

Family: San Mateo | Item No. 1253 RB

**Drawing 1 - Strap Detail**

**Drawing 2 - Fixture Mounting**

**Drawing 3 - Fixture Assembly**

## ▼ start here

**1**

1. Find a clear area in which you can work.
2. Unpack fixture and glass from carton.
3. Carefully review instructions prior to assembly.

**\*\*\* The construction of this fixture will be accomplished by first making all necessary electrical connections, hanging the fixture from the ceiling, and then installing the glass.**

**2**

1. Prepare gem strap (A) for mounting by threading two screws (B) provided into back of gull wing bracket of gem strap (A) - see **Drawing 2**.
  - Be sure the holes into which the screws are threaded match the spacing of holes (D) in the canopy (E) - see **Drawings 1 and 2**.
2. Mount gem strap (A) to junction box (J), using the two 1" screws (C) not provided.

**SAFETY WARNING: READ WIRING AND GROUNDING INSTRUCTIONS (I.S. 18) AND ANY ADDITIONAL DIRECTIONS. TURN POWER SUPPLY OFF DURING INSTALLATION. IF NEW WIRING IS REQUIRED, CONSULT A QUALIFIED ELECTRICIAN OR LOCAL AUTHORITIES FOR CODE REQUIREMENTS.**

**3**

Make electrical connections from supply wire to fixture lead wires. Refer to instruction sheet (I.S. 18) and follow all instructions to make all necessary wiring connections. Then refer back to this page to continue installation of this fixture.

**4**

1. Hang the fixture by slipping the holes (D) in the canopy (E), over the screws (B) in the mounting strap - see **Drawing 2**.
2. Thread on ball knobs (F) to secure fixture to the ceiling.

**5**

1. Thread center stem (2) into coupler (A) and tighten - see **Drawing 3**.
2. Before installing glass, fixture can be lamped accordingly.
3. To install glass, slip glass (3) onto center stem (2) and hold in place, making sure glass is flat up against the pan.
4. Thread spacer (4) onto center stem (2).
5. Slip decorative casting (5) onto center stem (2).
6. Thread bottom knob (6) onto end of center stem (2). Hand tighten only.  
Note: Tightening knob with a tool may cause damage to glass.

Note: Maximum wattage for 1253 fixture is 60 watts per bulb.

**Drawing 3 - Post-Mount**

## wiring instructions

### Indoor Fixtures

1. Connect positive supply wire **(A)** (typically black or the smooth, unmarked side of the two-conductor cord) to positive fixture lead **(B)** with appropriately sized twist on connector - see **Drawings 1 or 2**.
2. Connect negative supply wire **(C)** (typically white or the ribbed, marked side of the two-conductor cord) to negative fixture lead **(D)**.
3. Please refer to the **grounding instructions** below to complete all electrical connections.

### Outdoor Fixtures

1. Connect positive supply wire **(A)** (typically black or the smooth unmarked side of the two-conductor cord) to positive fixture lead **(B)** with appropriately sized twist on connector - see **Drawings 2 or 3**.
2. Connect negative supply wire **(C)** (typically white or the ribbed, marked side of the two-conductor cord) to negative fixture lead **(D)**.
3. Cover open end of connectors with silicone sealant to form a watertight seal.
  - If installing a wall mount fixture, use caulk to seal gaps between the fixture mounting plate (backplate) and the wall. This will help prevent water from entering the outlet box. If the wall surface is lap siding, use caulk and a fixture mounting platform specially.
4. Please refer to the **grounding instructions** below to complete all electrical connections.

## grounding instructions

### Flush Mount Fixtures

For positive grounding in a 3-wire electrical system, fasten the fixture ground wire **(E)** (typically copper or green plastic coated) to the fixture mounting strap **(1)** with the ground screw **(2)** - see **Drawing 1**.

Note: On straps for screw supported fixtures, first install the two mounting screws in strap. Any remaining tapped hole may be used for the ground screw.

### Chain Hung Fixtures

Loop fixture ground wire **(E)** (typically copper or green plastic coated) under the head of the ground screw **(2)** on fixture mounting strap **(1)** and connect to the loose end of the fixture ground wire directly to the ground wire of the building system with appropriately sized twist-on connectors - see **Drawing 2**.

### Post-Mount Fixtures

Connect fixture ground wire **(E)** (typically copper or green plastic coated) to power supply ground with appropriately sized twist-on connector inside post. Cover open end of connector with silicone sealant to form a watertight seal - see **Drawing 3**.
