

ASSEMBLY INSTRUCTIONS FOR YOUR DAVE TABLE LAMP

IMPORTANT SAFETY INSTRUCTIONS

- *This portable lamp has a polarized plug (one blade is wider than the other) as a feature to reduce risk of electric shock.
- *This plug will fit in a polarized outlet only one way. If it does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Never use with an extension cord unless the plug can be fully inserted.
- *DO NOT ALTER THE PLUG.
- *Turn the power off (remove electrical plug from outlet) before replacing light bulb, making sure the lamp has cooled.
- *Do not subject the lamp to any shock while lit as shattering of bulb may result.

ASSEMBLY INSTRUCTIONS:

1. Remove all parts from carton. Do not throw away any parts.
2. Place base on a level surface.
3. Insert one (1) 60W MAX. Type A bulb into socket.
4. Remove protective plastic (D) from polarized plug (C). Insert polarized plug (C) into wall outlet.

ADJUSTMENT INSTRUCTIONS:

This well engineered lamp is designed to stay in any adjusted position. Transportation and handling (repeated repositioning) can loosen tension knobs and cause decreased adjustability. To tighten knobs, see instructions below:

1. Cover tension knobs (A) and (B) with a soft cloth to protect the finish.
2. Use a pair of pliers (not included) to turn the tension knobs (A) and (B) until hand tight. Repeat as needed.

To clean, use a soft cloth only. Do not use any chemical or abrasive cleaners as they can damage the finish.
