2 DMX LED Controller

The sleek, attractive, touch-sensitive surface lets you control and dim color-changing lights, as well as dim single color LED lights.

SKU	WIFI	DIMENSIONS
DI-DMX-GA2	Not Available	4.43 x 3.38 x 0.39 in.

### FEATURES & BENEFITS

- Digital display
- Touch-sensitive pad
- Fits in a single gang box

### Nicolaudio® STICK-DE3 DMX LED Controller

Our most robust DMX controller, the STICK-DE3 can store up to 500 scenes across 10 separate zones and features a full-color display for operational and zone related information.

SKU	WIFI	DIMENSIONS
DI-DMX-DE3	Router required	5.7 x 4.17 x 0.43 in.

### FEATURES & BENEFITS

- iOS & Android compatible
- Software programmable
- Calendar function

### Nicolaudio® SLESA-U9 DMX LED Color Controller

This LED controller is ideal for taking your light show on the road. Quick connections make this the perfect controller in multiple venues or isolated locations.

SKU	WIFI	DIMENSIONS
DI-DMX-ESA	Not Available	3.11 x 2.95 x 1.70 in.

### FEATURES & BENEFITS

- Light shows on-the-go
- Free-standing & compact
- Built-in memory

# LED FIXTURE LIGHTING

Diode LED Fixtures are engineered for style, performance and ease of installation. High light output and quality but compact in design with a modern approach, these LED fixtures are desirable for any commercial or residential project.

## **A FENCER® SABER™ FIXTURE**

High quality task lighting with total light diffusion eliminates spotting and dark shadows.  
(Page 66)

## **B TRIANT® LED PUCK LIGHT**

This versatile puck light is a bright and dependable fixture for task and shelving applications.  
(Page 72)

## **C WET LOCATION FIXTURES**

Diode LED offers diverse options for your wet location lighting needs.  
(Pages 74-75)

## **D SPOTMOD® GIMBAL LIGHT**

Adjustable and recessable, this compact fixture is perfect for a low profile spot of light where you need it.  
(Page 75)

## **E SPOTMOD® LINK FIXTURE**

Small, bright and available in multiple finishes; this stylish fixture can be connected in series and offers superior light quality and output.  
(Pages 64-65)

# SPOTMOD® LINK LED Fixture

## FEATURES & BENEFITS

- High color rendering 90+ CRI
- Single LED source
- Plug-and-play installation
- Low operating temperature
- Daisy-chain up to 7 fixtures
- SWITCHEX® compatible

## QUICK SPECS

Voltage	12VDC
CRI	90+*
Power Consumption	3.6W
Dimmable	Yes
Certification	UL Listed 2108

DI-SPOT-SP50-15-BA	15°	5000K	163	66
DI-SPOT-SP50-45-BA	45°	5000K	167	66

### FEATURES & BENEFITS

- 15° and 45° beam angle options
- Compact and sturdy aluminum housing
- Suitable for indoor and outdoor applications
- Low wattage and heat

### QUICK SPECS

**Voltage** 12VDC

**Wattage per Fixture** 2.13W / 176mA

**Dimmable** Yes

**Environment** Outdoor/Indoor

**Finish** Brushed Aluminum

**Dimensions** 1.56 x 1.56 x 1.1 in.

**Certification** ETL Listed 2108

Visit the product page on the website for specification sheets, install guides and photometric reports.

## Wet Location LED Fixture Accessories

**Connector Note:** Class 2 maximum load limit on all CLICKTIGHT tape light connectors.

**60W on 12V circuits**

**96W on 24V circuits**

### Wet Location Splice Connector Pair

One pair is included with strip light. Connector pair includes both male and female connectors.

Dimensions: 4.5 x 0.3 in.

SKU	BUNDLE
DI-0725-5	5 Pairs
DI-0725-25	25 Pairs

For use with the following fixtures only:

**CASCADE® 2**

**SUNRISE® 2**

**SPOTMOD® Gimbal Wet location**

**SPOTMOD® Wet location**

### FEATURES & BENEFITS

- Wet or dry environments
- Durable and flexible

### Wet Location Male to Female Extension Cables

Creates an extension between wet location light connectors.

Dimensions: 0.3 in. (width)

# SIGN & DISPLAY LIGHTING

Diode LED offers a wide breadth of commercial lighting for retail, display and sign lighting. Explore the multitude of possibilities with our high-impact LED lighting solutions from Diode LED.

## **A** LIGHT GUIDE PANELS

High-performance and sized to your project specifications, make a statement with backlit graphics or as an ambient fixture.  
(Page 86)

## **B** PURALIGHT® 2 LED MODULE

Compact and bright, these modules illuminate your display in dry and wet environments.  
(Page 82)

## **C** SPECIFORM® RETAIL

Customize your linear lighting needs by size or output.  
(Page 80)

## **D** SPECIFORM® COMMERCIAL

The ultimate solution for mass-production and large-scale lighting solutions.  
(Page 82)

## **E** EQUIFLUX® LED DISPLAY GRAPHICS LIGHT

Make a statement using your fabric panel display with the brightest and best graphics display light.  
(Page 84)

# SPECIFORM<sup>®</sup>

Mass Production for Easy Installation

## MAKE THE LIGHT FIT YOUR PROJECT. NOT THE OTHER WAY AROUND.

The ultimate solution for mass production of large-scale, commercial and residential LED linear lighting projects. SPECIFORM is perfect for those that have big plans and need lighting that is ready to install. Name your specs and we will deliver a modular, semi rigid, quick and easy to install, lighting solution that's made just for the job.

### MADE-TO-ORDER LED LIGHTING:

- Connect from 4 inch to 4 foot lengths
- Link up to 16 feet of linear light sections
- Wide selection of color temperatures
- Choose your brightness
- 12VDC or 24VDC
- Multiple mounting options
- Quick turnaround

Specify your exact lighting requirements for unique lighting projects.

Perfect solution for large scale rollout.

## SPECIFORM IS PERFECT FOR:

- Retail and display
- Casinos
- Offices
- Residential builders
- Hotel and hospitality
- Restaurants and bars
- Hospitals

## YOUR SPECS (customized by you)

**Voltage** 12VDC or 24VDC

**CRI Range** 80-90+

**Lumens** Custom

**Wire Quick Connects** Optional

**Certification** UL Listed 2108

Visit the product page on the website for specification sheets, install guides and photometric reports.

# PURALIGHT® 2 LED Light Modules

The PURALIGHT 2 LED Light Modules come in multi-unit strands of water-resistant, durable modules that are ready to perform in all environments. Easy to install, compact, resilient and high performing with an 80+ CRI output, these light modules are perfect for backlit or channel letter signage, halo illumination and architectural accents. The support of our Customer Service Team along with an IP65 rating promote peace of mind for an installation that will stand the test of time.

## FEATURES & BENEFITS

- Wide beam angle eliminates hot spots
- 80+ CRI\*: Superior color rendering
- IP65 (Indoor/Outdoor)
- Adhesive backing
- Cuttable between modules

## QUICK SPECS

# EQUIFLUX® LED Display Graphics Light

The EQUIFLUX® 1055 LED Display Graphics Lighting System is a high-powered LED linear light mounted on rigid metal printed circuit board (PCB) that provides bright, even lighting for retail and trade show display graphics. The optical LEDs are specifically designed to produce uniform illumination without hot spots or shadows with up to 4 feet of light throw. The bright, evenly distributed light renders whites cleanly and colors vividly. Our EQUIFLUX LED Display Graphics Lighting System was specifically designed and engineered by Elemental LED to provide the highest quality center illumination for display graphics with all the inherent benefits of LED technology.

The optical lens directs the light in an intersecting parallel beam, creating a column of consistent illumination. Each LED is covered by a 10° x 55° degree optical lens that creates an elliptical light throw that optimizes the lumen output. The 10 degree beam angle focuses the vertical light output to provide light within a narrow framework, while the 55 degree beam angle maximizes the spread for overall side-to-side coverage. The result is an ultra-bright, uniform distribution of light with no hot spots or shadows, ideally suited for narrow display frameworks. The lightweight light bar mounts directly to extruded aluminum framing systems and other narrow metal display frame systems using the included slot-mounted compression screws.

## FEATURES & BENEFITS

- Even and consistent light distribution
- Optically refined reflective patterns
- High-impact light
- Linkable up to 9 ft.

## QUICK SPECS

<b>Voltage</b>	24VDC
<b>Light Beam Angle</b>	10° x 55°

## Light Guide Panels for Display & General Illumination

The best option for even light diffusion across a display or backlit graphic image is now ready to order, with the LED Light Guide Panel by Diode LED. We customize the LED Panel based on your specifications and on the dimensions of the graphic. Using a unique dot pattern on each customized panel, these light guide panels deliver even light distribution previously unavailable on a thin form factor.

### MADE-TO-ORDER FOR EVERY PROJECT

No matter the size of the project, you get the best combination of panel tiling with your desired brightness, color temperature and thickness. We also offer custom framing to secure and protect your new, ideal light panel. We work with you to achieve the best performance from your light panel for backlit display or accent lighting.

#### FEATURES & BENEFITS

- Low-profile form factor
- Even and consistent light distribution
- Customized dimensions

# SWITCHEX<sup>®</sup>

## Driver + Dimmer Switch

The patent pending SWITCHEX combines an LED dimmer switch and LED power supply into a single integrated unit. The SWITCHEX Driver + Dimmer Switch accepts 120VAC and converts it to low voltage DC, all within a standard electrical box. With power options up to 100W, it is a true revolutionary step forward for power and control of LED lighting.

SEE MODEL OPTIONS ON PAGE 108 OR LEARN MORE ABOUT SWITCHEX ON THE WEBSITE...

[www.DiodeLED.com/switchex](http://www.DiodeLED.com/switchex)

## WINNER OF THE ARCHITECTURAL SSL PRODUCT INNOVATION AWARD

*Fits in standard electrical boxes.*

### FEATURES & BENEFITS

- Simplifies your LED installation
- Eliminates compatibility issues between drivers and switches
- Superior LED dimming performance (100% – 5%)
- Preset dimmer with on/off switch
- Interchangeable faceplate colors included

### QUICK SPECS

Environment	Indoor
Input Voltage	120VAC
Output Voltage	12VDC & 24VDC models

Mounting	Standard electrical box
Certifications	UL Listed 2108

# REIGN® Wall Mount LED Dimmer Switch

REIGN Wall Mount LED Dimmer Switches are the stylish companion for Constant Voltage Drivers to provide smooth dimming range, from 100% – 1%, with no flickering, humming or dead-travel. They fit right into a standard electrical box for easy installation.

## TOUCH DIMMER:

Featuring a touch-sensitive surface with fade-on/fade-off illumination and power memory.

## BUTTON SLIDE:

Intuitive and compact slider with an on/off button switch with fade-on/fade-off illumination

## FULL SLIDE

A sturdy, easy-to-grip slider with an on/off toggle switch.

## FEATURES & BENEFITS

- 12V-24V PWM Dimmers
- Choice of 2 finishes
- 100W limit
- Easy upgrade from a single on/off switch

## QUICK SPECS

Environment	Indoor
Voltage	12VDC & 24VDC

## 12V-24VDC Inline Switches & Dimmers

Choose from any of these dimmers and switches for use with our low-voltage LED lighting and Constant Voltage Driver or Plug-In Adapter for simple to complex control over your lighting application.

Consult the product page at [www.DiodeLED.com](http://www.DiodeLED.com) to find complete installation guides and specification sheets.

### Inline LED Dimmer Switch

This easy-to-use LED Dimmer Switch allows you to adjust the brightness of LED lights with a classic rotary knob without any troublesome flickering.

SKU	WORKING VOLTAGE	MAX. LOAD	COLOR
DI-0715	12-24VDC	12V: 24W max. 24V: 48W max.	White
DI-0715-B	12-24VDC		Black
DI-INLINE-DS-5A-W	12-24VDC	12V: 60W max. 24V: 100W max.	White
DI-INLINE-DS-5A-B	12-24VDC		Black

### FEATURES & BENEFITS

- Good for small installations
- White or Black
- 12V and 24V compatible
- Use with Constant Voltage Drivers and Plug-In Adapters

### Inline On/Off Led Switch

The Inline On/Off LED Switch uses a simple on/off toggle to control power flow between power and fixture.

SKU	WORKING VOLTAGE	MAX. LOAD	COLOR
DI-0714	12-24VDC	12V: 24W max. 24V: 48W max.	White

## In-Wall Rated Two Conductor Wire

Hide the wires behind the wall for a discrete installation. The In-Wall Rated Wire is the best option for this low-voltage lighting configuration and is perfect for large or small remodels and upgrades. This Class 2 wire conforms to National Electrical Code (NEC) safety standards for in-wall lighting installation and comes in 16 AWG and 18 AWG (American Wire Gauge).

### FEATURES & BENEFITS

- UL Listed Class 2 wire
- Rated for use in-wall installations
- High purity, oxygen-free copper
- Durable outer jacket insulation

SKU	NUMBER OF CONDUCTORS	GAUGE	LENGTH
DI-0824-F	2 Conductors	18 AWG	1 ft.
DI-0824-S	2 Conductors	18 AWG	250 ft. spool
DI-0825-F	2 Conductors	16 AWG	1 ft.
DI-0825-S	2 Conductors	16 AWG	250 ft. spool

## Multi-Conductor Wire

Multi-Conductor Wire offers the flexibility to accommodate large LED linear lighting installations. This stranded wire is available in several gauges and your choice of number of conductors to match the LED lighting type in your installation.

### FEATURES & BENEFITS

- UL 2464 AWM copper stranded wire
- PVC jacketing is molded to the internal wiring for durability and safety
- This PVC jacketed wiring is highly flexible for ease of installation
- All internal wires are color coded to easily differentiate specific wires during installation

WHITE JACKET	BLACK JACKET	NUMBER OF CONDUCTORS	WIRE GAUGE	LENGTH

# Voltage Drop

## WHAT IS VOLTAGE DROP?

Voltage drop is defined as the amount of voltage loss that occurs through all or part of a circuit. Wires and electrical components carrying current have resistance to current flow, causing voltage drop.

It's important to consider voltage drop when specifying an LED array system (ex. LED tape light, modules, etc.) as the

LED driver (power supply) is generally installed in a remote location aside from the luminaire. This requires specifying the proper wire gauge (AWG) or thickness of wire to allow current to flow properly through varying distances from the LED driver to luminaire. Specifying the incorrect wire gauge can lead to a variety of problems including perceived flicker and shift in brightness across long runs of LED tape light.

### Example: 12V Voltage Drop & Wire Length Distance Chart

WIRE GAUGE	10 W .83 A	20 W 1.7 A	30 W 2.5 A	40 W 3.3 A	50 W 2.1 A	60 W 4.2 A
18 AWG	34 ft.	17 ft.	11 ft.	8 ft.	6 ft.	5 ft.
16 AWG	54 ft.	27 ft.	18 ft.	13 ft.	10 ft.	9 ft.
14 AWG	86 ft.	43 ft.	29 ft.	21 ft.	17 ft.	14 ft.
12 AWG	134 ft.	68 ft.	45 ft.	34 ft.	27 ft.	22 ft.
10 AWG	199 ft.	99 ft.	66 ft.	49 ft.	39 ft.	33 ft.

①

Determine Total Load: A 16.4 ft. spool of BLAZE is 47.2 watts. Round up to the nearest load of 50 watts.

②

Determine Distance from LED Driver to Load: Let's assume the distance is 25 ft. Round up to nearest distance of 27 ft.

③

It's recommended to install 12 AWG wire between the driver and luminaire to eliminate excess voltage drop.

### 12V Voltage Drop & Wire Length Distance Chart (3% Drop or 11.64V)\*

WIRE GAUGE	10 W .83 A	20 W 1.7 A	30 W 2.5 A	40 W 3.3 A	50 W 2.1 A	60 W 4.2 A
18 AWG	34 ft.	17 ft.	11 ft.	8 ft.	6 ft.	5 ft.
16 AWG	54 ft.	27 ft.	18 ft.	13 ft.	10 ft.	9 ft.
14 AWG	86 ft.	43 ft.	29 ft.	21 ft.	17 ft.	14 ft.
12 AWG	134 ft.	68 ft.	45 ft.	34 ft.	27 ft.	22 ft.
10 AWG	199 ft.	99 ft.	66 ft.	49 ft.	39 ft.	33 ft.

\*These tables provide general guidelines for determining wire gauge based on total load and distance from led driver to beginning of luminaire. For more accurate wire gauge recommendations for our most popular products, please visit [www.DiodeLED.com](http://www.DiodeLED.com) and click on 'Technical Documents' under the 'Resources' tab.

### 24V Voltage Drop & Wire Length Distance Chart (3% Drop or 23.28V)\*

WIRE GAUGE	10 W .42 A	20 W .83 A	30 W 1.3 A	40 W 1.7 A	50 W 2.1 A	60 W 2.5 A	70 W 2.9 A	80 W 3.3 A	100 W 4.2 A
18 AWG	134 ft.	68 ft.	45 ft.	33 ft.	27 ft.	22 ft.	19 ft.	17 ft.	14 ft.

## Junction Boxes

Junction boxes (wire boxes) allow for safe wire connections and are ideal for installations that will be inspected for electrical codes requiring two conductor connections within an enclosure. Refer to the NEC and local electrical codes for requirements.

### Mini Terminal Junction Box

The Mini Terminal Junction Box is a safe and easy way to splice wiring in a lighting application and features a slim design for low profile LED installations. This junction box is rated for high and low voltage electrical connections up to 450V, but is not rated for in-wall use.

SKU	MAX. LOAD	DIMENSIONS
DI-0841	24 Amps	1.87 x 1 x 0.75 in.

### FEATURES & BENEFITS

- Reinforced protected terminal block
- For use with solid or stranded wire
- Screw type connection
- Surface mount installation

### Commercial-Grade Mini Junction Boxes

Both models offers these safety features and benefits:

- Input terminal accepts 20 – 18 AWG cable
- Output terminal accepts 20 – 14 AWG cable
- Max Voltage Rating: 300VAC
- Max Amperage Rating: 10A

SKU	ENVIRONMENT	DIMENSIONS
DI-JBOX-IND	Indoor	2.6 x 1.4 x 0.9 in.
DI-JBOX-OUT	Outdoor	4.8 x 1.8 x 1.1 in.

### FEATURES & BENEFITS

- Commercial-grade insulated plastic
- Indoor and outdoor models
- Compact and easy to use
- Includes 3-wire push-in terminal block connector

## MEAN WELL® Junction Boxes

The MEAN WELL® Junction Box is NEMA 1 rated, with a silver finish with 1/2 inch NPT knockouts and features an easy access cover panel. Intended for contractor installations.

### FEATURES & BENEFITS

- NEMA 1 steel enclosure
- ETL Listed
- Ground terminal connection

This junction box is for use with the following Constant Voltage Drivers only:

- 12V 150 Watt (DI-0908)
- 12V 200 Watt (DI-0909)
- 24V 200 Watt (DI-0957)

SKU	ENVIRONMENT	DIMENSIONS
DI-0940	Indoor	15.5 x 6.5 x 2.6 in.

## LO-PRO® Junction Box (ETL Cert.)

The LO-PRO Junction Box is a low profile, rugged steel enclosure designed for use with our Constant Voltage Drivers. This junction box is a NEMA 1 rated indoor enclosure made of lightweight, but strong steel with a protective black powder-coated finish.

Designed for strict code and safety compliance, this junction box is ETL Listed and features separation for low-voltage and high-voltage wiring in an electrical enclosure. It features four 0.20 inch mounting holes for surface mounting and is designed with mounting hole positions to hold compatible power supplies securely.

### FEATURES & BENEFITS

- ETL Listed
- Powder-coated steel for durability
- Low-profile and lightweight

The LO-PRO Junction Box is intended for use with these Constant Voltage Drivers located on pages 120 - 123 :

- 12V 20 Watt (DI-0904)
- 12V 35 Watt (DI-0918)
- 12V 60 Watt (DI-0906)
- 24V 35 Watt (DI-0970)

SKU	MAX. VOLTAGE	ENVIRONMENT	DIMENSIONS
DI-0980	250VAC	Indoor	7.7 x 4.9 x 1.8 in.

## LO-PRO® Junction Box (UL Cert.)

An industry first, this patent pending UL Listed electrical enclosure meets electrical code requirements and cost saving measures with easy installation of LED power supplies in a wide range of environments. The truly amazing benefit of this enclosure is the UL Listed junction box and driver combination with select LED power supplies when ordering the UL DRIVER OPTION.

### UL LISTED DRIVER OPTION

For details about the LO-PRO JUNCTION BOX & DRIVER COMBO OPTION, turn to the LED Power Supplies section of the catalog on page 102.

LO-PRO Junction Box - Small

SKU	DESCRIPTION	ENVIRONMENT	DIMENSIONS

Diode LED

Receive a UL Listed driver when you order the **LO-PRO JUNCTION BOX & DRIVER COMBO** on select power supplies.

Diode LED designed the patent pending LO-PRO® Junction Box Series— a unique, multipurpose electrical enclosure— to meet electrical code requirements as well as cost saving measures with easy installation of LED power supplies in a wide range of environments. The truly amazing benefit of this enclosure is the UL Listed Driver from select LED power supplies available from Diode LED.

Diode LED recognized a tremendous demand for a solution that enabled contractors to provide an electrical box that not only secured a power supply, but also certifies the power supply as UL Listed when ordered with the UL Listed electrical box. It's the ultimate solution for commercial projects requiring products with the highest certification to meet strict inspections.

## MULTIPLE UL CERTIFICATIONS

### UL 1598 (UL# E469769) LED LOW VOLTAGE POWER UNIT

Certified as a listed LED low voltage power unit. Optional - only applies when purchased as a driver & j-box combo. See ordering options. A UL E469769 sticker will be placed on the outside of the LO-PRO box certifying the product as an LED low voltage power unit.

### UL 508A (UL# E486215) INDUSTRIAL CONTROL PANEL

Type 1 enclosure - indoor. Can be used as a standard j-box for any component. This certification always applies to the LO-PRO box.

### UL 1598 (UL# E485321) LUMINAIRE FITTING

Certified for field installation with Class 2 LED driver models and lighting systems outlined on the next page. This certification always applies to the LO-PRO box.

## QUICK SPECS

<b>Environment</b>	Indoor/Outdoor
<b>Knockouts</b>	8x 0.75 in. knockouts
<b>Material</b>	Powder-coated stainless steel
<b>Certification</b>	UL Listed 1598, 508A & 1598

### Stainless Steel Construction

Durable, powder-coated and corrosion-resistant.

### Modular Mounting

Intuitive mounting design makes installation easy for a variety of power supplies, controls and electrical equipment.

### Three-Sided Ventilation

Ventilation holes keep out dust while allowing heat to easily escape.

### 8x Knockouts

Connection to conduit entry is easy with eight (8) knockout options, fitting 0.75 in. strain reliefs.

### Available In 2 Sizes

LO-PRO Box is available in two (2) sizes to fit small or large power supplies and other electrical equipment.

**The new LO-PRO Junction Box makes it even easier to work with America's largest provider of low-voltage linear lighting solutions.**

## CHOOSING AN APPROPRIATE DRIVER TYPE

LED Drivers convert 120/240/277V AC power into low-voltage 12V DC or 24V DC power. The first step in choosing the correct LED driver is to determine the location of the installation and the dimming compatibility requirements. The following chart will help determine the recommended driver type.

INSTALLATION	DIMMING OR LIGHTING CONTROL METHOD	RECOMMENDED DRIVER TYPE
Permanent	Wall mounted Driver and Dimmer	SWITCHEX® LED Driver + Dimmer
	On/off switches, REIGN™ Dimmers and RGB/DMX controls	Constant Voltage LED Driver
	TRIAC forward phase MLV (Magnetic Low Voltage) dimmers	OMNIDRIVE® Series Drivers
	ELV (Electronic Low Voltage) dimmers	OMNIDRIVE® Series Drivers
	Compact fluorescent/LED (CFL/LED)	OMNIDRIVE® Series Drivers
	0-10V dimming control systems	0-10V Dimmable Driver
	Incandescent/halogen (INC/HAL)	OMNIDRIVE® Series Drivers
	Lutron® Electronics-specific dimmers and control systems	Hard-Wired Magnetic Dimmable Driver Lutron® Hi-Lume® A-Series Dimmable Driver
Temporary	Other control or home automation systems	Contact Customer Support for options
	Inline switches, dimmers and RGB/DMX controls	Plug-In LED Adapter (LED Driver)

- END COMPARISON CHART-

## SWITCHEX® Driver + Dimmer Switch

The patent pending SWITCHEX combines an LED dimmer switch and LED power supply into a single integrated unit. The SWITCHEX Dimmer + Driver accepts 120 VAC and converts it to low voltage DC, all within a standard electrical box. With power options up to 100W, it is a true revolutionary step forward for power and control of LED applications.

*Fits in standard electrical boxes.*

### FEATURES & BENEFITS

- Simplifies your LED installation
- Eliminates compatibility issues between drivers and switches
- Superior LED dimming performance (100% – 5%)
- Preset dimmer with on/off switch

## OMNIDRIVE® Electronic Dimmable Drivers

OMNIDRIVE Electronic Dimmable Drivers are our best-selling dimmable power supplies. They offer superior dimming performance for the widest range of dimming switches. The built-in electronic filter eliminates flicker and provides the smoothest dimming from 100% down to 10%. They offer superior dimming performance when paired with: TRIAC dimmer controls, magnetic low voltage (MLV), electronic low voltage (ELV) and incandescent/halogen dimmer switches, as well as 3/4/5-way and on/off switching.

### COMPATIBILITY NOTE

This driver is NOT COMPATIBLE with Pulse Width Modulation (PWM) dimmers such as our REIGN® Wall Mount LED Dimmer Switches or Inline LED Dimmer Switches. Visit [www.DiodeLED.com](http://www.DiodeLED.com) for a full compatibility guide.

## OMNIDRIVE® 2 Electronic Dimmable Drivers

OMNIDRIVE 2 Electronic Dimmable Driver is the next generation of our best selling OMNIDRIVE. This newly enhanced driver features a 0% minimum wattage load and provides a greater dimming range. Just like the previous version, it offers superior dimming performance when paired with: TRIAC dimmer controls, magnetic low voltage (MLV), electronic low voltage (ELV) and incandescent/halogen dimmer switches, as well as 3/4/5-way and on/off switching.

### COMPATIBILITY NOTE

This driver is NOT COMPATIBLE with Pulse Width Modulation (PWM) dimmers such as our REIGN® Wall Mount LED Dimmer Switches or Inline LED Dimmer Switches. Visit [www.DiodeLED.com](http://www.DiodeLED.com) for a full compatibility guide.

### LOOKING FOR DRIVER ACCESSORIES?

Use the guide below to find your choice of accessories like junction boxes and wire.

WIRE & CONNECTORS – Page 94

### FEATURES & BENEFITS

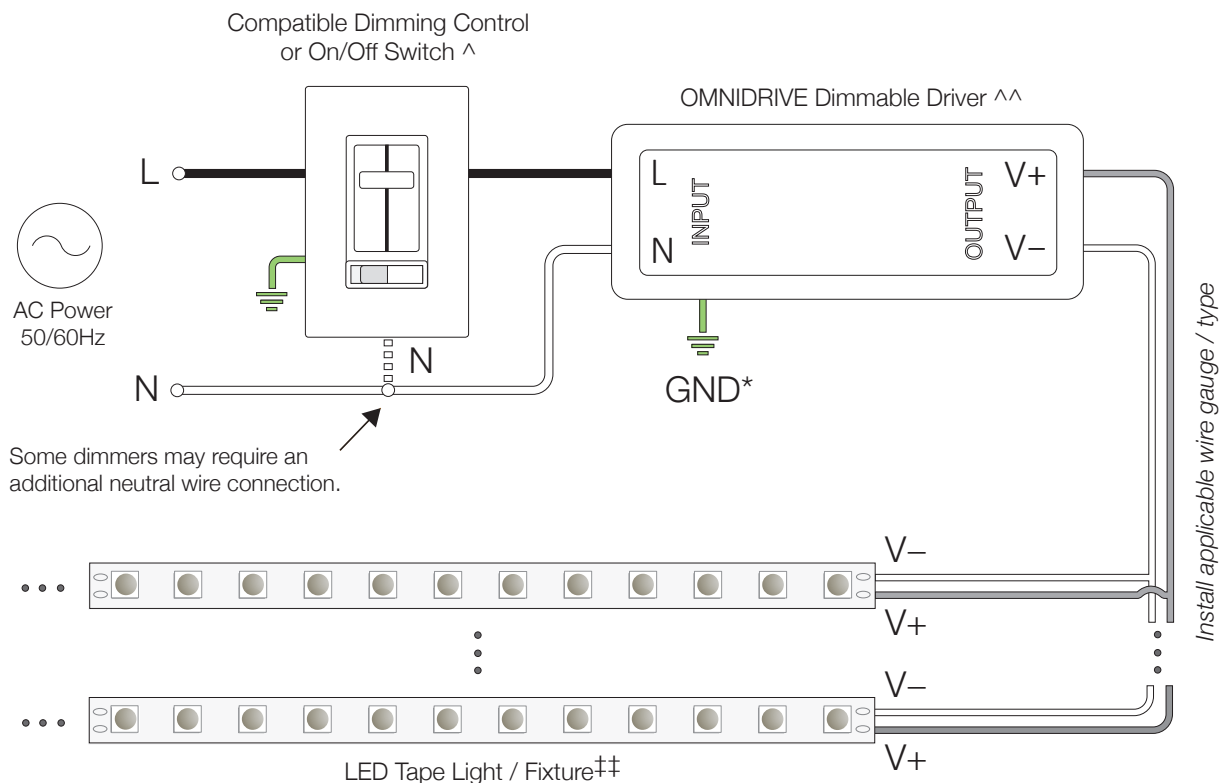

- No minimum or maximum load
- Superior dimming range
- ETL Listed enclosure
- Comprehensive dimming capacity

### QUICK SPECS

Environment	Indoor
Input Voltage	120VAC
Output Voltage	12VDC & 24VDC models
Connection Type	Hardwire
Dimming	Forward Phase & Reverse Phase Dimming
Certification	ETL Listed

## DID YOU KNOW?

### OMNIDRIVE 2

You can max out your wattage to full capacity! In addition, OMNIDRIVE 2 provides a zero minimum load for both dimming and on/off applications. Expect flawless performance for any project size.

# Magnetic Dimmable Drivers

Magnetic Dimmable Drivers are the compatible power source for applications using MLV (Magnetic Low Voltage) dimmer switches to control 12V and 24V LED lights. Please see the product page to view a complete list of compatible MLV dimming systems.

The Magnetic Multi-tap Dimmable Drivers are ideal for larger installations that is required to meet Class 2 electrical limitations. These Multi-tap Drivers split the given maximum wattage and is divided up within Class 2 limits through individual breakers, which can be loaded 100% to full Class 2 capacity.

## COMPATIBILITY NOTE

This driver is NOT COMPATIBLE with Pulse Width Modulation (PWM) dimmers such as our REIGN® Wall Mount LED Dimmer Switches or Inline LED Dimmer Switches. Visit [www.DiodeLED.com](http://www.DiodeLED.com) for a full compatibility guide.

## FEATURES & BENEFITS

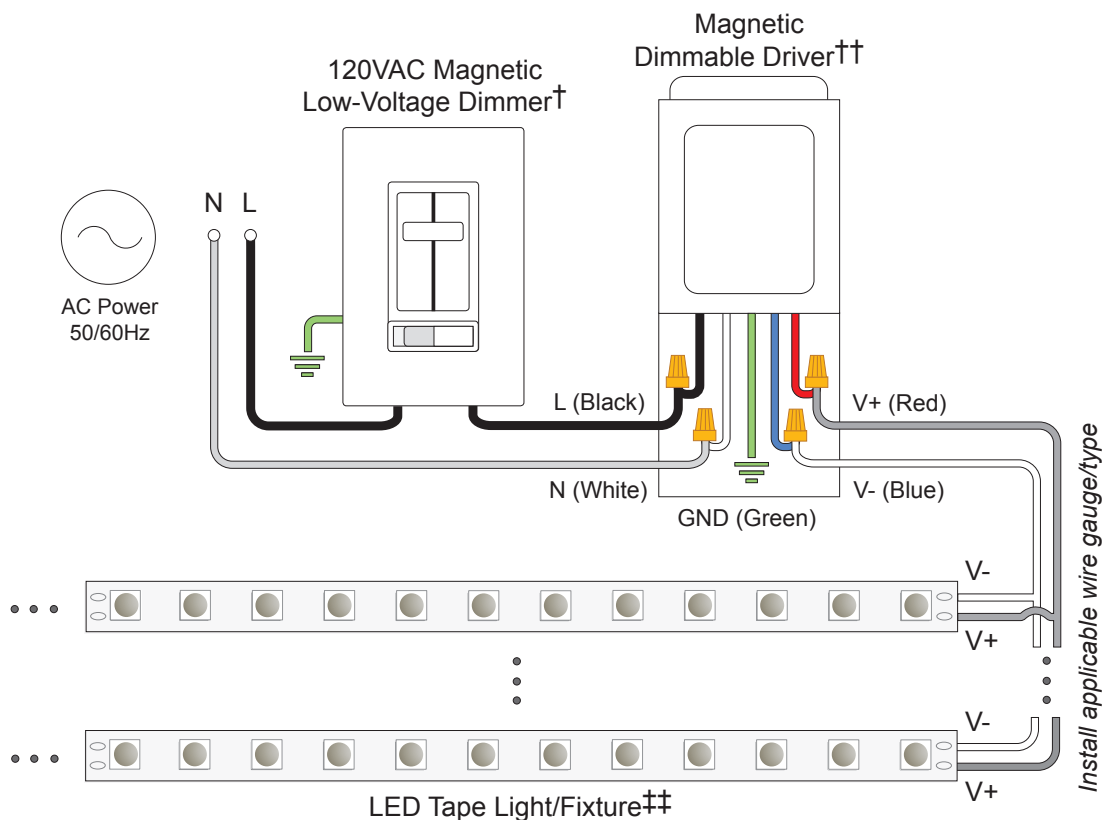

- Class 2 models
- NEMA 3R rated enclosure
- Suitable for dry and wet environments
- Built-in junction box

## Lutron® Hi-lume™ Series LED Drivers

The Lutron® Hi-lume™ Series LED Drivers are high performance LED power supplies for commercial or residential applications. This driver series provides smooth, continuous, flicker free dimming for 12V and 24VDC lighting systems. The Lutron LED Driver ensures a safe and reliable installation, thanks to its own specialized wiring and mounting enclosure. It is specifically engineered to work with a full range of Lutron® controls.

### COMPATIBILITY NOTE

These drivers are NOT COMPATIBLE with Pulse Width Modulation (PWM) dimmers such as our REIGN® Wall Mount LED Dimmer Switches or Inline LED Dimmer Switches. Visit [www.DiodeLED.com](http://www.DiodeLED.com) for a full compatibility guide.

### FEATURES & BENEFITS

- Down to 0.1% dimming
- Commercial and residential applications
- 120V/240/277VAC Ccompatible
- UL Listed 8750

### Hi-lume 1% 2-wire LTE LED driver

## 0-10V Dimmable LED Drivers

Ideal for commercial applications, 0-10V Dimmable LED Drivers are essential components when retro-fitting to low voltage LED fixtures in 0-10V control systems. Ideal for most installations, these drivers are rated for wet and dry locations and allows for superior dimming performance with its continuous 100-1% range. Visit the product page on the website for a full list of compatible systems.

### COMPATIBILITY NOTE

This driver is NOT COMPATIBLE with Pulse Width Modulation (PWM) dimmers such as our REIGN® Wall Mount LED Dimmer Switches or Inline LED Dimmer Switches. Visit [www.DiodeLED.com](http://www.DiodeLED.com) for a full compatibility guide.

### QUICK SPECS

<b>Environment</b>	Indoor
<b>Input Voltage</b>	120VAC
<b>Output Voltage</b>	24VDC
<b>Connection Type</b>	Plug-in / DC barrel plug
<b>Dimming</b>	Inline PWM dimmer
<b>Certification</b>	UL Listed

### Plug-In Adapter With DC Accessory Diagram

See page 128 for technical notes applicable to all system diagrams. Diagrams are subject to change.

## 24V DC Plug-In Adapter Model Options

### 24V DC Plug-In Adapters

PRODUCT IMAGE	SKU	WATTAGE	CLASS 2 ADAPTER	OUTPUT	COLOR	DIMENSIONS
	DI-PA-24V12W-CL2-B	12W	Yes	24VDC	Black	1.9 x 1.3 x 1.3 in.
	DI-PA-24V12W-CL2-W	12W	Yes	24VDC	White	1.9 x 1.3 x 1.3 in.
	DI-PA-24V24W-CL2-B	24W	Yes	24VDC	Black	3.8 x 1.75 x 1.4 in.
	DI-PA-24V24W-CL2-W	24W	Yes	24VDC	White	3.8 x 1.75 x 1.4 in.
	DI-PA-24V48W-CL2-B	48W	Yes	24VDC	Black	3.8 x 1.75 x 1.4 in.
	DI-PA-24V48W-CL2-W	48W	Yes	24VDC	White	3.8 x 1.75 x 1.4 in.
	DI-PA-24V96W-CL2-B	96W	Yes	24VDC	Black	4.7 x 2 x 1.25 in.
	DI-PA-24V96W-CL2-W	96W	Yes	24VDC	White	4.7 x 2 x 1.25 in.

### 24V DC Commercial Grade Plug-In Adapters

[VIEW FULL SPECIFICATION SHEETS AT www.DiodeLED.com](http://www.DiodeLED.com)

PRODUCT IMAGE	SKU	WATTAGE	CLASS 2 ADAPTER	OUTPUT	COLOR	DIMENSIONS
	DI-CV-24V90W-OWA	90W	Yes	24VDC	Charcoal	6.7 x 2.5 x 1.5 in.

# Driver Diagram Technical Notes

\* Driver may not require a fault ground connection. Refer to driver specifications for additional information.

\*\* Install a compatible Class 2 constant voltage driver. It is recommended to load the driver no more than 80% of its labeled rating for maximum longevity.

\*\*\* Install a Class 2 constant voltage driver compatible with a low-voltage PWM controller. It is recommended to load the driver no more than 80% of its labeled rating for maximum longevity.

\*\*\*\* Determine the number of low-voltage outputs of the driver when installing multiple PWM controllers/dimmer switches. No more than one PWM controller/dimmer switch can be attached to a single output of the driver.

† Install a compatible magnetic low-voltage dimmer switch. See dimmer switch manufacturer installation guide for complete wiring instructions.

†† Dimmable drivers require a compatible magnetic low-voltage dimmer switch to supply the driver and fixture with appropriate

input voltage. Do not test or install directly connected to an AC power source or on/off switch. It is recommended to load the driver no more than 80% of its labeled rating for maximum longevity. See dimmer switch manufacturer specifications for minimum load recommendations.

‡ Refer to driver or controller specifications for a compatible junction box.

‡‡ See fixture specifications for maximum series run limits.

§ See inline accessories specifications for maximum amperage ratings.

§§ See fixture specifications for a compatible adapter cable.

^ Install a compatible dimming control or switch. See the Electronic Dimmable Driver / Dimmer Compatibility List for compatible dimming controls. See the dimming control manufacturer installation guide for complete wiring instructions.

^^ Load the driver at least 60% of the labeled load for proper dimming performance (required for dimmable installations only).

# ELEMENTAL LED IS TECHNOLOGY & INNOVATION

Elemental LED's principal philosophy is to drive transformative and innovative technology advancements to the global lighting market. Our team – from product development, engineering, manufacturing to customer service – is dedicated to delivering uniquely superior, commercial-grade products for a variety of applications with optimum performance that will last for decades.

## OUR INNOVATION LABORATORY

The Elemental LED Innovation Lab hosts state-of-the-art photometric equipment allowing our engineering team to think broadly about potential applications for disruptive lighting technologies, build an innovation road map and rapidly prototype new technology in a real-world, living lab. Additionally, the Innovation Lab provides a testing environment for continual enhancement of our configured solutions to be compatible with other lighting products in the market.

Elemental LED Innovation Lab – Emeryville, CA

## OUR PATENTED PRODUCTS

We have invested extensively in research and development to engineer next generation patented Diode LED products providing our customers with technologically advanced solutions that solve industry challenges. We are committed to being first to market with the next breakthroughs in linear LED lighting solutions. Our extensive Intellectual Property (IP) portfolio can be found at [www.ElementalLED.com/patents](http://www.ElementalLED.com/patents).
