As a celebration of Roman ingenuity and design, a transformative element of classical architecture has been interpreted with the brilliance of glass. As the primary element of these elegant transitional fixtures, the Crownstone is captured in cast glass by Fine Art Lamps highly skilled artists in our Miami studio. Strength and elegance are the hallmarks of this bold new series giving testimony to our commitment to innovative designs and American craftsmanship.

"When we began working on the Delphi line, I wanted to arrive at design that felt clean, timeless and true. The line is inspired by the myths and legends of the ancient Oracle of Delphi, and each piece needed to have an almost mystical quality, glowing from an almost primitively classical basin silhouette made of hand formed or blown glass set within a silhouette whose form above all emphasizes purity. There is something deeply peaceful and reassuring to me about the concept of knowledge, and while these fixtures don't necessarily reveal truths, we hope that the light they shed can, metaphorically speaking, help to bring the light of truth into our lives.

At the very least, these fixtures are meant to bring a contemplative serenity and clarity to our world." — Alex Woogmaster

Employing the craftsmanship and artistry of hand-blown glass, Nest is created to be a carrier of light, a translucent interpretation of sacred celestial forms. For thousands of years, the spherical shapes of the sun or crescents of the moon have captured the wonderment and inspiration of mankind. Our Nest collection interprets this fascination of many cultures as an inspiration for fixtures of sculptural luminosity created by two hand-blown glass forms nesting in brilliant light. The outer sphere is blown in thick clear crystal with a high polished cut edge conveying the optic quality of our handmade studio glass. Nesting inside like a gem, is the inner ball that surrounds the light source, illuminating in one of eight available jewel tones suspended by a silver leaf or gold leaf canopy. Designed by Master Glass Artist Frank Englesby.

The exquisite seaside city of Cienfuegos on the southern coast of Cuba was built by French émigrés two centuries ago, and is known as "The Pearl of the South". The 1920's were a unique transitional period in architecture and design in Cienfuegos, combining the old and the new. Metalworking innovations flourished among the artisans. This period has inspired us to create the eclectic collection which takes its name from Cienfuegos. Executed by skilled metal artisans, the pieces are finished in a choice of antique bronze, soft gold, and weathered greige patina. Most are offered with or without textured natural greige fabric shades.

Westminster Series is thoughtfully designed to be both boldly dramatic and quietly subtle. Double-faced beveled crystals exquisitely float openly in individual metal frames that conform to the crystal shapes but without touching them. The lanterns, chandeliers, pendants and sconces are offered in a choice of warmly washed pale antique gold or softly weathered English brown iron patina with vestiges of silver. Both aged finishes lend a casual elegance to today's interior styles.

Included are the faceted clear crystal filament bulbs which so perfectly complement the faceted crystals.

Multi-Glass Pendants

HOW TO ORDER: Select finish/glass suffix option from below and add to item base number. Clear and Natural "Quartz" studio glass options consist of four distinct forms. These two options are predetermined at approximately 25% per shape. Hailstones are predetermined at approximately 50% per size for quantities of 5 or more on a canopy.

Our Cabling System

Glass pendants are individually adjustable after installation for optimum composition. This is a major advantage compared to other drop pendant cabling systems that require cutting.

Cables are hand adjustable by simply pushing up to shorten the length. To increase cable length, push plunger up and pull cable out.

Customization

Through Fine Art Lamps Customization Program we can make canopies to your specification in size and in number of drops with supplied appropriate transformer capacity. Canopies can be customized in finish and shape, including a version that has been coated with a base primer for you to paint to match your home decor.

Our Studio Glass is handmade individually.
Slight variations in shape, size and markings are the characteristics
that distinguish art glass from mass produced glass.
