

**Carefully unpack and identify all parts before beginning assembly.**

1. Lay wood frame, with screw holes side facing up, on a non-abrasive surface.
2. Gently lay glass mirror, (mirror side down) onto wood frame. Then lay glass mirror cover onto wood frame.
3. Secure glass mirror cover onto wood frame with screws, securing glass mirror in place.
4. At desired wall location, install two picture frame hangers or screws (not included) into wall at corresponding position with two hanging loops. Note: Use a level to insure mounting position is horizontal. Make securely fastened onto wall to adequately support the weight of the mirror. If not certain, consult a qualified technician.
5. Carefully hang mirror onto wall.
