ILLUMINATE THE MOMENTS THAT MATTER

PROGRESS LIGHTING™

Featuring Greyson

THE MOMENT WHEN...

At Progress Lighting, we've been thinking a lot about what makes a home special. While families, households, blueprints and design styles vary, the memories we cherish tend to appear very similar.

Family time, special events and milestone memories are celebrated every day, and we are proud to play a very important piece of that puzzle – illuminating the moments that matter to you.

EDITOR'S NOTE: As you thumb through the pages of our new catalog, pay special attention to the *MOMENT* details. We are eager to introduce to you some of the individuals who make up our Progress Lighting family.

MOMENT Brandy tends to her flowerbed while her son is still reeling from the fact that he was awarded the game ball from his coach and teammates! The *Moment* when you discover your passion.

Family of Greg K., Photographer

We invite you to join us on a journey as we tell our story.

Rather than seeing professional models in this catalog, we're introducing you to many talented individuals who represent – or are connected in a special way to – the Progress Lighting team.

Within these pages, we're shining a spotlight on our employees, colleagues and family members. We've asked them to show their love for the brand while sharing a sneak peek into their personalities, their passions and their interests.

Featuring LED Step Lights

MOMENT Greg and his son head in to make their famous chicken noodle recipe that the family enjoys every Tuesday night during the school year. The *Moment* when you create traditions with loved ones.

Greg K., Photographer

Featuring Crawford

These people, these families are our shining stars that make Progress Lighting a fun, successful and collaborative place to come to each day.

Just like you, they can't wait to walk through the door at the end of the day to share stories, experiences and dreams with the ones they love the most.

By bringing these moments to life, we're showing you all the special qualities that we hold dear.

And as you look to us for design inspiration and creative ideas, we are confident that you'll experience the passion in creating products that will bring your very own design vision to life.

This is Progress

We're more than just a lighting manufacturer with a rich heritage. We're illuminating a vision for the future. As we celebrate more than a century of successful partnerships, we turn our focus to the future in creating collections that highlight affordable luxury lifestyles throughout homes nationwide.

We're placing a high concentration on providing a variety of design and inspirational resources that *equip, educate* and *excite* customers, partners and prospects on Progress Lighting's design-centric products.

EQUIP.
EDUCATE.
EXCITE.

A LIGHTING BRAND FOR YOUR LIFESTYLE

Award-winning designers, luxury homebuilders and consumers in every community across the nation trust our products to represent the very best their homes have to offer.

Learn more about how our tools, tips, content and expertise help you reach your design goals, and join us in discovering our unparalleled commitment to providing a wide range of design styles and collections to meet your unique needs.

STYLE BOARDS //

As a result of continuing to evolve, our brand has earned the top position on social media – leading all direct competitors in reach and engagement on Facebook, Pinterest, Instagram, Houzz and Google+ channels. Through style boards, we provide homeowners a 'get the look' visual guide.

BLOG //

Whether from our team or others in the field, we share a plethora of home improvement tips and decorating ideas through engaging digital elements, including videos, blog series and social media content. progresslighting.com/blog

EXPERIENCE PROGRESS //

We're sharing, listening and engaging with our audiences through Experience Progress, our national magazine, and sharing trend insights through exclusive interview videos with key designers. Get to know us and join the conversation. Digital editions are available on progressdesignguide.com

MORE THAN JUST A LIGHTING MANUFACTURER

Design inspiration, product integration and technology leadership has been at the heart of Progress Lighting's success since 1906.

It's easy to continue on this path by going to work in a wildly creative and innovative building at our parent company's – Hubbell Lighting – headquarters that we call "home."

This 185,000 square foot headquarters in Greenville, SC leads the way in sustainable practices and has achieved a Silver rating under U.S. Green Building Council's LEED program.

It's imperative that we serve as good stewards of the environment as consumers and manufacturers – and that we lead the way for many others to follow.

Fixture Collections

LIGHTING IS NO LONGER THE SECONDARY PLAYER IN THE ROOM.

Light fixtures can serve as a focal point or functional work of art. Whether an oversized pendant, sparkling chandelier or eye-catching foyer fixture, lighting can be used to add personality to your home, enhance its perceived value and create memorable spaces. It offers something you can't achieve with other accessories – through light, contrast and reflection. The key to a good lighting plan is a layered approach that combines three types of light: ambient, task and accent lighting. Certain fixtures lend themselves to each category, and just the right combination can bring your home to life.

STYLE BOARD

URBAN INDUSTRIAL

Preserving the historic elements of a building creates the desired urban appeal for this particular style, ideal for the casual creative, young entrepreneur or imperfectionist.

THE LOOK

FURNISHINGS
Rustic

Incorporate rustic metal shelving and cabinets, and choose leather or canvas furniture to tie the other elements together.

COLOR PALETTE
Monochromatic

A consistent color palette comes naturally when incorporating elements like concrete, steel, metal and wood. Keep the look going by painting walls neutral colors.

MATERIALS
Vintage

Exposed brick, steel columns, wrought iron railings and concrete floors combine to achieve a warehouse feel that characterizes the urban industrial style.

THE COLORS

THE LIGHTS

SPOT THE TREND
METAL PENDANT LIGHTING

Fixture finishes like Antique Bronze and Brushed Nickel add to industrial style. Pendant lighting with Edison bulbs is also popular, and designers often use rustic fixtures to complete a room.

LIGHTING DESIGN TIP

Make a statement in smaller spaces by selecting on-trend lighting, such as Progress Lighting's Spicewood chandelier (shown above). The loft is a great example of Urban Industrial Style, which is ideal for those who enjoy sleek modern spaces, but crave bold character and a sense of history.

DESIGN **FEATURE**

Lighting can change or add to the overall design in the house. Because of the functional and decorative elements lighting fixtures bring, they immediately impact the look of a room."

CHRISTINA SANDERS

Executive Vice President of Carrington Homes

Featuring Ridge above kitchen island and Bravo over breakfast nook. (Image: Carrington Homes)

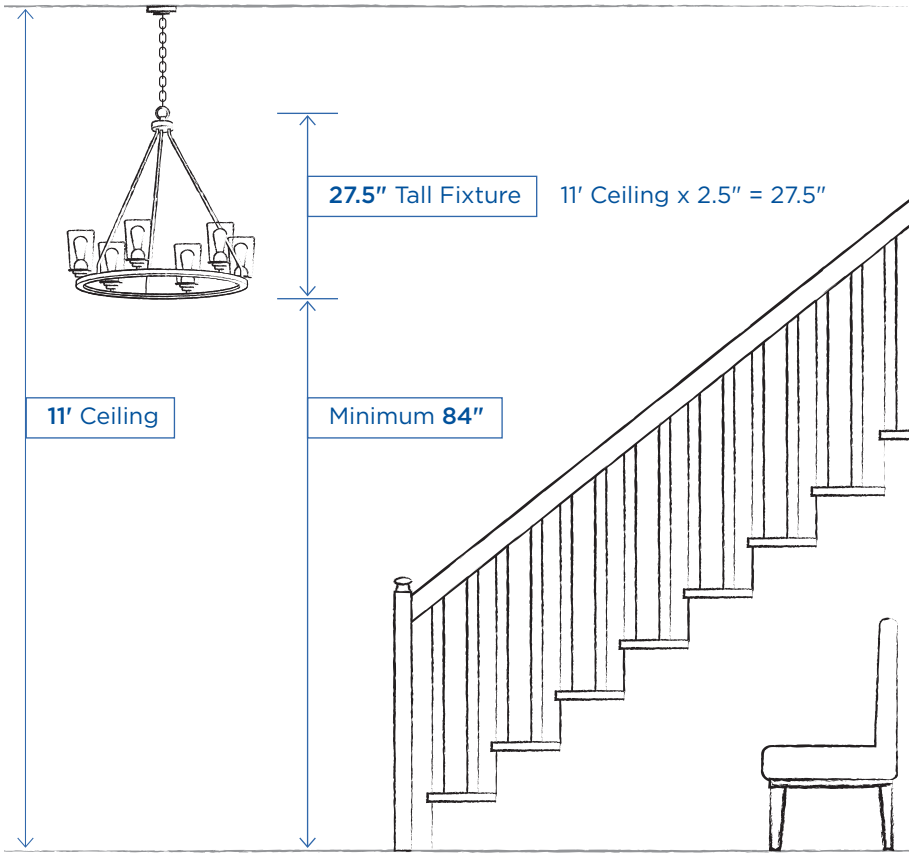
LIGHTING DESIGN TIP

The right lighting can bring elegance, charm and the right mood to your foyer, so long as it's hung at the right height. We've learned by some of the very best lighting designers across the U.S. there are general rules for how tall and wide a lighting fixture should be for its location. Every application is unique and involves analyzing your particular space.

Featuring Nissé (Image: Toll Brothers)

FOYERS

- Ensure your chandelier is not lower than 84 inches from the floor as to not interfere with the door or people passing underneath.
- For higher ceilings, consider a taller chandelier or selecting a more linear fixture design.
- The rule of thumb is to accommodate 2.5 - 3 inches of chandelier height for each foot of ceiling height. For example, a standard 8-foot ceiling requires a chandelier that is 20-24 inches in height.



DINING

- The table under the fixture should serve as a guide for selecting the right fixture for your space.
- Based on an 8' ceiling, your fixture should hang between 30-34" above the table.
- To calculate the correct width, start with the width of your table and subtract 12 inches. (For example, if your table is 42 inches wide, your chandelier should not be more than 30 inches wide.)

DESIGN+SERIES

WEST VILLAGE

A modern form with industrial-inspired accents are featured in West Village. Double prismatic glass shades provide a beautiful illumination effect. Visual interest continues with a three-spoke frame that holds each glass shade. Antique Bronze with antique brass accents or Brushed Nickel with chrome accents provide touches of mixed metal in all fixtures within the collection.

LIGHTING DESIGN TIP

The kitchen's lighting style is where you get to do the unexpected. It's a good idea to pick island pendants that define the space and are easy on the eyes.

Featuring Nisse

MOMENT Trying to start her day off right, Meredith enjoys a healthy smoothie after a morning jog. The *Moment* when you find a routine that works for you.

Meredith T., Graphic Design

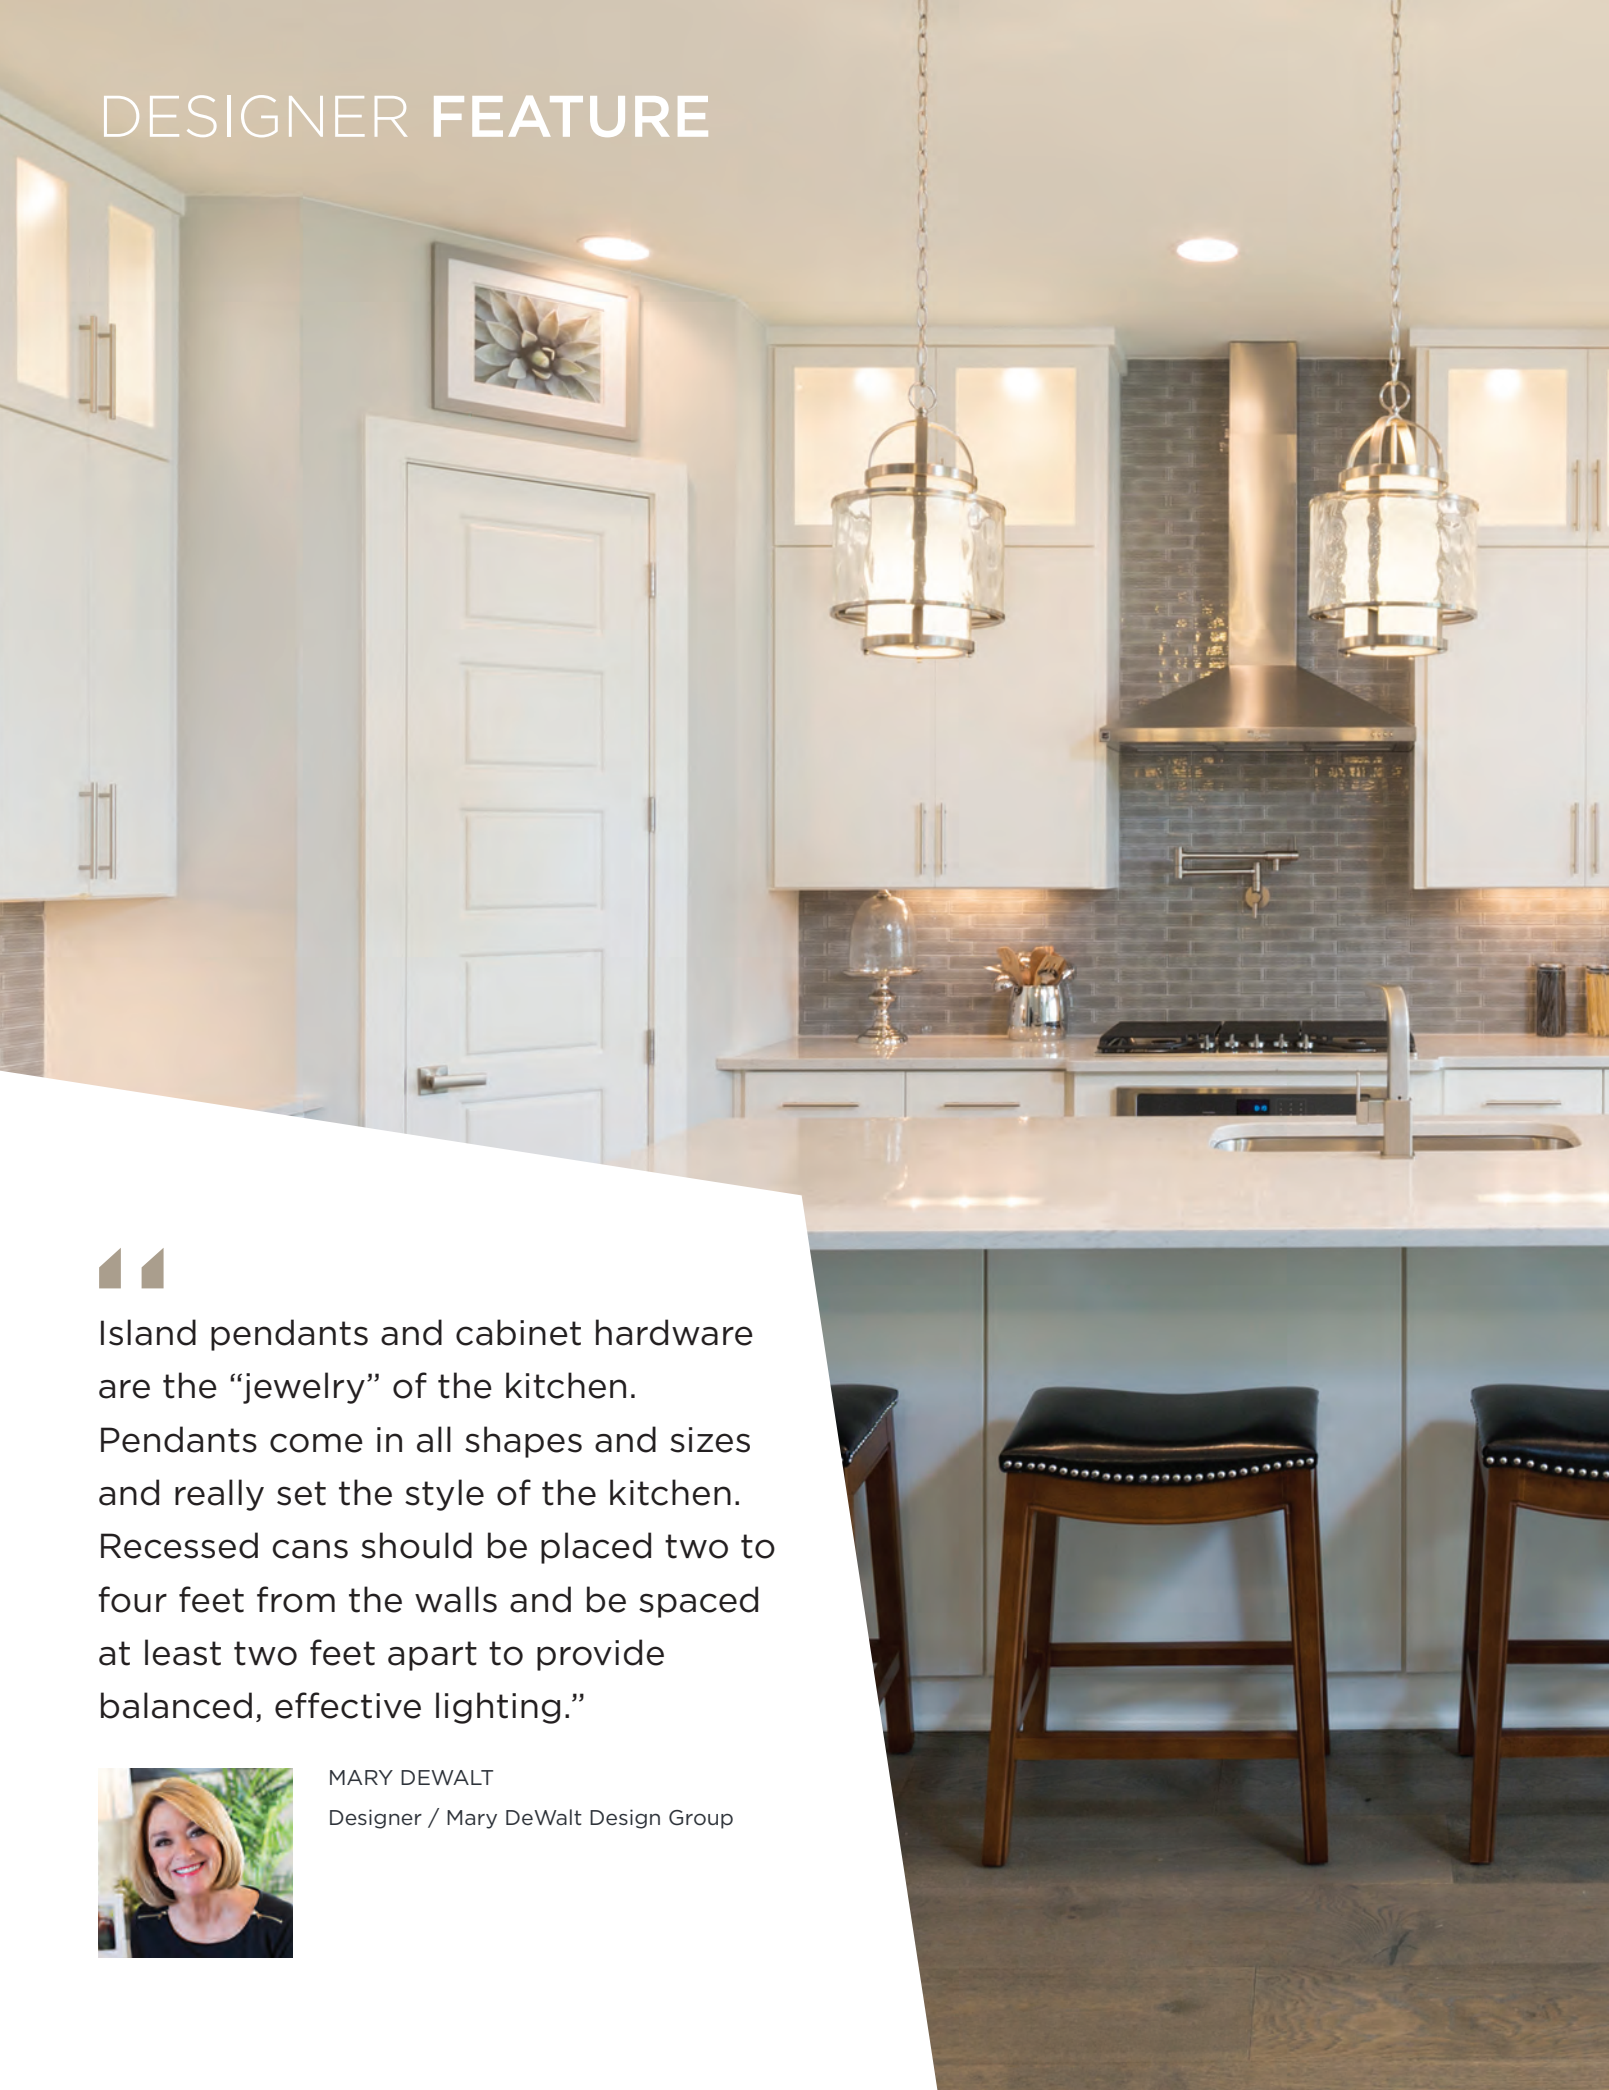
Pendants

THE KITCHEN IS OFTEN THE BUSIEST ROOM IN THE HOUSE.

Not only is food prepared here, but many activities such as eating, entertaining, homework, reading and relaxing are performed.

One of the greatest design tips for the kitchen is to suggest that all fixtures be dimmable so the light can be adjusted to meet specific needs. Since so many kitchens are located directly off a great room, it's nice to be able to lower the lighting levels once the food prep is done.

DESIGNER **FEATURE**



Island pendants and cabinet hardware are the “jewelry” of the kitchen. Pendants come in all shapes and sizes and really set the style of the kitchen. Recessed cans should be placed two to four feet from the walls and be spaced at least two feet apart to provide balanced, effective lighting.”

PENDANT AND MINI-PENDANT ACCESSORIES

Socket Collar Tool

P8685-01 Socket Collar Tool
2-5/8″ dia., 7-7/8″ tall.

The socket collar tool provides extra leverage and eliminates a loose fit when installing glass shades. Working like a wrench, the socket collar tool extends into the shade and tightens the socket ring, securing the shade in place, and can reverse to loosen the ring to remove the shade. This accessory can be used on a variety of fixtures, including chandeliers, mini-pendants, sconces and wall brackets.

LIGHTING DESIGN TIP

Having a central source of ambient light in all rooms is fundamental to a good lighting plan. Layered lighting designs incorporate different fixtures – such as close to ceiling – to illuminate different areas of the room. There are a variety of stylish flush mount designs that create an inviting visual atmosphere while lighting each area for its uses.

Featuring Fortune

MOMENT After choosing study hall over social events, Tae finally sees the light at the end of the tunnel as he looks forward to graduation. The *Moment* when you see your hard work beginning to pay off.

Tae K., Marketing

Close-to-Ceiling

LIGHTING HAS THE ABILITY TO MAKE OR BREAK THE LOOK AND FEEL OF YOUR HOME.

Without the right lighting, focal points, architectural details, unique textures, and even gorgeous colors can get lost.

As an added benefit, there are a variety of semi-flush and flush mount fixtures with LED sources, ensuring energy savings and maintenance benefits, as well as long-lasting general illumination to homeowners.

DESIGNER **FEATURE**

Lighting can draw you into a space by giving a clear path and highlighting special elements. Add decorative fixtures to integrate architectural features and to create an inviting space. This brings a room to life by evoking an emotional response."

LIGHTING DESIGN TIP

Whether you prefer direct lighting from a ceiling fan, or if you just want a set of blades, both options are becoming widely available. Ceiling fans with light kits can also be controlled by a dimmer so you can adjust illumination levels and set the room for a particular mood.

Featuring AirPro fan

Ceiling Fans

CONSUMERS TODAY HAVE A "LESS IS MORE" OUTLOOK ON PURCHASING DECISIONS.

As a result, lighting fixtures are expected to not only be functional, but decorative as well. Ceiling fans have begun to take the leap from simple appliances to fully functional and fashionable elements that complement other home accessories within a space.

Recently, ceiling fans without light kits have become popular in high-end designs. Rather than relying on a ceiling fan to provide the primary source of illumination in a room, the trend uses layers of different fixtures – like pendants, wall sconces and lamps – for lighting. The ceiling fan then becomes a functional and aesthetic element to the room.

DESIGNER **FEATURE**

Lighting, as a tool is quite often overlooked, as many clients don't realize the potential that it has to immediately impact and transform a space. Light can be invigorating, motivating, relaxing or calming. It truly is what makes a house a home."

Sconces

SCONCES WORK EVERYWHERE FROM HALLWAYS TO LIVING ROOMS.

The lamp source is hidden by a decorative shade and mounted on the wall, with light directed up or down.

Sconces are available in a variety of sizes and styles and work to enhance the overall lighting design within any room.

When displayed properly, wall sconces can flood a room with enough balanced lighting – so that you can comfortably enjoy favorite activities or highlight architectural items of interest.

DASH LED

Architecturally modern LED sconces, incorporates a creative design to wash light on the wall for a dramatic effect.

Bath Collections

THE BATHROOM SHOULD SERVE AS A PLACE OF AWAKENING, RECHARGING AND EVEN RELAXING.

Progress Lighting offers a variety of solutions – available in every style, budget and application – for bath and vanity areas. Lighting not only adds a beautiful decorative element to bath settings – but also ensures proper illumination to complete everyday grooming tasks, such as applying makeup or shaving.

STYLE BOARD

LUXURY

The Luxurious Connoisseur. Aspects such as natural elements, sleek design, ornate details, and statement decor define the ideal luxury lifestyle.

THE LOOK

FURNISHINGS
Sleek

Simple and sleek design, such as a sweeping staircase or elegant mantle, will accentuate the architecture of luxurious homes. Focus on lavish materials such as leather for furniture.

MATERIALS
Statement Decor

Designers look for lavish drapes and curtains to dress up large windows and unique art pieces for wall decoration.

AESTHETICS
Natural Elements

Natural elements like glass, marble, stone and fine wood are used in the luxury design approach to convey a sense of strength and everlasting beauty.

THE COLORS

THE LIGHTS

SPOT THE TREND
SOPHISTICATED LIGHTING

Using Silver Ridge and Brushed Nickel finishes brings the luxury trend to life. Chandeliers and pendants celebrate the element of sparkle through a sophisticated design.

LIGHTING DESIGN TIP

Crown your master bath with a dazzling set of pendants for an unexpected element of luxury. An elegant statement piece can set the scene to help unwind after a long and stressful day. Pair with some candles and flowers for the ultimate retreat.

DESIGNER **FEATURE**

“This model home features transitional design styling, combining traditional aspects with updated features, such as Nickel finishes. For the entrance, we selected a series of three Inspire pendants that welcome guests and homeowners as soon as they walk through the front door.”

LIGHTING DESIGN TIP

The amount of light in your bathroom should influence your decision on color, while dark wall or accessory colors can be fabulous, you want to make sure the bathroom gets enough natural light, or displays a layered lighting approach.

LIGHTING TECHNIQUES / **BATH + VANITIES**

SINGLE BOWL VANITIES
Position fixtures on both sides of the mirror to provide shadow-free lighting for your face. Ideal width is at least 28" apart and centered 66" above the floor, depending on mirror size.

VANITIES WITH TWO SINKS
Consider mounting two separate fixtures, one above each sink.

TASK LIGHTING
Center recessed downlights 24" to 36" between where the face and the mirror are at the vanity to eliminate shadows.

GENERAL LIGHTING
Include several recessed downlights in areas larger than 100 square feet. Companion close to ceiling fixtures supplement wall sconces in larger spaces.

Outdoor & Landscape

OUTDOOR LIGHTING ENHANCES THE BEAUTY OF YOUR PROPERTY WHILE PROVIDING SAFETY AND SECURITY.

Outdoor lighting also allows you to take advantage of your outdoor spaces after dark, while adding value to your home. Landscape lighting can make a property shine in more ways than one. With proper planning, lighting can help create a usable and safe outdoor space, and also complement a home's exterior.

STYLE BOARD

RUSTIC FARMHOUSE

Clean and simple with a country flair, this style's characteristics include rich wood tones, rustic antique decor, a white color palette and an open floor plan.

THE LOOK

FURNISHINGS
Simplicity

This style represents the simplicity and common sense functionality of country living while incorporating an antique charm to any lifestyle.

COLOR PALETTE
Clean White

Stick to a white color palette throughout the home and accent with organic items and plants. This creates a clean, simple look.

MATERIALS
Rich Wood Tones

Designers love to find weathered, antique-style decor to flatter this country feel. Spruce up the design with fun accessories.

THE COLORS

THE LIGHTS

SPOT THE TREND
RUSTIC ANTIQUE LIGHTING

Fixture finishes like Antique Bronze add to the Rustic Farmhouse style. Designers often use fixtures with rich wood tones, such as Turnbury, to complete a room.

LIGHTING DESIGN TIP

Outdoor lanterns can work to preserve an older home's overall character, while providing a refreshing update. This bungalow boasts new Cadence outdoor fixtures, yet is able to maintain the charming style that defines the neighborhood.

DESIGN **FEATURE**

LIGHTING DESIGN TIP

As more homeowners view their exterior areas as a key location for entertainment and relaxation, the design, functionality and efficiency of outdoor lighting has taken center stage. Consider all perspectives when tackling a lighting design plan to extend the outdoor living season.

OUTDOOR LED SOLUTIONS

I encounter people who are confused by all the LED options out there. Or, maybe they've had a bad experience from an LED product in the past. Don't be afraid to ask an expert if you're intimidated by lighting technology."

LIGHTING TECHNIQUES / **WHY CHOOSE OUTDOOR LED?**

THEY'RE SAFE

LEDs don't produce an exceptional amount of heat like other landscape and outdoor options.

THEY SAVE ENERGY

Because outdoor lights are often left on for hours at a time, energy saving benefits are even more applicable to outdoor settings.

THEY'RE LOW MAINTENANCE

An LED lamp can last up to 20 years!

BENEFITS OF A WELL-LIT EXTERIOR

SECURITY // Increasing light levels to allow visibility in both lit and unlit areas can deter intruders.

SAFETY // Properly lit walkways and stairs helps to prevent falls.

USABILITY // You can extend the outdoor living season and enjoy decks and patio areas with a well lit environment.

AESTHETICS // Consider the visual experience of guests and light focal points to bring out the beauty of the property.

OUTDOOR LED FOUR WAYS

1 WALL LANTERNS

Like down lights, LED wall lanterns contribute to the mood of outdoor living areas. Make guests feel at ease in your outdoor space by positioning wall lanterns around popular gathering spaces.

P6057-3130K9

2 DOWN LIGHTS

Shine LED down lights on areas ideal for outdoor entertaining. Recessed LED fixtures create a comfortable environment and add to your home's safety and security.

P8071-09-30K

3 SPOTLIGHTS

LED spotlights can be used to highlight architecture, gardens and key focal points of your landscape design. Spotlights also add visual intrigue to exterior areas, boosting curb appeal.

P5299-31

4 PATH LIGHTS

Guide guests along exterior pathways and steps using LED path lights.

A classic colonial wall lantern with contemporary touches describes Santee. Featuring a geometric frame and graphic handle, the wider beveled glass offers more refraction – and visual interest – than typical lantern designs. Choose from a Black frame with stainless steel candle option or an Antique Bronze frame with painted brass candle option.

LANDSCAPE LIGHTING DESIGN TECHNIQUES

Progress Lighting offers the following tips and design techniques to follow when planning landscape design, ensuring your yard will be a wonderful environment where your friends and family can relax.

Path Lighting

Lighting along paths and driveways enhances the overall theme of your outdoor space while preventing accidents in the dark.

- Position lights on alternate sides for even illumination
- Define edges by positioning lights about one foot from one or both sides of the path
- Position lights to avoid shadows when used at steps, as well as away from plants so they don't interfere with light distribution

Uplighting

Highlight or accent distinct plants, trees or accessories in your yard by positioning in-ground lights close to your focal point.

The best way to enhance the texture of objects outdoors is by mounting spotlight or floodlight fixtures on the ground.

Security Lighting

Decorative outdoor lighting designs can also add security features for your home. The majority of residential crimes take place after dark – when thieves feel they cannot be seen.

A well-lit yard can be an excellent crime prevention method and fixture options designed specifically for security, like motion sensors, can add extra protection and convenience. Consider using PAR lampholders on the corners aimed down each wall of your home.

Accent Lighting

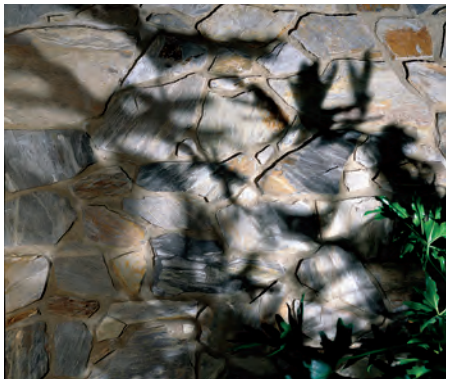
Also known as spot lighting, this effect uses cross lighting and uplighting techniques to showcase a particular item in your garden with bright light in an otherwise dark area. Use an accessory shield to avoid glare.

Decks and Porches

It's important to outline the perimeters of the deck and railings, as well as provide safety for nighttime use on decks and outdoor porches. Use low voltage (12V) fixtures for maximum electrical safety.

Grazing

Grazing light is an effect that illuminates the outline of a particular tree, shrub or architectural feature to enhance its shape and texture. This must be done precisely and it usually requires mounting a carefully positioned spotlight 6 to 12 inches from the surface.

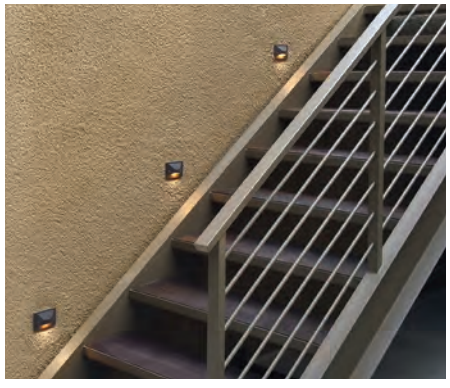


Shadowing

Add an elegant, but mysterious, touch to your outdoor design with this effect. Shadow lighting is typically achieved with uplighting placed out of sight to create silhouette images of trees, plants, and accessories.

Silhouetting

Produce an awe-inspiring effect by placing light fixtures directly behind your subject. Lights mounted near the bottom of a tree or shrub will cast the plant's shadow against the sky for an intriguing twilight display. This technique is often used near the home for an appealing façade.



Step Lighting

To increase safety, step lighting uses small fixtures that are typically shielded to cast a soft, glare-free light across steps and decks.

Install one step light on every other riser and use louvered wall plates to avoid glare.

LED PATH

Several LED landscape lighting options are available for popular exterior applications. Low voltage LED landscape, bollard and path lights enhance outdoor settings, while adding safety, security and curb appeal to areas around the home. 3000K color temperature.

TRANSFORMERS

PLUG-IN COMPATIBLE TRANSFORMERS

- Multiple secondary taps of 12, 13 and 15 volts allow maximum light output and lamp life for long or short runs and loading variations (300, 600 and 900 watt units only)
- Three foot 12 gauge cord with grounding plug
- Thermal protection in the primary circuit to avoid overheating
- Resettable circuit breakers in secondary circuits for electrical safety and convenience
- Weatherproof construction, powder-coat painted (P8590-31, P8591-31, P8592-31, P8522-31 and P8523-31)
- Stainless steel construction (P8519-01, P8520-01 and P8521-01)
- Easy open enclosure with KO's for hardwiring and photocell installation
- Easy wire terminal board for secondary connections
- For outdoor use
- Plug in timer and photocell compatible, page 749

Utility

IT IS IMPORTANT TO CONSIDER BOTH FUNCTION AND AESTHETICS WHEN DECIDING ON YOUR HOME LIGHTING PLAN.

While lighting is often seen as the "jewelry of the home," due to its ability to stylize a space, decorative fixtures must be supplemented with task and ambient lights for a comprehensive lighting package that promotes both fashion and function. Undercabinet, track, directionals and recessed fixtures are key contributors to a high quality lighting plan.

STYLE BOARD

TRANSITIONAL

The best of contemporary & traditional elements is what the transitional style offers. This home maintains the warmth of traditional with the brightness of contemporary.

THE LOOK

FURNISHINGS
Straight Lines & Round Profiles

Simple silhouettes are ideal for transitional furnishings. Furniture pieces have crisp profiles and straightforward style, cleverly combining curves with straight lines.

COLOR PALETTE
Warm Neutrals

Tone-on-tone palettes and warm neutrals like beige, ivory, and tan are ideal for a luxurious transitional space. This lack of bold color creates a serene atmosphere for relaxation.

MATERIALS
Textured

A steady mix of textures is important in the transitional home. Textured materials such as leather, burlap, tweed, and cotton are celebrated throughout different areas.

THE COLORS

THE LIGHTS

SPOT THE TREND
SIMPLE CASUAL LIGHTING

Transitional lighting fixtures marry contemporary and modern details. Fixtures that maintain a traditional shape may include simplified, casual details. Modern forms are adorned with bebeches.

LIGHTING DESIGN TIP

Rather than always choosing lighting from the same collection, it's now possible to enjoy the flexibility of mixing and matching complementing fixtures.

DESIGNER **FEATURE**

“Lighting can change or add to the overall design in the house. Because of the functional and decorative elements lighting fixtures bring, they immediately impact the look of a room.”

DORIS PEARLMAN

Designer / Possibilities for Design

Featuring Format over kitchen island and Greyson over breakfast nook (Image: Toll Brothers/Possibilities for Design)

LIGHTING DESIGN TIP

Position a series of hanging pendants over an island to enhance the overall design and theme of a space. This also provides more light on the counterspace to help with activities, such as drying dishes or cutting lemons.

LIGHTING TERMS

LUMINAIRE
Light fixture, including the lamp (bulb).

LED SOURCE
Light Emitting Diodes (LED): LEDs are semiconductor devices that produce visible light when an electrical current passes through them. Generally speaking, LEDs are more efficient, durable, versatile and longer lasting than traditional light sources.

COMPACT FLUORESCENT LAMP (CFL)
CFLs are fluorescent light bulbs that have been compressed into the size of a standard-issue incandescent bulb. Modern CFLs typically last at least six times as long and use around a quarter of the power of an equivalent incandescent lamp.

LIGHT MEASUREMENTS

LUMEN
The most common measure of light output. Lumens measure the amount of light produced by a bulb. The more lumens in a light bulb, the brighter the light.

WATT
A measure of electric power (not how bright a light is). The rate at which electric energy is transferred by an electric circuit.

EFFICACY
A measure of how much light a source produces for every watt of power it consumes. Expressed in lumens per watt.

COLOR RENDERING INDEX (CRI)
A unit of measure that defines how well colors are rendered. The CRI means better color rendering, or less color shift. CRIs in the range of 75-100 are considered excellent. An incandescent lamp operates at 100 CRI.

LED STRIPS UNDERCABINET SYSTEMS

Hide-A-Lite 4 LED Tape lighting for under cabinets and coves: Add aesthetic, energy efficient and functional lighting in the most used areas of your home: kitchens, utility rooms, laundry rooms, wet bars, display cases. Mount securely under cabinets with Hide-a-Lite's durable adhesive backing.

PROGRESS LED
HIDE a LITE 4

FOLLOW FOUR SIMPLE STEPS:

1. Choose a Tape Length

Select LED tape strip length. Hide-a-Lite offers 2"L, 12"L and 60"L size options. Mounting clips are included. (Install in rows of two or more to aid in task lighting or enhance lighting effects.)

2. Select Transformer

Progress Lighting's 24V transformer emits no audible noise, is moisture and shock resistant and employs automatically resetting short circuit protection. Also it is dimmable with an electronic low-voltage dimmer.

3. Use Connectors to Customize Project

Connector cords and L-connectors can increase length and help navigate corners. Choose between a variety of connector cords to allow end-to-end connection.

4. Complete the Look

Select end caps to finish and complete the look.

1. CHOOSE A TAPE LENGTH

- 120 lumens per foot and consumes 3 watts per foot
- Field cuttable at every 2" to end of run.
- CETL listed damp location

2. SELECT TRANSFORMER

P8683-31 Black
24V 100w LED tape transformer
5" L., 2" W., 1" ht.

- Hard wire 100w 24V zero load transformer
- High power factor >95%
- Maximum operating temperature -20° C to +90° C
- Electronic circuit design with short circuit and overload protection with auto shut down/reset
- Sound rated A, emits no audible noise
- Integrated 5-pin female connector for direct connection to the 1st LED strip in the run

Electrical

Each fixture includes 120V dimmable electronic power supplies rated for long-life continuous use. An on/off rocker switch is included.

Lamping

70% lumen maintenance over 35,000 hours. 3000K, 80+ CRI.

Construction

Extruded aluminum frame, polycarbonate end plates match frame finish. Tempered micro-prismatic glass lens.

Linkable

The system can be powered from a single location using the P8740 direct-wire junction box (each fixture can also be direct-wired individually). Using the HAL3 linking cable accessories (P8733-P8743), the fixtures can be linked together to form a continuous row of illumination. (Note: The linking cables can be used with or without the use of the P8740 junction box. See page 770 for cables and junction box).

Dimming

Smooth and continuous dimming on many incandescent dimmer switches. (Note: Reference manufacturers' minimum load requirements for dimmer switches). (Except P7002)

12-VOLT TRANSFORMERS

These magnetic transformers (except 60w) have a special feature to provide either 12 volts or greater output to compensate for loading and to maximize lamp life.

- All units are UL listed for dry locations.
- All but the P8604-31 unit can be mounted vertically or horizontally, and feature in-line secondary magnetic breakers to protect against short circuit.
- The P8655-31 Unit has two 300 watt circuits on the secondary and requires balanced loads on each for optimum operation.
- Switches and dimmers (induction type only) must be installed on the primary (input) side only of the low voltage transformers.
- Transformers can be loaded up to the maximum rating.
- All units feature overload protection.

Brushed Nickel

Alpha Trak single-circuit track sections are extruded aluminum with flat copper conductors for positive contact and can be field cut to required lengths. All have easy-guide polarity notch. Designed for 120-volt supply with 20 amp capacity (2,400 watts). Order power feeds and system hardware separately as required.

ALPHA TRAK® CONNECTORS

For joining two or more track sections in straight runs, “L”, “T”, cross, square and “any angle” patterns. The connectors plug into track sections only one way to ensure positive polarization.

WHEN IT COMES TO LIGHTING YOUR HOME, IT'S IMPORTANT TO CONSIDER A LAYERED LIGHTING APPROACH.

This will highlight your room's best features, improve functionality, and create an inviting atmosphere. Choosing the right mix of lighting can really bring your home to life. And with so many choices, recessed lighting is one you don't want to forget.

STYLE BOARD

TRADITIONAL

New traditional spaces are timeless, but still allow for a little fun and youthfulness to keep your style fresh. In traditional rooms you'll find elegant additions.

THE LOOK

FURNISHINGS
Deep Wood

Darker wood tones such as walnut, oak, mahogany and cherry are prevalent in the traditional home. Fine woodwork is appreciated in many forms: railings, beams and bookcases.

AESTHETICS
Monochromatic

Notable trends in traditional furniture include overstuffed sofas, skirted furniture and an abundance of plush accented pillows.

PATTERNS
Bold Trim

Carved unique moldings and statement trim are key traits in this style. Gilt-framed mirrors, ball and claw furniture legs and detailed frames around oil paintings are key.

THE COLORS

THE LIGHTS

SPOT THE TREND
STATEMENT LIGHTING

Chandeliers with Antique or Forged Bronze finishes add to the traditional style. Chandelier lighting with bold trim is popular, and designers often use detailed fixtures to complete a room.

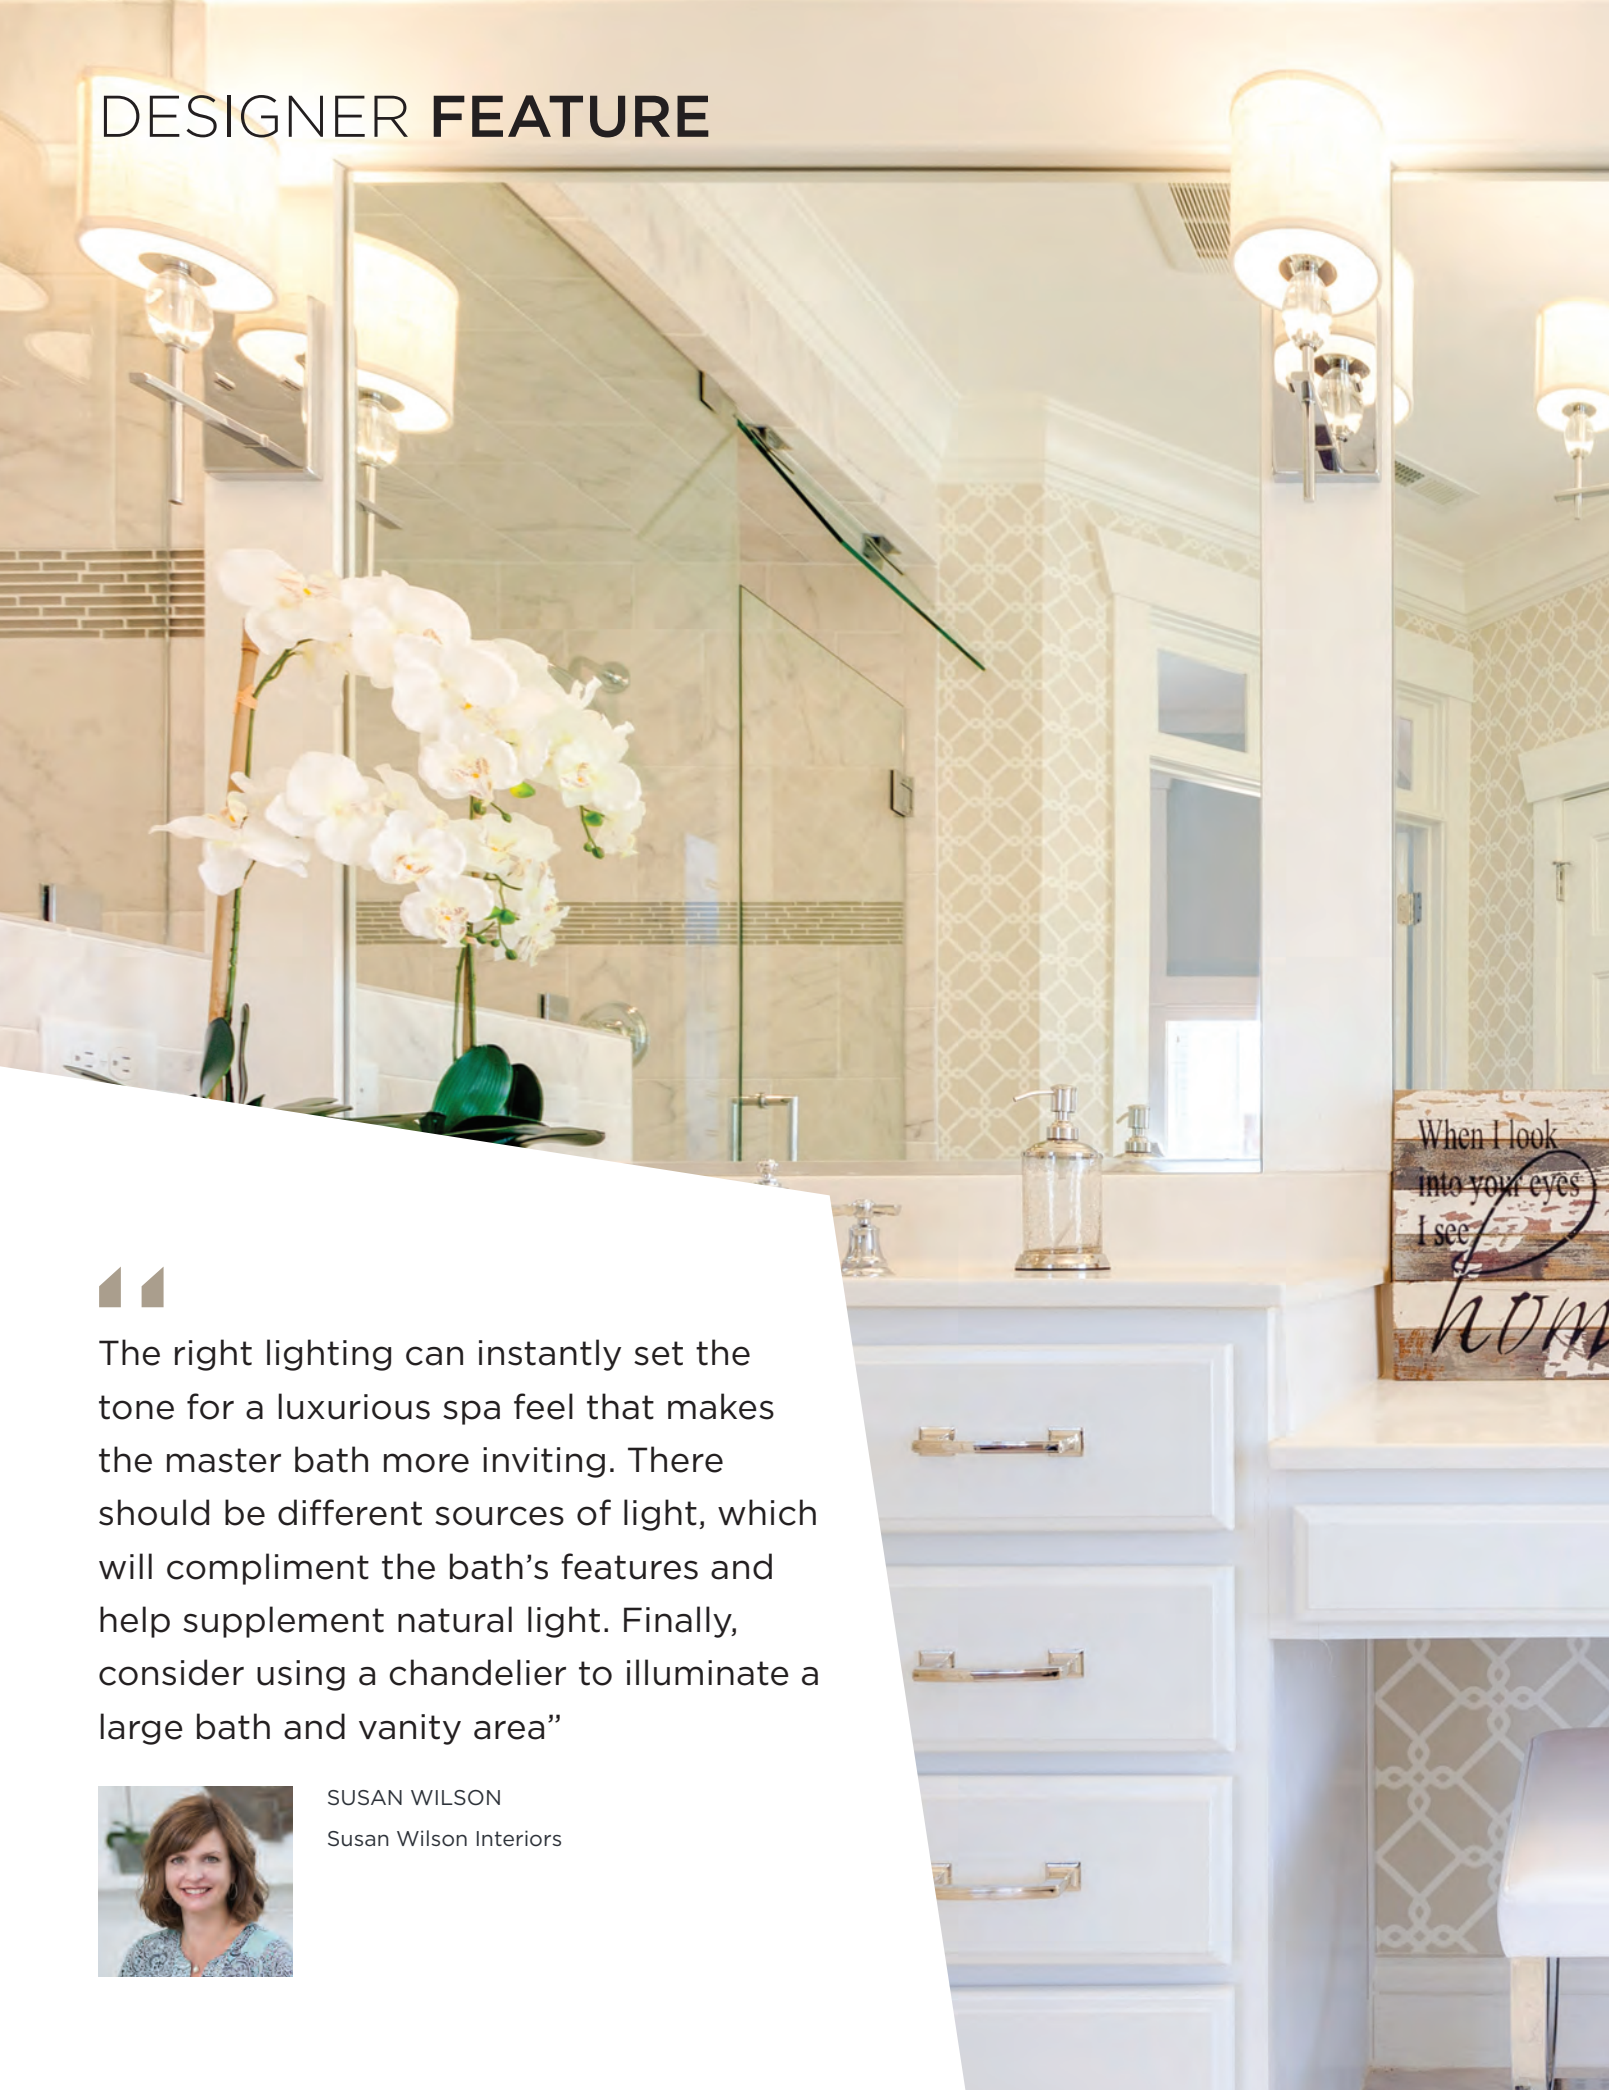
LIGHTING DESIGN TIP

Designers have gotten creative when outfitting expansive entryways for larger homes. Rather than selecting one chandelier, consider grouping pendants together to create a welcoming statement.

DESIGNER **FEATURE**



“The right lighting can instantly set the tone for a luxurious spa feel that makes the master bath more inviting. There should be different sources of light, which will compliment the bath’s features and help supplement natural light. Finally, consider using a chandelier to illuminate a large bath and vanity area”

LIGHTING DESIGN TIP

Create a relaxing environment in the master bedroom with a neutral color palette and by selecting glare-free lighting that contributes to a soothing atmosphere.

LIGHTING TECHNOLOGY / **LIGHTING IN ACTIVE ADULT DESIGN**

Home lighting can have a profound effect on quality of life, especially as we age. According to the American Lighting Association (ALA), a 60-year-old needs twice as much light as a 30-year-old to perform the same seeing task with equal speed and accuracy. Additionally, it's important to note that most commonly found lighting guidelines are written for a 30-year-old occupant.

Progress Lighting offers efficient, functional and decorative families at competitive price points to meet the unique needs of aging inhabitants.

A layered lighting approach is key. The ALA reports that after age 60, eye and visual system changes accelerate so that less light reaches the eye. Therefore people need more light to see details.

It's important that a home accounts for ambient (general illumination), task (direct illumination in place for specific tasks) and accent illumination (for visual appeal and safety).

THE BENEFITS OF LED FOR ACTIVE ADULTS

LED sources are a great solution for aging inhabitants for a number of reasons, including:

SAFETY BENEFITS

Traditional incandescent sources waste energy – especially through heat energy. LED lamps produce almost no heat, which eliminates the risk of burns.

ENERGY SAVINGS

LED lamps can pay for themselves through energy and maintenance savings, while providing aesthetically pleasing lighting. They also require low maintenance as the bulbs can last decades.

LIGHT OUTPUT

As we grow older, our eyes get more sensitive to light sources. Luckily, increases in efficacy (lumens per watt) and warm white color consistency make LED options gentle on aging eyes.

COLOR OUTPUT

The key to selecting the right LED fixtures for aging individuals is to have a warm color temperature (2700-3000K) and high color-rendering index (90 CRI or above).

RECESSED ENCLOSURE FOR NON-IC HOUSINGS IN IC APPLICATIONS

- Material is Coroplast™, which is made from polypropylene co-polymer resin
- Deflection temperature F(@66psi) = 194 (90°C)
- Melting point = 162°C, 324°F
- Normal termperature performance range = -17°F to 160°F
- MSDS available upon request

APPLICATION

- Use to create a barrier to keep insulation from making contact with the following type Non-IC rated recessed housings: P60-FB, P62-FB, P821-FB, P821-FBFC, P85-FB, P831-FB, P85-TG, P830-TG, P86-TG, P816-TG
- Requires no insulation on top

U.S. Patent #: 6,872,885

P8555-01 IC Barrier
Creates a barrier to prevent insulation from making contact with recessed fixtures. For use only with Firebox, Pro-Optic, P816, P830, P85-TG, and P83. For use with any other Progress fixture consult factory.

Note: The P8555-01 does not make recessed housings IC-rated.

Dimensions: 24-1/2"W. x 35"Ht.

Every effort has been made to ensure the accuracy of information in this catalog. Progress Lighting reserves the right to make product changes from time to time, without prior notification, which may change the information provided in this catalog. Errors brought to our attention will be corrected in subsequent issues.

UL Listed or Classified or CSA Certified unless otherwise noted.
Bulbs not included with fixtures unless specified. Specifications subject to change without notice.

Metal finishes not specified as “solid” have quality plated or painted finishes.

Finish representations are high resolution digital reproductions, and, while every effort has been made to render colors accurately, they may vary slightly from the actual product, especially hand-painted finishes, due to the nature of hand craftsmanship.
