Assembly Instruction Sheet #IS-QR1169 FOR STYLE QR1169

STEP 1 – Mark Points for Mirror Hangers

- Lift and position where the Mirror will reside on the wall surface and with a tape measure, mark distance from floor to the bottom edge of the frame with a pencil. Mark should be located at a point representing $\frac{1}{2}$ of mirror width.
- Place the Mirror on a flat surface with back facing you. Measure the distance from the bottom edge of the Mirror Frame to the middle of Rope. This represents distance "B" in the illustration.
- With tape measure, add this distance to Mark "A" on wall surface and mark with pencil.
- Measure 3" up from Mark "B" and mark. These marks are locators for the (1) Mirror Hanger (A).

Figure 1

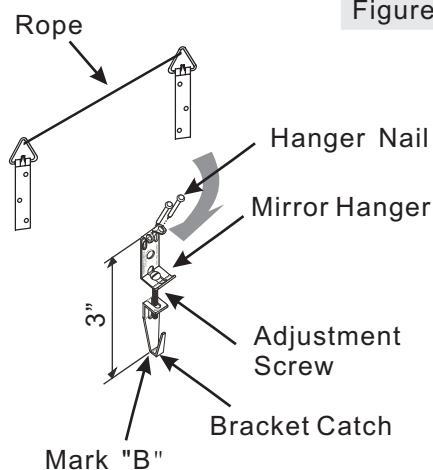

STEP 2 – Locate Mirror Hangers and Mirror

- Locate the Mirror Hanger (A) and align the top center with 3" Locator mark. Secure it to wall surface with Hanger Nails (B).
- With the help of another person, pass the Rope at the back of the Mirror over the Mirror Hanger (A) so that the middle of the Rope rests on the inside of the Bracket Catches. Please note that you can easily level the mirror by adjusting the Rope locations in the Mirror Hanger.

Clean glass with household glass cleaner. Retain this sheet for future reference.
