Assembly Instruction Sheet #IS-QR1412

For Style QR1412

STEP 1 – Mark Points for Mirror Hangers

- Lift and position where the Mirror will reside on the wall surface and with a tape measure, mark distance from floor to the bottom edge of the frame with a pencil. Mark should be located at a point representing $\frac{1}{2}$ of mirror width.
- Place the Mirror on a flat surface with back facing you. Measure the distance from the bottom edge of the Mirror Frame to the middle point of (2) Hangers. This represents distance "B" in the illustration.
- With tape measure, add this distance to Mark "A" on wall surface and mark with pencil.
- Measure distance between (2) Hangers. Add this $\frac{1}{2}$ distance from Mark "B" on each side and mark with pencil. (Distance "C" in the illustration)
- Measure 3" up from Mark "C" and mark. These marks are locators for the (2) Mirror Hangers. Check for marks straightness with level.

STEP 2 – Locate Mirror Hangers and Mirror

- Locate Mirror Hangers (A) and align the top center with 3" Locator mark. Secure them to wall surface with Hanger Nails (B). **Please be noted that the Mirror Hangers are fully adjustable allowing for easy leveling.**
- With Mirror Hangers properly installed, be sure to make sure that the (2) Bracket Catches are approximately equal in length from the top of Mirror Hangers. Adjust overall length with Adjustment Screws.
- With the help of another person, pass the Hangers on the back of the Mirror over the Mirror Hangers (A) so that the Hangers rest on the inside of the Bracket Catches.

Clean glass with household glass cleaner. Retain this sheet for future reference.
