Assembly Instruction Sheet #IS-NY8339AC For Style NY8339AC

Tools Required: Flathead screwdriver, Phillips screwdriver, pliers, wire cutters, wire strippers, electrical tape, safety glasses.

Bulb Recommended: (4) Candelabra Base 60W Maximum

Estimated Assembly Time: 20-30 minutes

Preparation: Identify and inspect all parts before beginning installation. Check package content list and diagrams below to be sure all parts are present. If any parts are missing or damaged, do not attempt to assemble, install, or operate the fixture. Contact customer service for replacement parts.

Warnings and Cautions

Turn off electricity at circuit breaker or main fuse box before installation. Consult a licensed electrician if in doubt.

These instructions are provided for your safety. It is very important you read them completely before installing the fixture. We strongly recommend that a licensed, professional electrician perform the installation.

Disconnect fixture from power source before replacing bulbs. Make sure bulbs are given sufficient time to cool before removal. Do not subject glass parts to any shock while in operation or shattering may result.

Package Contents

Part	Description	Quantity
A	Crossbar	1 pc.
B	Mounting Screw	2 pcs.
C	Lock Washer	2 pcs.
D	Hex Nut	2 pcs.
E	Mounting Ball	2 pcs.
F	Fixture Body	1 pc.

Thank you for purchasing a Quoizel product.

Assembly Instruction Sheet #IS-NY8339AC

For Style NY8339AC

STEP 1 – Attach Mounting Screws, Lock Washers and Hex Nuts to Crossbar

- Line up a set of holes on the Crossbar (A) and Holes on the backplate of the Fixture Body (K).
- Thread Mounting Screws (B) into the holes on the Crossbar (A), pass Lock Washers (C) and thread Hex Nut (D) onto the Mounting Screws (B). Hand tighten until snug.

Figure 1

STEP 2 – Attach Crossbar to Outlet Box

- Attach the Crossbar (A) to Outlet Box and secure by threading Outlet Box Screws (not supplied) into the Mounting Holes on the Outlet Box. Tighten until snug.

Figure 2

STEP 3 – Attach Lanyard

- The purpose of the lanyard is to provide the installer a means to support the fixture from the junction box while connecting the electrical wires. This enables the fixture to hang from the junction box and your hands are free to make the wire connections.
- Turn the Button Stop so it may be inserted into the Inner Backplate slot. Make sure the Button Stop is completely inside the crossbar. Slowly release the fixture to make sure it is supported by the Button Stop. Proceed to the wiring steps. Once you are complete with the wiring there is nothing to do with Lanyard. The Lanyard will push into the junction box when the fixture is placed for final mounting.

STEP 4 – Make Wire Connections

- Use standard wire connectors to make all wire connections. (Connectors are not included with fixture.) Strip and prepare wire ends according to instructions supplied with connectors.
- Connect White Supply Wire from the Outlet Box to White Wire from fixture.
- Connect Black (or Red) Supply Wire from the Outlet Box to Black Wire from fixture.
- Connect Ground Wire from the Outlet Box to Ground Wire from fixture.
- Twist connectors until wires are tightly joined together.
- Wrap each connection with approved electrical tape and carefully stuff all the connected wires into the Outlet Box.

Figure 4

Figure 5

STEP 5 – Attach Fixture Body to Mounting Screw

- Place the backplate of the Fixture Body (F) over the Mounting Screws (B) and secure with Mounting Balls (E). Hand tighten until snug.

STEP 6 – Install Bulb

- This fixture uses standard bulb with a candelabra screw base. Maximum 60 watts.
- Place the bulb from the bottom of the glass frame. Insert bulb and screw snugly into place.

Figure 7

STEP 7 – Apply Silicone Sealer

- To prevent moisture from entering the wire compartment, apply a small amount of silicone sealer (not included) to the threaded side of the mounting balls (H) and then install them onto the mounting screws (D/E). Wipe off excess caulk.
- Make sure exterior wall surface and fixture backplate are free of dirt before applying caulk. Using exterior grade caulk, start on one side of fixture backplate and follow contour, where the fixture backplate meets the exterior wall surface upward. Proceed to caulk over top of backplate and down other side. Do not caulk bottom of fixture backplate to ensure proper moisture drainage.

Your fixture is now assembled and ready to use.
Enjoy!
