

IMPORTANT
TURN OFF THE POWER AT THE MAIN FUSE
OR CIRCUIT BREAKER BOX
BEFORE STARTING INSTALLATION

Carefully unpack and identify all parts before assembly. Bulbs are not included.

1. Spread open arms so they are evenly spaced to each other.
2. Thread fixture wires through upper notched cap and fixture loop. Then slide down the notched cap until the arms are locked into it's notches. Screw fixture loop onto protruding threaded pipe until secure.
3. Slip bottom cap assembly onto center plate, making certain its notches are locked onto "L" shape pins. Then install top cap and secure all together by fastening with finial from above.
4. Follow enclosed supplement installation instructions for electrical and fixture installation onto house outlet box. If you do not have an outlet box at desired location to attach the fixture than hire a qualified electrician to create one.
5. Install shades onto fitters by fastening counter rings onto threaded sockets.
6. Install bulbs (not included). See relamping label located at socket area for type and maximum allowed wattage.
