

**IMPORTANT
TURN OFF THE POWER AT THE
MAIN FUSE OR CIRCUIT BREAKER
BOX BEFORE STARTING INSTALLATION**

Carefully unpack and identify all parts before beginning assembly. Bulb not included.

1. Follow enclosed supplement installation instructions for electrical and fixture installation onto house outlet box. If you do not have an outlet box at desired location to attach the fixture than hire a qualified electrician to create one.
2. Install bulbs (not included) - use type-A of 60 Watt maximum medium base bulbs:
 - A. Install a bulb into upper socket by slipping through top opening.
 - B. Install another bulb into middle socket by slipping either through bottom opening.
 - C. Install last bulb into lower socket by slipping through bottom opening.
3. Install covers:
 - A. Install bottom cover (with a drain hole) by fastening with screws onto bottom of lantern. Use enclosed hex key to tighten the screws. NOTE: Make certain to use the cover with small hole at center. The hole is to drain any water accumulating at bottom inside of lantern.
 - B. Install top cover (without drain hole) onto top of lantern.
