

FLEX

LINEAR FLEXIBLE LED
LINE AND LOW VOLTAGE
INDOOR AND OUTDOOR

SECOND EDITION

JESCO
LIGHTING GROUP

JESCO offers a complete line of FLEX LED Flexible Linear Lighting. Line Voltage or Low Voltage, Indoor or Outdoor, static or color changing, we provide a variety of innovative solutions to meet the needs of architects, interior designers, lighting designers, electrical engineers, contractors and owners.

The INFINA® AC FLEX Series features our patented, line voltage strip. AC LEDs eliminate the need for a driver - the weakest part of the LED system - and promise a long life. Coupled with long 150 foot runs, ultra-bright 555 Lm/Ft and custom sizes in precise 4" increments, INFINA and now INFINA ACX have become one of the fastest growing product lines in the lighting market.

The DL-FLEX2-UP 24V low-voltage series, in three output levels, is a precision modular lighting system supported by sophisticated accessories and control options for the simplest static color accent, to the most complex dimming and color-changing applications. Proprietary on-board IC chips maintain light output from the beginning to the end of run - compared to a 30-40% loss at the end of competitor runs.

Being the original company to introduce flexible LED strip paired with 90CRI and very high outputs and efficacies have made DL-FLEX2-UP the go-to product for designers who know not all strips are the same.

The JESCO FLEX Series packs a powerful punch in a tiny footprint, providing highly economical quality light output with unique features for easy installation.

JESCO offers layout assistance and technical support for all its products.

INFINA® LINE VOLTAGE LED STRIP

Project: Tutti Nails at Copley Place
Boston, MA
Designer: Sang Hoon Oh
THE S.OH GROUP

KEY FEATURES

ARCHITECTURAL GRADE

- Incorporates JESCO's exclusive Driverless AC LED Technology
- High output 3 Step MacAdam LEDs ensure consistent color output
- Patented Constant Current IC's provide uniform intensity over the entire run
- Patented Keyed Connector System
- Smooth ELV Dimming
- Various connecting cables for easy turns in corners or to reach around architectural elements
- Indoor & Outdoor, Plug-in & Hardwire mounting

ULTRA-HIGH LUMEN OUTPUT

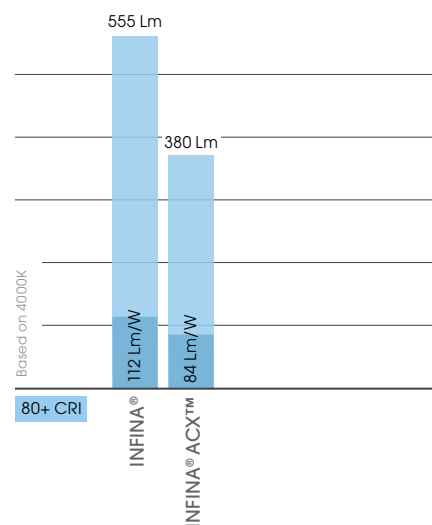

- Provides up to 555 Lm/Ft from 4.95W with an efficacy of 112 Lm/W†
- Optically clear thermoplastic jacket

ULTRA LONG RUN

- 100 or 150 foot run lengths
- Made to order in precise 4", 12" or 19" increments
- Uniform intensity and color throughout the entire run
- Quick Installation with channels or clips

50,000 HOUR LIFE

- No in-line or remote drivers mean that the weakest link in the LED system is eliminated guaranteeing a long lifetime

DL-AC-FLEX INFINA®

FLEXIBLE LINE VOLTAGE LED LINEAR STRIP

LED	120V AC	4.95 W/Ft	555 [†] Lm/Ft	112 [†] Lm/W	18 LED/Ft	80+ CRI	150' MAX

INFINA® LINE VOLTAGE LED STRIP

IMPORTANT INFORMATION FOR SPECIFIERS

CUTTING IN THE FIELD PROHIBITED

Per UL and ETL code, 120V AC LED strip: "shall not be marked or provided with instructions that indicate suitability for field cutting".

If any 120V AC LED flexible strip is cut in the field the product is no longer UL/ETL listed.

JESCO's DL-AC-FLEX INFINA is made to order in our US warehouses to precise 4" increments ready to install. No additional assembly fee - no matter how many connection cables required.

CORRECT MOUNTING METHOD FOR PLUG-IN APPLICATIONS

Per UL and ETL code, Plug-in applications must use open clips or channels allowing for quick and easy removal without the use of tools.

If clips that clamp down onto the strip are used, securing it in place, this is now a permanent surface mount luminaire and the product is no longer UL/ETL listed as a Plug-in strip.

JESCO provides clips and channel specific to both Plug-in and Hardwire applications.

HARDWIRE APPLICATIONS

JESCO's INFINA is the only 120V AC LED flexible strip UL and ETL listed for hardwiring applications.

Taking any Plug-in 120V AC LED strip and cutting off the plug and splicing it into a junction box is a violation and that product is no longer UL/ETL listed.

JESCO offers various options for both indoor and outdoor wet location hardwire applications that meet any code or design requirements.

MADE IN THE USA

JESCO's INFINA was developed and designed in New York and is assembled in the U.S.A.

Outdoor Hardwire application with permanent mounting clips, DL-AC-FLEX-MC-HW

SAVINGS AND PERFORMANCE

Conventional Low Voltage LED Tape Setup

Cost-Saving INFINA® Setup

Reduce material and installation costs associated with conventional low voltage LED tape light.

Benefit from longer run lengths, shorter installation time, bright uniform light output and less expensive dimming.

JESCO Lighting Group
Headquarters
Front entrance lobby
Port Washington, NY

KEY FEATURES

ARCHITECTURAL GRADE

- Onboard Constant Current IC chips control each individual LED providing uniform intensity and output over the entire run - compared to 30-40% loss at the end of runs found in the market
- Binned 3-step MacAdam LEDs ensure consistent color output across the entire run
- Smooth 0-10V Dimming
- Triac dimming with the use of specific driver
- Independently tested by Lutron and Crestron to work seamlessly with their many dimming control systems
- Extensive surface, recessed and rough-in channels and lenses available
- 2 oz. copper printed circuit board for greater heat dissipation and long life - compared to many utilizing only 1 oz.
- Quality controlled manufacturing of strip and all soldered components offering a lifetime of durability for all applications including those requiring tight bends

50,000 HOUR LIFE

- 5 Year Limited Warranty

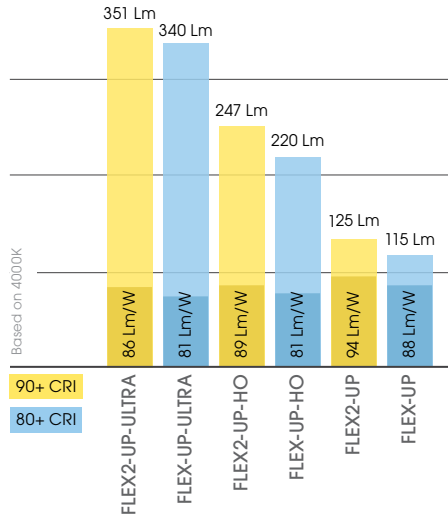

THREE LEVELS OF LUMEN OUTPUT

- -ULTRA offers an ultra-high output up to 361 lumens per foot
- -HO offers a high output up to 254 Lm/Ft
- -UP offers a standard output up to 128 Lm/Ft
- Choice of 90 or 80+ CRI

EASY CONNECTIVITY, EASY INSTALLATION AND LONG RUNS

- 12" (nominal) sections easily plug together to connect for longer runs (no soldering needed)
- Extensive variety of inter-connection options to meet any application need such as X patterns, through walls, around objects, etc.
- Backed with firm gripping 3M™ adhesive for quick and thorough application to most surfaces
- Quick installation with use of a variety of channels and clips
- Field cuttable every 4" (nominal)
- Choice of Hardwire or Plug & Play connections to power supplies and controllers

STANDARD OUTPUT APPLICATIONS

- Lighting toe-kick areas
- Backlighting small objects
- Internal lighting in cabinetry with glass doors
- Small scale applications

HIGH OUTPUT APPLICATIONS

- Under-cabinet task lighting
- Residential cove lighting
- Backlighting translucent stone surfaces
- Display case lighting
- Signage

ULTRA HIGH OUTPUT APPLICATIONS

- General ambient lighting in commercial and residential environments
- Large cove areas
- Task lighting
- Replacement for fluorescent lamps
- Signage

END-TO-END CONNECTION

HIGHLIGHTS

- 80 CRI
- Very high outputs and efficacies
- On-board constant current IC chips provide uniform intensity and output over the entire run
- Built-in quick connectors

COLOR TUNING / COLOR CHANGING

KEY FEATURES

BOUNTIFUL COLOR AND CONTROL

- CTA strip can tune from warm to cool white color temperatures as needed during the different times of the day or to meet specific design needs of a space
- RGB strip can achieve 16 million colors with a programmable DMX controller
- Match any color; determine speed and length of color transitions; program color transitions by the minute, hour, day or season
- Simple color control achieved with RGB RF or IR controllers

ARCHITECTURAL GRADE

- DMX control for complex colors and transitions
- Binned LEDs ensure consistent color output across the entire run
- Extensive surface, recessed and rough-in channels and lenses available
- Quality controlled manufacturing of light strip and all soldered components offering a lifetime of durability for all applications including those requiring tight bends

EASY CONNECTIVITY, EASY INSTALLATION AND LONG RUNS

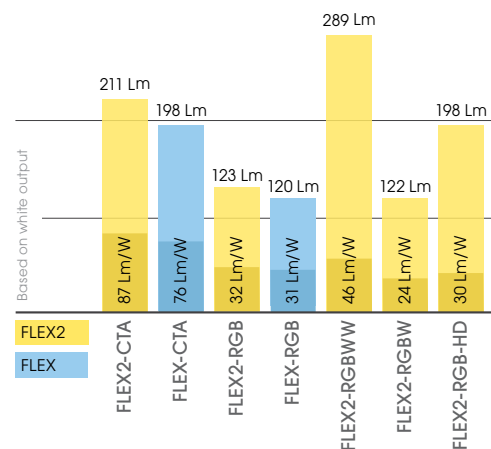

- DL-FLEX2-CTA, DL-FLEX-CTA and DL-FLEX2-RGB feature 12" (nominal) sections that easily plug together to connect for longer runs (no soldering needed)
- DL-FLEX2-RGB offers an extensive variety of inter-connection options to meet any application need such as X patterns, through walls, around objects, etc.
- Backed with firm gripping 3M™ adhesive for quick and thorough application to most surfaces
- Quick installation with use of a variety of channels and clips
- Field cuttable every 4" (nominal)
- Choice of Hardwire or Plug & Play connections to power supplies and controllers

50,000 HOUR LIFE

- 5 Year Limited Warranty

STYLES AVAILABLE

- DL-FLEX2-CTA strip is color tunable from 2400K to 7000K
- DL-FLEX2-RGB-HD features RGB color and a high density of 36 LEDs
- DL-FLEX2-RGBWW features RGB color with a Warm and Cool White LEDs
- DL-FLEX2-RGBW features RGB color with a 3000K White LED
- DL-FLEX2-RGB features standard RGB color

KEY FEATURES

ARCHITECTURAL GRADE

- DL-FLEX-HD features an on-board Constant Current IC chips that control each individual LED providing uniform intensity and output over the entire run
- Smooth 0-10V Dimming
- Triac dimming with the use of specific driver
- Extensive surface, recessed and rough-in channels and lenses available
- Quality controlled manufacturing of light strip and all soldered components offering a lifetime of durability for all applications including those requiring tight bends

EASY INSTALLATION

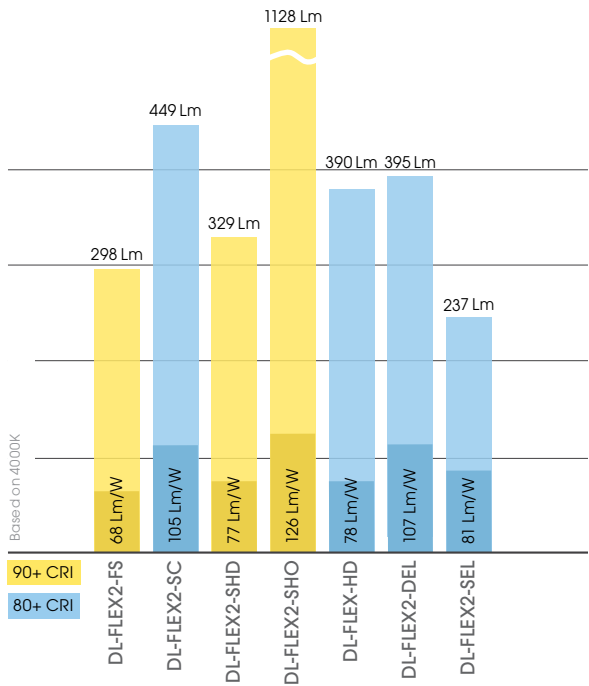

- Connectable using connectors or hardwired on-site
- Backed with firm gripping 3M™ adhesive for quick and thorough application to most surfaces
- Quick installation with use of a variety of channels and clips
- Field-cutable from 4" down to every 3/8" (nominal)
- Choice of Hardwire or Plug & Play connections to power supplies and controllers

50,000 HOUR LIFE

- 5 Year Limited Warranty

STYLES AVAILABLE

- DL-FLEX-FS offers a full spectrum color output with high CRI value of 95+
- DL-FLEX-SHO offers a super high output of 1149 Lm/Ft
- DL-FLEX-SHD features 90 LED chips per foot
- DL-FLEX-HD features 66 LED chips per foot and proprietary onboard Constant Current IC chips
- DL-FLEX-SEL features a single row of side emitting LED chips
- DL-FLEX-DEL features a double row of side emitting LED chips
- DL-FLEX-SC features single LEDs field-cutable every 3/8"

 5080 - 4750 - 5300K
 6580 - 6150 - 6900K

Note: when purchasing reels add **-20FT** to the end of the part number

HIGHLIGHTS

- Single or double side-emitting LEDs for applications that call for special bends that standard front-emitting LEDs cannot handle
- Very high density - 72 LEDs per foot for -DEL and 36 LEDs per foot for -SEL
- 80+ CRI
- Clamp connectors available
- Reels sold with pre-installed plug & play connections on both ends providing two working ends readily connectable to a driver if the strip is cut

Outdoor cove evenly lit with DL-FLEX-WETCC

KEY FEATURES

ARCHITECTURAL GRADE

- Onboard Constant Current IC chips control each individual white LED providing uniform intensity and output over the entire run as well as temperature control
- Binned LEDs ensure consistent color output across the entire run
- Smooth 0-10V Dimming
- DMX control for complex colors and transitions for WETCC-RGB strip
- Quality controlled manufacturing of light strip and all soldered components offering a lifetime of durability for all applications including those requiring tight bends

WETCC-RGB: BOUNTIFUL COLOR AND CONTROL

- 16 million colors can be achieved with a programmable DMX controller
- DMX control can match any color; determine speed and length of color transitions; program color transitions by the minute, hour, day or season

EASY CONNECTIVITY, EASY INSTALLATION

- FLEX-WET-CC is made to order and ready for installation
- FLEX-ODX is field-cutable
- Quick installation with use of channels and clips
- Choice of Hardwire or Plug & Play connections to power supplies and controllers

50,000 HOUR LIFE

- 5 Year Limited Warranty

HIGHLIGHTS

- Made to order in our US factory - shipped ready to install
- Choice of two levels of white output or RGB

Inline and L connectors may be connected with the built-in pins at the 12" cut marks. 4" and 8" Connection Extensions may also be added to extend runs from the 12" cut mark prior to attaching a connector. For field installations, all connections need to be sealed by installer with recommended Silicone SEALANT.

KEY FEATURES

OUTDOOR APPLICATIONS

- IP65 rated

ARCHITECTURAL GRADE

- SAM rated for use in signage
- Binned LEDs ensure consistent color output across the entire run
- Smooth Triac/MLV Dimming or DMX control

FOUR OPTIONS OF LIGHT OUTPUT

- DL-RM1 module offers one LED with choice of standard and high lumen output
- DL-RM2 module offers two LEDs with choice of standard and high lumen output
- DL-RM3 module offers three LEDs with choice of high lumen white output or RGB color changing

50,000 HOUR LIFE

- 5 Year Limited Warranty

EASY CONNECTIVITY, EASY INSTALLATION AND LONG RUNS

- Sold in reels of 25 modules
- Can be field cut
- Connectors available for tapping cable between modules
- Mount with provided 3M™ adhesive. Screws can also be used for mounting.
- Choice of Hardwire or Plug & Play connections to power supplies and controllers

CONTRACTOR GRADE LED STRIPS

Project: Mount Vernon Country Club in Colorado

A collaborative design of BWG Architects, Architectural Engineering Design Group (AE Design), contractor-Core Electric, GC-Hyder Construction and Visual Interest

KEY FEATURES

ARCHITECTURAL GRADE

- Contractor-grade LED Flexible Tape Light
- CFX2 & CFX2-PRO are sold by continuous 30' reels and are pre-installed with a power connector on each end, providing two working ends readily connectable to a driver if the tape is cut
- CFX2-RGB is sold by continuous 20' reel and is pre-installed with input wires on each end for easy hardwiring
- Field-cutable for shorter runs
- Cut ends can be linked with connectors. No soldering required.
- Mounts easily with 3M™ hi-bond adhesive tape on back
- Even 120° light distribution
- Low power consumption, low heat output
- No ultraviolet, infrared (UV/IR) radiation or Mercury
- Low profile and flexible
- LED Life >50,000 hours
- 5-year warranty when installed in accordance to specifications
- UL and cUL listed for dry locations

**CFX2-PRO**

ST SERIES SMART TRACK

The unique ST Series Low Voltage Smart Track utilizes adjustable power feeds that slide for distributing power to JESCO LED fixtures.

The power feeds simply snap onto the Smart Track and slide along the length of the track to allow for easy adjustments during installation and post-installation when used with an adjustable shelving system.

Smart Track has a very low profile making it relatively invisible when mounted either on a wall surface or inside a routed channel next to adjustable shelf standards.

The Smart Track is field cuttable and comes with double sided adhesive, two mounting clips and three mid-mounting clips.

APPLICATIONS

- Store fixture shelving and cashwraps highlighting featured items
- Product displays in showrooms, retail stores and office workstations
- Museums, galleries, antique stores
- Bar shelves, wine and liquor displays in restaurants and bars; under countertops for dramatic effects
- Bookcases, china and glassware cabinets, trophy cases

DL-FLEX SERIES MOUNTING CHANNELS

JESCO offers an extensive range of mounting channel extrusions for almost any application need - Surface Mounted, Recessed Mounted or Roughed In Ceiling and/or Walls.

To create an architectural feature using light as an element in a space, select one of three new CH-RI channels which can be roughed into a ceiling or wall or, for even easier installation with the FLEX pre-installed, can be inserted into an engineered $\frac{1}{2}$ " or $\frac{5}{8}$ " drywall rough-in channel.

Select a simple channel to pre-mount FLEX product for easy installation in tight areas in the ceiling or select an MDF channel for easy painting to match the mounting area.

We offer a variety of channels of different depths to meet your design requirements. Many of the extrusions are available with flanges making recessing simple and neat. Lenses are available in a variety of options.

Contact our Support Department for questions or design layout assistance.

Rough-in Channels mounted in the wall along stairway

CH-ME-21 inserted into a milled slot in a handrail.

OUTDOOR 24V DC HARDWIRE ELECTRONIC LED POWER SUPPLIES IN JUNCTION BOX ENCLOSURE

	Model	Description	Input - Output	Max Watts	Dimming
22	DL-PS-80/24-JB-OD	Outdoor Hardwire Power Supply in a Junction Box 13 1/2" L x 2 7/8" W x 1 1/2" H c-UL-us Listed. Class 2. Suitable for wet locations. Integrated dimmer - see spec sheet.	110-277V AC 24V DC	80W	0-10V ^{1,2}
23	DL-PS-96/24-JB-OD	Outdoor Hardwire Power Supply in a Junction Box 11 1/2" L x 2 1/2" W x 1 5/8" H c-UL-us Listed. Class 2. Suitable for wet locations.	110-277V AC 24V DC	96W	0-10V ^{1,2}

12V DC HARDWIRE AND PLUG & PLAY ELECTRONIC LED POWER SUPPLIES

	Model	Description
24		Consult product spec sheet for choice of LED 12V Hardwire, Hardwire in Junction Box and Plug & Play Power Supplies

* Power Supplies can be purchased without junction box enclosure - see www.jescolighting.com

¹ May be dimmed with LC-DIM5A-HW.

² For 277V AC input consult factory for details.

See Specs for more details.

Specifications are subject to change without notice.

CONTROLLER OPTIONS

The LC-PC-500 advanced DMX controller provides precise selection of colors and color transitions as well as brightness in multiple areas with easy multiple pre-set scenes

0-10V DIMMING CONTROLLER OPTIONS

PLUG & PLAY

LC-DIM5A
Plug & Play Dimmer -
12V/24V

Dims: 4 1/4" L x 1 7/8" W x 1 1/8" H
Max Output: 120W @ 12V DC
240W @ 24V DC
Output Current: 10A

- Plug and Play
- Built in 0-10V dimming control with rotary knob for precise and smooth dimming
- Requires DL-PS power supply
- Compatible with plug and play connections

HARDWIRED

LC-DIM-01-HW
Simple
Dimming Interface -
5V-24V

Dims: 4 1/4" L x 1 3/4" W x 1 1/8" H
Max Output: 196W
Output Current: 8A

- Hardwire*
- 0-10V dimming interface
- Requires separate 0-10V simple wall plate dimmer or advanced architectural dimming system (Sold separately. Consult dimming control manufacturer for more information).
- Requires DL-PS hardwire power supply

LC-DIM5A-HW
Architectural
Dimming Interface -
12V/24V

Dims: 6 1/4" L x 3" W x 1 1/2" H
Max Output: 120W @ 12V DC
240W @ 24V DC
Output Current: 10A

- Hardwire*
- 0-10V dimming interface
- Tested and approved by Lutron and Crestron with select dimmers
- Requires separate 0-10V simple wall plate dimmer or advanced architectural dimming system (Sold separately. Consult dimming control manufacturer for more information).
- Requires DL-PS hardwire power supply

SIMPLE DIMMER CONTROLLER

DS-DV-TV-WH
0-10V Wall
Dimmer Switch

Dims: 2 5/8" L x 1 3/4" W
For use with LC-DIM5A-HW or
LC-DIM-01-HW

- Hardwire
- Smooth dimming
- White Finish
- Replaces old model DL-PS-DS-TV
- Wall plate sold separately

ARCHITECTURAL REMOTE DIMMING INTERFACE

For use with LC-DIM5A-HW.
See Flex spec sheets for recommendations.

- Hardwire
- Advanced, luxury whole home systems
- May support up to 10,000 devices
- Elegant and discreet keypad styles, color options and customization
- Hidden panels eliminate dimmers and switches on the wall
- May work with vacancy sensors or thermostats for HVAC control
- Consult dimming control manufacturer such as LUTRON® & CRESTRON® for more information

* Can be converted to plug and play by adding DL-PS-PT- M and DL-PS-PT-F connectors.

Interference, noise control/reduction, and voltage drop must be taken into consideration when installing dimming controls. Installing low voltage cable near line voltage wiring may cause interference and result in flickering.

It is highly recommended the dimmer and power supply be installed as close as possible to the LED fixture(s) to maintain signal integrity. Long wiring runs can produce a significant drop in the signal level resulting in different light levels by the same control device. Installation wiring longer than 30 feet, or where excessive electrical noise exists, should be tested for signal integrity prior to installation. Shielded cable or conduit should be considered during the installation to reduce interference and electrical noise.

Always install according to NEC and local codes.

DIMMING CONTROLLER OPTIONS

ADVANCED RADIO FREQUENCY DIMMING CONTROLLER OPTIONS

REMOTE CONTROLLER

LC-RF-400H-DIM

Remote Dims: 4 3/4" L x 2 3/16" W x 1 1/16" H
Operating Voltage: 3.6V DC (3 x AAA batteries)
Working Frequency: 434 MHz
Remote Distance: 100ft. max

- Touch wheel
- Includes wall mount remote holder
- 4 controllable zones
- Unlimited number of receivers per zone
- 3 savable scenes/colors per zone
- Brightness control
- Does not require line-of-sight
- Requires LC-RF-400-RCV

SINGLE WALL MOUNTED CONTROLLER

LC-RF-400W-DIM

Receiver Dims: 4 3/4" L x 2 15/16" W
Operating Voltage: 3V DC (CR2025 battery)
Working Frequency: 434 MHz
Remote Distance: 100ft. max

- Fits standard single gang switch box
- Utilizes a battery for wireless installation
- Does not require line-of-sight
- Requires LC-RF-400-RCV

DUAL WALL MOUNTED CONTROLLER

LC-RF-402W-DIM

Receiver Dims: 4 3/4" L x 2 15/16" W
Operating Voltage: 12-24V DC
Working Frequency: 434 MHz
Remote Distance: 100ft. max

- Allows for 2 zone dimming
- Fits standard single gang switch box
- Does not require line-of-sight
- Requires LC-RF-400-RCV
- Requires DL-PS power supply

RADIO FREQUENCY RECEIVER

LC-RF-400-RCV

Receiver Dims: 7 1/8" L x 1 13/16" W x 3/4" H
Input: 12-24V DC
Channels: 4
Output: 384 Watts max
96W max per channel
5A max per channel

- Hardwire*
- Works with LC-RF-400H-DIM
LC-RF-400W-DIM
LC-RF-402W-DIM
- Receiver can be hidden
- May use more than one per location that can be synchronized with one another
- Requires DL-PS hardwire power supply

BASIC DIMMING CONTROLLER OPTIONS

RADIO FREQUENCY CONTROLLER

LC-DIM200-RF-HW

Dims: 4 1/4" L x 2 1/8" W x 1 3/8" H
Max Output: 60W @ 12V DC
96W @ 24V DC
Remote Distance: 50ft max

- Hardwire*
- Remote key chain control as well as on-board control
- Does not require line-of-sight
- Max one per location and cannot be synchronized with one another
- Requires DL-PS hardwire power supply

* Can be converted to plug and play by adding DL-PS-PT- M and DL-PS-PT-F connectors.

Interference, noise control/reduction, and voltage drop must be taken into consideration when installing dimming controls. Installing low voltage cable near line voltage wiring may cause interference and result in flickering.

It is highly recommended the dimmer and power supply be installed as close as possible to the LED fixture(s) to maintain signal integrity. Long wiring runs can produce a significant drop in the signal level resulting in different light levels by the same control device. Installation wiring longer than 30 feet, or where excessive electrical noise exists, should be tested for signal integrity prior to installation. Shielded cable or conduit should be considered during the installation to reduce interference and electrical noise.

Always install according to NEC and local codes.

ADVANCED RADIO FREQUENCY CTA CONTROLLERS

REMOTE CONTROLLER

LC-RF-400H-CTA

Remote Dims: 4 3/4" L x 2 3/16" W x 1 1/16" H
Operating Voltage: 3.6V DC (3 x AAA batteries)
Working Frequency: 434 MHz
Remote Distance: 100ft. max

- Touch wheel
- Includes wall mount remote holder
- 4 controllable zones
- Unlimited number of receivers per zone
- 3 savable scenes/colors per zone
- Brightness control
- Does not require line-of-sight
- Requires LC-RF-400-RCV

WALL MOUNTED CONTROLLER

LC-RF-400W-CTA

Dims: 4 3/4" L x 2 15/16" W
Operating Voltage: 3V DC (CR2025 battery)
Working Frequency: 434 MHz
Remote Distance: 100ft. max

- Fits standard single gang switch box
- Utilizes a battery for wireless installation
- Does not require line-of-sight
- Requires LC-RF-400-RCV

RADIO FREQUENCY RECEIVER

LC-RF-400-RCV

Dims: 7 1/16" L x 1 13/16" W x 3/4" H
Input: 12-24V DC
Channels: 4
Output: 384 Watts max
96W max per channel
5A max per channel

- Hardwire*
- Works with LC-RF-400H-CTA
LC-RF-400W-CTA
- Receiver can be hidden
- May use more than one per location that can be synchronized with one another
- Requires DL-PS hardwire power supply

* Can be converted to plug and play by adding DL-PS-PT- M and DL-PS-PT-F connectors.

Interference, noise control/reduction, and voltage drop must be taken into consideration when installing dimming controls. Installing low voltage cable near line voltage wiring may cause interference and result in flickering.

It is highly recommended the dimmer and power supply be installed as close as possible to the LED fixture(s) to maintain signal integrity. Long wiring runs can produce a significant drop in the signal level resulting in different light levels by the same control device. Installation wiring longer than 30 feet, or where excessive electrical noise exists, should be tested for signal integrity prior to installation. Shielded cable or conduit should be considered during the installation to reduce interference and electrical noise.

Always install according to NEC and local codes.

RGB & RGBW CONTROLLERS

ADVANCED RADIO FREQUENCY RGB / RGBW CONTROLLERS

REMOTE CONTROLLER

LC-RF-400H-RGB

Remote Dims: 4 3/4" L x 2 3/16" W x 1 1/16" H
Operating Voltage: 3.6V DC (3 x AAA batteries)
Working Frequency: 434 MHz
Remote Distance: 100ft. max

- Touch wheel for RGB and RGBW control
- Includes wall mount remote holder
- 4 controllable zones
- Unlimited number of receivers per zone
- 3 savable scenes/colors per zone
- Brightness control
- 10 built-in color changing modes
- Does not require line-of-sight
- Requires LC-RF-400-RCV

WALL MOUNTED CONTROLLER

LC-RF-410W-RGB

Dims: 4 3/4" L x 2 15/16" W
Operating Voltage: 12-24V DC
Working Frequency: 434 MHz
Remote Distance: 100ft. max
Power Supply not included

- Touch wheel for RGB and RGBW control
- Allows for single zone color control with 3 savable colors
- Can also be used as a hardwired RGB Control
- Does not require line-of-sight
- Requires LC-RF-400-RCV

RADIO FREQUENCY RECEIVER

LC-RF-400-RCV

Dims: 7 1/16" L x 1 13/16" W x 3/4" H
Input: 12-24V DC
Channels: 4
Output: 384 Watts max
96W max per channel
5A max per channel

- Hardwire*
- Works with LC-RF-400H-CTA
LC-RF-400W-CTA
- Receiver can be hidden
- May use more than one per location that can be synchronized with one another
- Requires DL-PS hardwire power supply

BASIC RGB CONTROLLERS

RADIO FREQUENCY CONTROLLER

LC-RF-300

Receiver Dims: 3 1/4" L x 2 1/2" W x 1" H
Output: 432 Watts max
6A per channel max
Remote Distance: 30' max

- Touch wheel RGB control on remote
- 15 pre-set color changing modes, on/off function, brightness and speed control
- Does not require line-of-sight
- Max one per location and cannot be synchronized with one another
- Remote receiver included
- Requires DL-PS hardwire power supply*

INFRARED CONTROLLER

LC-IR-300

Receiver Dims: 2 1/2" L x 1 3/8" W x 3/8" H
Output: 144 Watts max
2A per channel max
Remote Distance: 30' max

- Receiver must be visible to remote - requires line of sight to function
- Multiple controllers possible per location
- 44 key remote control with multiple modes and programming
- 6 user-defined buttons for savable colors
- Terminal block included
- Max one per location and cannot be synchronized with one another
- Remote receiver included
- Requires DL-PS plug & play power supply*

* Can be converted to plug and play by adding DL-PS-PT- M and DL-PS-PT-F connectors.

Interference, noise control/reduction, and voltage drop must be taken into consideration when installing dimming controls. Installing low voltage cable near line voltage wiring may cause interference and result in flickering.

It is highly recommended the dimmer and power supply be installed as close as possible to the LED fixture(s) to maintain signal integrity. Long wiring runs can produce a significant drop in the signal level resulting in different light levels by the same control device. Installation wiring longer than 30 feet, or where excessive electrical noise exists, should be tested for signal integrity prior to installation. Shielded cable or conduit should be considered during the installation to reduce interference and electrical noise.

Always install according to NEC and local codes.

BASIC RADIO FREQUENCY RGBW CONTROLLER

REMOTE CONTROLLER

LC-RF-450

Receiver Dims: 3 1/16" L x 1 3/4" W x 7/8" H
Input: 12-24V DC
Working Frequency: 2.4 GHz
Max Output: 240 Watts max
144W max per channel
6A max per channel
10A max total
Remote Distance: 98.4' max

- Touch wheel control
- 4 controllable zones
- Unlimited number of receivers per zone
- Pre-set color changing modes
- Brightness control
- Does not require line-of-sight
- Max one per location and cannot be synchronized with one another
- Remote receiver included
- Requires DL-PS plug & play power supply

ADVANCED RADIO FREQUENCY RGBWW CONTROLLER

WALL MOUNTED CONTROLLER

LC-RF-510W-RGBWW

Dims: 4 1/16" L x 2 15/16" W
Operating Voltage: 12-24V DC
Working Frequency: 916.5 MHz
Remote Distance: 100ft. max

- Touch pad control
- 1 controllable zone
- Unlimited number of receivers
- Brightness control
- Can also be used as a hardwired RGBWW Control
- 10 built-in RGB effects
- External power supply required, not included
- Requires LC-RF-400-RCV or LC-200-INT, LC-300-INT or LC-500-INT
- Also works as controller for CTA, RGB and RGBW

RGBWW INTERFACE

LC-500-INT

Receiver Dims: 6 1/16" L x 2 5/16" W x 1 1/8" H
Input: 12-24V DC
Channels: 5
Output: 960 Watts max
60W-180W per channel
5A max per channel

- Hardwire*
- Works with LC-RF-510W-RGBWW
- Receiver can be hidden
- May use more than one per location that can be synchronized with one another
- Requires DL-PS hardwire power supply
- Also works with RGB, RGBW and CTA

BASIC RADIO FREQUENCY RGBWW CONTROLLER

REMOTE CONTROLLER

LC-RF-RGBWW

Receiver Dims: 3 1/16" L x 1 3/4" W x 7/8" H
Input: 12-24V DC
Working Frequency: 2.4 GHz
Max Output: 240 Watts max
144W max per channel
6A max per channel
10A max total
Remote Distance: 98.4' max

- Touch wheel control
- 4 controllable zones
- Unlimited number of receivers per zone
- Pre-set color changing modes
- Brightness control
- Does not require line-of-sight
- Max one per location and cannot be synchronized with one another
- Remote receiver included
- Requires DL-PS plug & play power supply
- Also works as controller for RGB and RGBW

CITY THEATRICAL REMOTE DMX

JESCO LIGHTING is an authorized distributor of City Theatrical interfaces that allow for remote control with wall mounted DMX control panels as well as a suite of mobile phone applications. Contact us for more information.

* Can be converted to plug and play by adding DL-PS-PT- M and DL-PS-PT-F connectors

Interference, noise control/reduction, and voltage drop must be taken into consideration when installing dimming controls. Installing low voltage cable near line voltage wiring may cause interference and result in flickering.

It is highly recommended the dimmer and power supply be installed as close as possible to the LED fixture(s) to maintain signal integrity. Long wiring runs can produce a significant drop in the signal level resulting in different light levels by the same control device. Installation wiring longer than 30 feet, or where excessive electrical noise exists, should be tested for signal integrity prior to installation. Shielded cable or conduit should be considered during the installation to reduce interference and electrical noise.

Always install according to NEC and local codes.

DMX CONTROLLERS

SIMPLE REMOTE DMX CONTROLLER

LC-PC-100

Dims: 2 3/4" L x 3 3/8" W x 1 1/2" H
Input: 12V / 24V DC
Must be programmed with included software.

- Simple desktop DMX controller pre-programmed for basic functionality
- Simple on-board 2 button interface for scene selection
- Best for single RGB lighting systems
- Architectural lighting control programmed via software installed in a computer
- 16 million colors to program
- User can create their own scenes, color changes, fades
- Can control multiple lighting systems independently or simultaneously

SIMPLE WALL MOUNTED DMX CONTROLLER

LC-PC-400

Dims: 3 3/8" L x 3 3/8" W x 7/16" H
Input: 12V / 24V DC
Must be programmed with included software.

- Simple wall mount DMX controller with touch sensitive glass faceplate
- Touchscreen features 3 modes: color selection, scene selection and dimmer mode
- Best for single RGB lighting systems
- Architectural lighting control programmed via software installed in a computer
- 16 million colors to program
- User can create their own scenes, color changes, fades
- Can control multiple lighting systems independently or simultaneously

ADVANCED WALL MOUNTED DMX CONTROLLER

LC-PC-500

Dims: 6 3/8" L x 5" W x 1/2" H
Input: 12V / 24V DC
Must be programmed with included software.

- Advanced wall mount DMX controller with touch sensitive glass faceplate
- 5 different lighting systems may be controlled simultaneously
- Features Ethernet network ability to allow control with Apple iOS or Google Android devices
- Architectural lighting control programmed via software installed in a computer
- 16 million colors to program
- User can create their own scenes, color changes, fades
- Can control multiple lighting systems independently or simultaneously

REPEATER

LC-200-RPT

Dims: 6 1/2" L x 1 1/2" W x 1" H
Input: 12V / 24V DC

- For extending runs in dimming and color changing applications
- Requires additional DL-PS hardwire power supply* (Size power supply according to connected load)
- Requires signal from LC-200-INT or Dimming Interface

DMX INTERFACE

LC-200-INT
Simple DMX Interface

Dims: 7" L x 1 1/2" W x 1 1/8" H
Input: 12V / 24V DC
Channels: 3
Max Current: 5A per channel
180W @ 12V DC
360W @ 24V DC

- Assigns a DMX address to RGB or CTA LED flexible light sources
- Requires a DMX controller
- RJ45 connector for DMX input
- 170 unique DMX addresses, 512 channels
- Requires additional DL-PS hardwire power supply*

LC-300-INT
Advanced DMX Interface

Dims: 6 1/2" L x 2 25/64" W x 1 9/32" H
Input: 12V-36V DC
Channels: 3 or 4
Max Load: 96W-288W per channel
Max Current: 8A per channel

- Assigns DMX address to CTA, RGB, and RGBW flexible light sources strips
- RJ45 connector for DMX input
- Requires a DMX controller
- Requires additional DL-PS hardwire power supply*

LC-500-INT

Receiver Dims: 6 1/16" L x 2 5/16" W x 1 1/8" H
Input: 12-24V DC
Channels: 5
Output: 960 Watts max
60W-180W per channel
5A max per channel

- Assigns DMX address to CTA, RGB, RGBW and RGBWW flexible light sources strips
- RJ45 connector for DMX input
- Requires a DMX controller
- Requires additional DL-PS hardwire power supply*

* Can be converted to plug and play by adding DL-PS-PT- M and DL-PS-PT-F connectors

Interference, noise control/reduction, and voltage drop must be taken into consideration when installing dimming controls. Installing low voltage cable near line voltage wiring may cause interference and result in flickering.

It is highly recommended the dimmer and power supply be installed as close as possible to the LED fixture(s) to maintain signal integrity. Long wiring runs can produce a significant drop in the signal level resulting in different light levels by the same control device. Installation wiring longer than 30 feet, or where excessive electrical noise exists, should be tested for signal integrity prior to installation. Shielded cable or conduit should be considered during the installation to reduce interference and electrical noise.

Always install according to NEC and local codes.

RADIANZ REMOTE POWER SYSTEM

The new **RADIANZ** Remote Power System, designed for use with JESCO's broad range of LED lighting products, provides the perfect solution for powering stand-alone exhibits, kiosks and gondolas, both permanent or temporary, without the cost of bringing power to the fixtures. The designer has the freedom to plan the space effectively to maximize traffic flow without being limited by the location of the power source. These exhibits can be easily relocated as the needs of the space change, without the cost of re-wiring the space.

The **RADIANZ BATT-LI** series is a portable, lithium-ion battery pack. Available in three capacities, the **RADIANZ** powers all of JESCO's 12V, 24V or 350mA LED fixtures at the lowest cost per watt hour in the market. Plug & Play power connections, an on/off switch, a four-level charge indicator, and an audible low battery warning make the battery pack very user-friendly. A plug-in charger is provided with each battery. A 100% charge is achievable in 3-5 hours depending on the capacity.

ADDITIONAL FEATURES

- LED charge level indicator
- Quick re-charging
- Over-discharge protection
- Over-charge protection
- Short-circuit protection
- Audible low battery warning
- 100Wh and 150Wh capacity batteries come with a 5V USB port for charging phones and tablets - max output 2A

APPLICATIONS

- Temporary & Permanent Exhibits
- Gondolas
- Kiosks
- Islands
- Trade Show Booths
- Display Windows
- Jewelry Cases
- Museum Displays
- Pop-ups

BATT-LI

RADIANZ REMOTE POWER SYSTEM

Input Charging Voltage: 13V / 60W - use supplied charger

Output Voltage/Current: 12V / 24V / 350mA

Capacity: 100Wh / 150Wh / 266Wh

Full charge time: 3 hours / 4 hours / 5 hours

Integral USB Port: Yes (100Wh, 150Wh)

Cycle Life: >500 times, then 80% capacity

Environment: Indoor - Dry

TO ORDER

MODEL	OUTPUT	CAPACITY
BATT-LI	-	-
	12V - 12V	100WH - 100Wh
	24V - 24V	150WH - 150Wh
	350MA - 350 mA	266WH - 266Wh

See spec sheet or jescolighting.com for more details.
