Instructions for crystal trimming STEPS 22 - 29

22

You will need 8 - C10
25 Watts Recommended
60 Watts Max

23

Screw Crystal Ball "N590" onto bottom of chandelier. Tighten setscrew with tool provided.

24

Screw Spikes #4000/3/1 onto frame.

25

Trim canopy first so that colors will be distributed properly. Use trim from trays "A" and "B".

NOTE 1: Pinch the wire hooks to attach each crystal securely to frame.

NOTE 2: Scrollwork is asymmetrical, so that in the next step you will be attaching the crystals at different heights and points as you go down the chandelier.

26

Using Crystal "A", move around the chandelier, working your way down the body, trimming from top to bottom. See indicated locations on diagram.

27

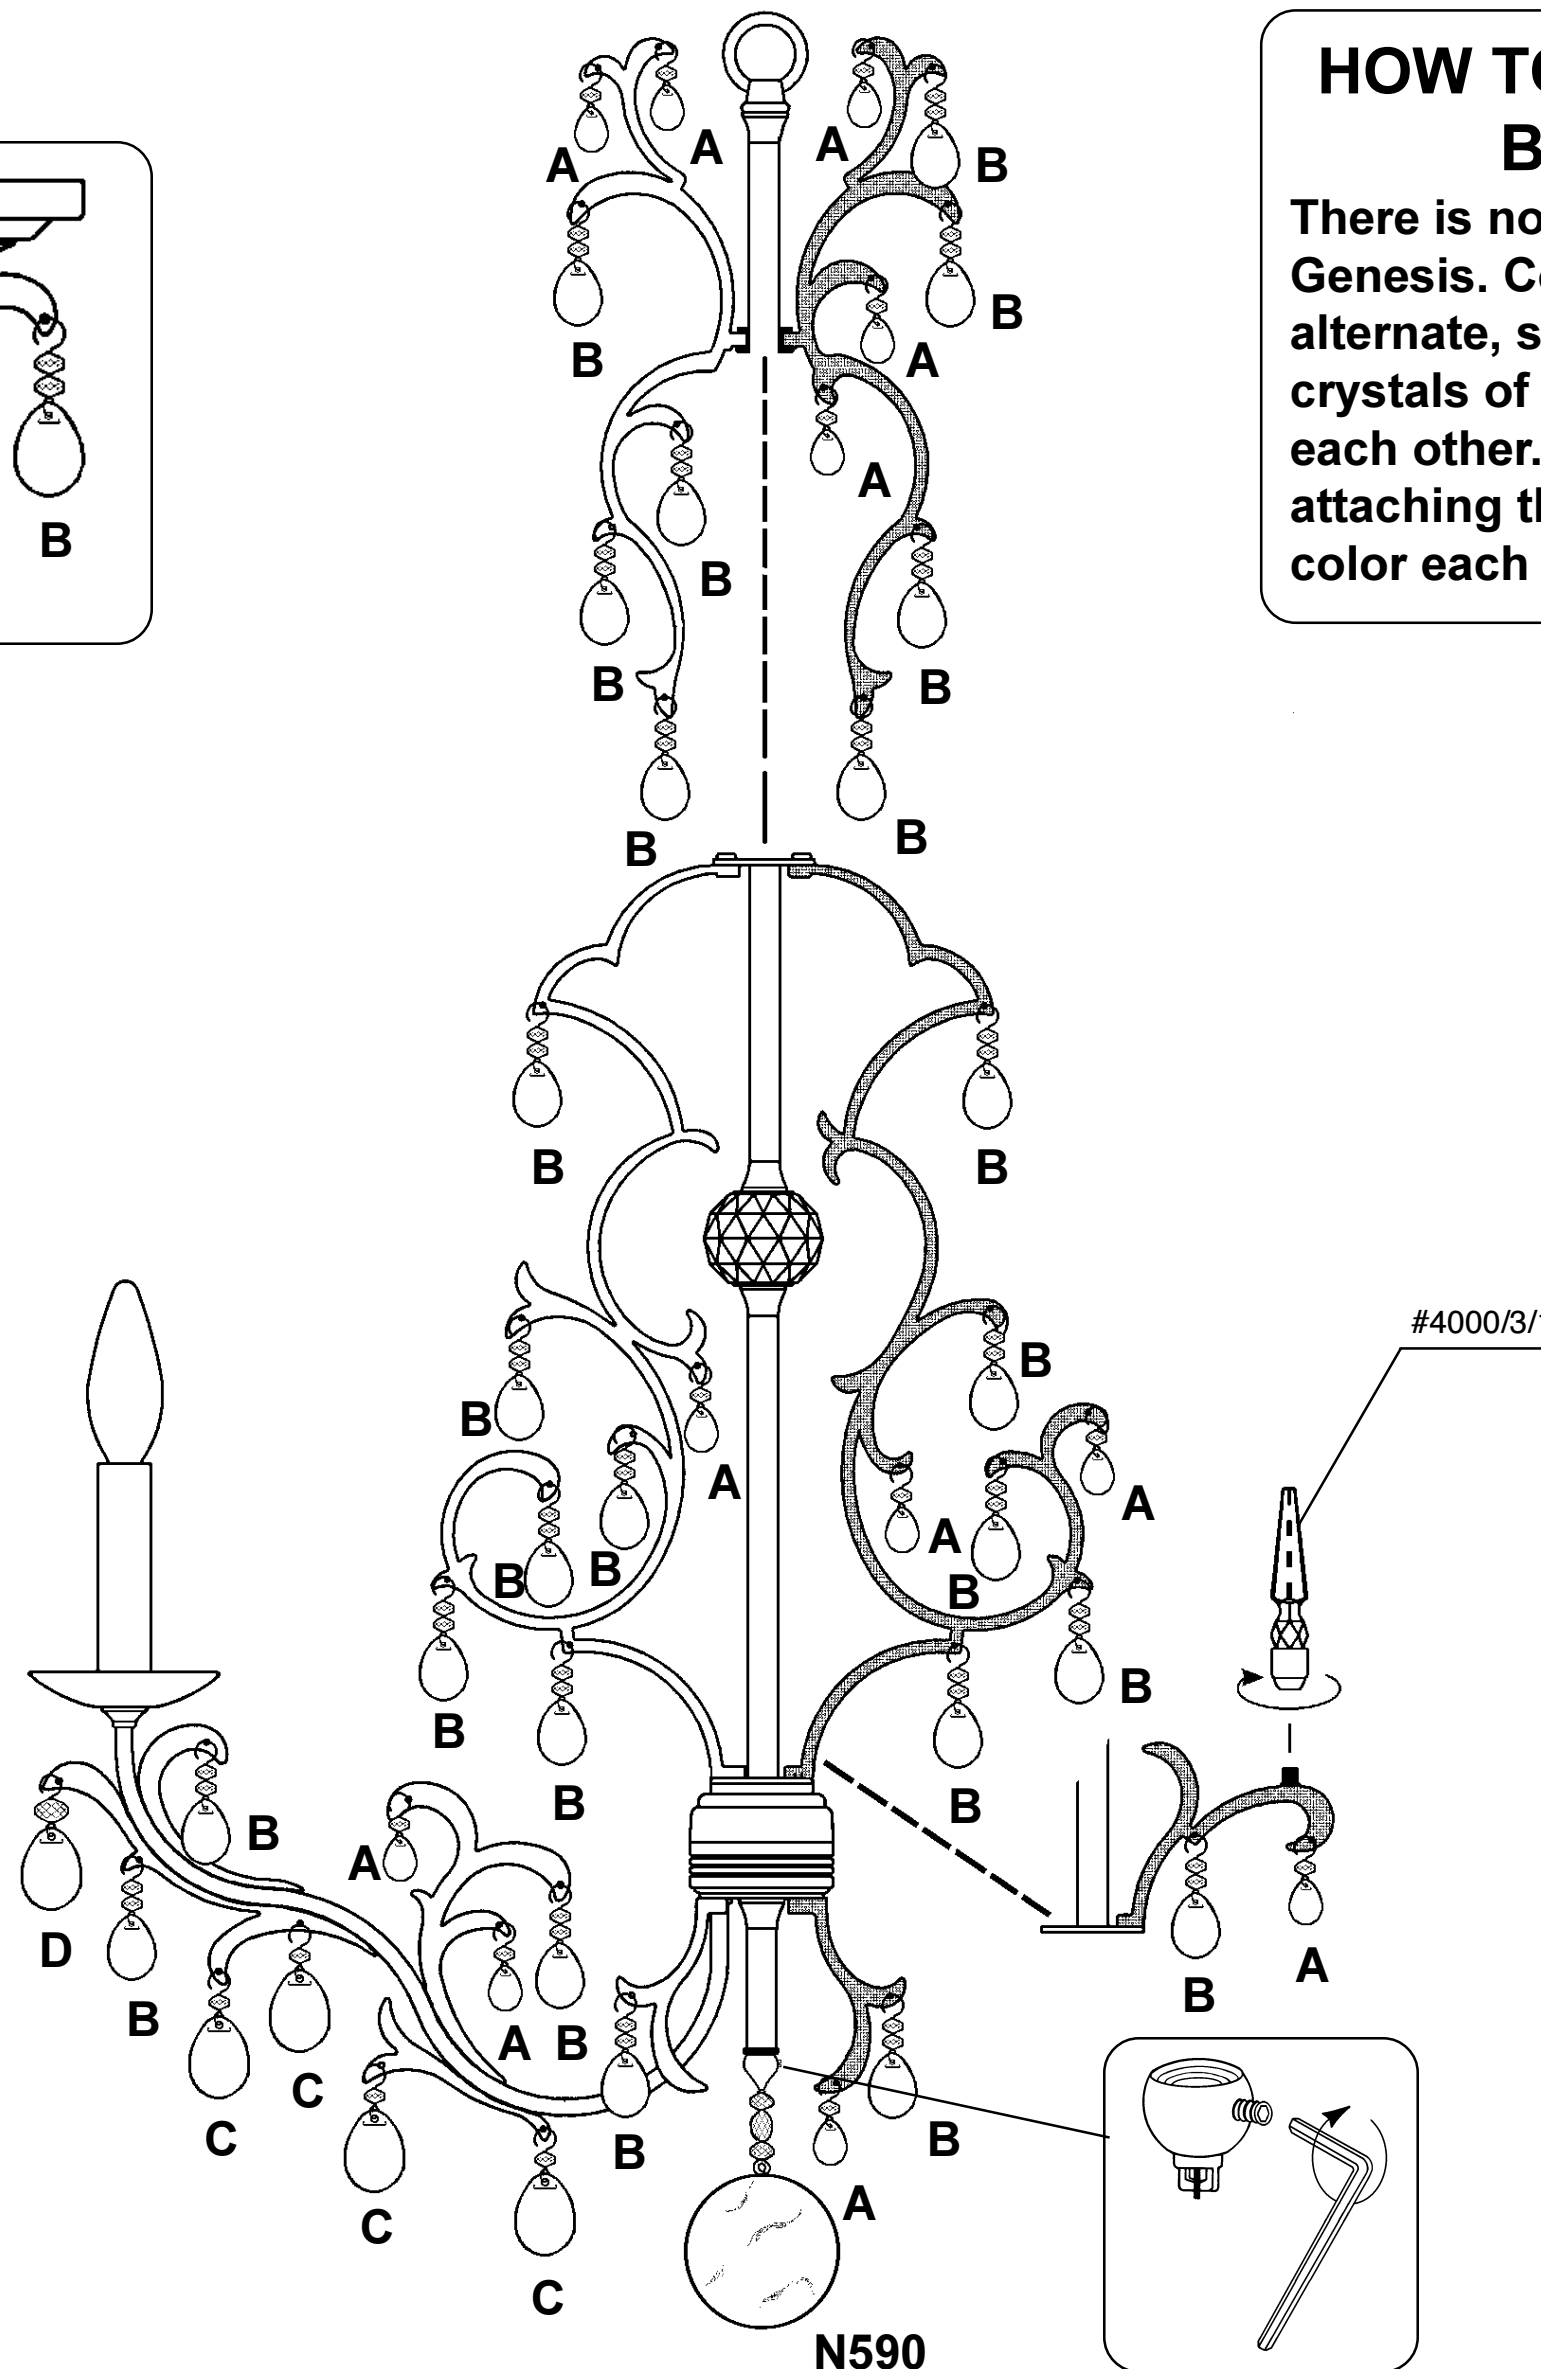

Using Crystal "B", repeat process above, working your way down and around the body of the chandelier, trimming from top to bottom. See indicated locations on diagram.

28

Hang Crystal "D" on outer points of arms as indicated.

29

Hang Crystal "C" along arms as indicated.

HOW TO TRIM GENESIS Be Creative!

There is no wrong way to trim Genesis. Colors are meant to alternate, so just avoid hanging crystals of the same color next to each other. We recommend attaching the crystals, a different color each time, in random order.
